It’s Audi because we’re driven by human achievement.

More than just cars, more than just performance. Audi is about the nature of perception, determining how people will respond to and interact with innovative design. It’s about applied physics, how things glide through the air and overcome inertia through the application of power, acceleration and exhilaration. It’s about artistry, and the way materials elicit a tactile response and provoke an emotional response. It’s chemistry and how it bonds with you. It’s poetry written in metal, engineering and design. Audi is the product of learning and application of knowledge. At its best, it is a dynamic example of what humans can create when they are vested in creating something better and bolder. So Audi is not just about cars. But then again, of course, it’s also about cars.
Excessive luxury is not our goal. But we feel that luxury doesn’t mean “more,” it means “proper.” Proper design, proper fit, proper precision—what Audi thinks of as design purity. Our engineers and designers know that a baroque clock won’t tell time any better than a streamlined one, and all the distractions that surround it actually detract from the purpose of the clock itself. Unless, of course, the purpose is just to be noticed, instead of used to its greatest potential. We think the real purpose of design is simplicity, elegantly rendered. We think you’ll see and feel that concept throughout our Audi models. In the clean design lines of the exterior, the streamlined dash, and Audi MMI® interface. In our intuitive available Audi connect®, the seamless fit and finish of our materials and the unmistakable look of our Audi Singleframe® grille. They all work in concert for a pure aesthetic of timeless taste and precision.
It’s said that when one door closes, another one opens. It sounds as if whoever said it spent some time at an Audi research and development facility. After all, while you’ll open and close the door on your Audi thousands of times without thinking about it, we’ve obsessed about it for you, in detail. Not just about the reliability of it opening and closing, obviously, but on the proper weight that will make it more pleasing to close. What it should sound like when it is shut. How the locks should click when they are engaged. The optimal acoustic placement for the speaker port. There are the hinges too, of course. And the door itself, which is designed to take the brunt of side-collision impacts, along with several dozen other considerations that we take into account when designing our doors (to say nothing of the countless other components, processors, sensors, features and the inner workings most people will never see). Our doors are more than a symbol of welcoming you into your vehicle, they are products of Audi engineering, and our reputation hinges on them as much as our hinges help support the door.

It’s Audi because our reputation hinges on the quality of things you don’t see.

Doors and Closures Innovation Award 2011, Automotive Circle International. The award is annually bestowed by Automotive Circle International for the most innovative door or closure development in automobile series production.

Speaker placement and enclosure
We work with our partners to select optimal placement of our speakers, a vital aspect of our door design, in order to deliver the most engaging and extraordinary sound you can find in the automotive space. Woofers use a specialized lightweight and ported enclosure to ensure optimum low-frequency reproduction.

Award-winning design
When Audi engineers set out to build the perfect door, they had one very important goal—lighten the load. By using fully pressed aluminum doors, the weight of the door structure was reduced by an astonishing 44 lb (20 kg) compared to the previous model. This feat, combined with the strength of its door hinges and ability to retain all of its mechanical, safety and infotainment features, is why it won the Doors and Closures Innovation Award.

Acoustic enhancements
We spend countless hours listening, so you don’t have to. By using soft-mounts on our window regulators, or a sound absorber backing within the door cavity itself, as well as a simple foam liner on our door-release cable, Audi engineers have nearly eliminated all of the ambient noise associated with other less-than-acute manufacturing practices.
Asymmetric torque split

Sport differential

Torque vectoring

You’ll find truth in your corner. Torque vectoring is a handling feature so advanced that it seems to respond to your impulses even before you turn the steering wheel. An evolution of cross-axle lock, this system works within the Audi quattro® all-wheel drive system while utilizing Electronic Stability Control (ESC) and the Anti-lock Braking System (ABS) to help sense reduced load or wheel-spin on the inside cornering tire, helping to make turns smoother and more responsive.

It’s Audi because conditions don’t have to dictate how you stick it to the road.

As you can see, we’ve always felt that the best ideas are the ones that stick. And nowhere is that more true than with Audi quattro® all-wheel drive. Since 1980, we’ve been stuck on articulating an expanding vision of what progressive all-wheel drive technology can deliver. We didn’t simply look at it as something to use in poor conditions, but rather as a performance technology that’s built to handle roads from the Alps to the autobahn—and points beyond. You’ve seen quattro® capabilities in the way we dominated the World Rally Championship for years, in the grip you have in inclement weather, and in the variable near-wheel-biased power you enjoy in good conditions. For more than 30 years and with five million quattro® systems installed in Audi vehicles, we have continued to refine the technology, developing a near sport differential to help maximize performance, and torque vectoring to assist with cornering traction while helping to improve handling. We boldly stuck to what worked while the world was trying to catch up, and we built on our vision by adding to a gripping heritage of Audi Sport® performance.

European model shown with optional equipment. | 1 Torque split ratio will vary from model to model. | 2 Optional features, options and technologies listed will not be available on all models.
It’s perfectly fine for us to admit that other engines have more cylinders, have more horsepower and have larger displacements. It’s just that we’ve made our engines lighter and more efficient than others, to optimize what we call power density. Because anyone who has driven an Audi knows unmistakable power when they feel it. It means strength that pulses with torque at the moment of acceleration, provides a true, quick response as you change lanes, and turns the most routine cloverleaf into a joyful application of performance handling. Sure, we love hitting the throttle and feeling the thrust of acceleration, but we also want our drivers to experience the balance and precision of Audi engineering. From the A3 to our track-bred line of Audi performance cars, we are in the business of engineering emotion using more compact engines that concentrate power, while using less weight to your advantage, helping improve handling to the point where others just feel heavy.

**TDI®**
A turbocharged, fuel-sipping variant, our TDI® clean diesel engine delivers uncompromising Audi performance with bold efficiency. Yes, it may run a bit dirtier than today’s gasoline engines, but it also produces more low-end torque, which is best expressed in the elasticity you have when passing in the 30- to 60-mph range.

**FSI®**
The Audi FSI direct injection fuel management and delivery system directly injects fuel into the combustion chambers at precisely managed times and depths. What that means for drivers is that a fully homogenized intake charge helps increase power while also reducing fuel consumption and emissions, making efficiency more powerful.

**TFSI®**
At Audi, TFSI represents a combination of two of the brand’s core areas of expertise—direct injection and forced induction. By adding forced induction (turbocharging or supercharging) to Audi FSI direct injection, the pressurized intake charge is cooled by directly injected fuel, thus achieving efficiency and performance combined with higher compression ratios—previously only attainable by naturally aspirated engines.

It’s Audi because power is measured by strength, not size.

Ants can carry up to 50 times their body weight. That got us thinking about lightweight structures, smart engineering and true performance.
It’s Audi because

spicy chicken is your destiny.

If you are craving an Audi, we know your tastes run a little bold. But what happens when you crave spicy chicken, or a nice vindaloo, or some pepper salsa? Well, in your Audi, you can just say the word, and we’ll help find the heat. With available Audi connect®, we’ve developed a way to seek out your destiny, even if that’s just finding the closest gas station, or the best hotel. Audi connect integrates Google™ technologies, like Google Earth™ with 3D satellite imagery, with Audi MMI® Navigation plus. It also provides Wi-Fi® connectivity for up to eight passenger devices to help you stay informed.

Check local fuel prices, weather information, and, yes, the closest Szechuan restaurant using Google™ Local Search capabilities. Think of where that might take you.1,3

1. Always pay careful attention to the road, and do not drive while distracted. The features and technologies discussed above are optional, may require an additional subscription with separate terms and conditions, and should be used only when it is safe and appropriate. The Wi-Fi® hotspot feature is intended for passenger use only.

2. Audi MMI® Navigation plus depends on signals from the worldwide Global Positioning Satellite network. The vehicle’s electrical system and existing wireless and satellite technologies must be available and operating properly for the system to function.

3. Optional features. Features and technologies discussed will be available for purchase as an additional cost. Consult your dealer or call 1-800-FOR-AUDI for details.
It seems strange to say that, while we build strong, complex and high-performing machines, we’re naturalists at heart. Then again, it might not be that unusual, seeing how nature itself builds strong, complex and high-performing machines as well. When we developed the thinking behind our Audi ultra® lightweight technology initiative, we knew that nature would serve as an inspiration to greater structural efficiency. Take the structure of the elephant skull pictured here. It has to be lightweight, yet capable of carrying a heavy load. It’s porous, but its structure is such that it enhances its stability and strength. We do the same, for example, with aluminum. Positioned one way, aluminum materials can be flexible. Positioned another, they are strong and rigid, and give better support. We also looked to bamboo, which is strong at the conjoined areas (nodes), and flexible along its stem. Our designs allow for both rigidity and flexibility where each is most needed, and for efficiency overall.

As we continue to develop strategies to improve the performance aspects and efficiency of our vehicles, we don’t shy away from the world around us. We boldly engage it even closer still.

It’s Audi because the elegant structure of nature becomes a blueprint of efficiency.

It’s Audi because the elegant structure of nature becomes a blueprint of efficiency.

Our large aluminum castings are a telling example of Audi ultra® lightweight technology. Primarily used in high-stress areas, these multifunctional castings achieve exceptional rigidity while also allowing for freedom of design, all while remaining extremely lightweight.

It’s Audi because the elegant structure of nature becomes a blueprint of efficiency.

It’s Audi because the elegant structure of nature becomes a blueprint of efficiency.

It’s Audi because the elegant structure of nature becomes a blueprint of efficiency.
It’s Audi because you I.D. our eye queue.

Even if you knew nothing about Audi, you’d still know if you were staring at one because we are unafraid to stare back. In fact, that exchange might just be love at first sight. That’s how much our iconic LED lighting technology stands out from the pack. So we had the bright idea to make our LED daytime running lights look even more intense. Now featuring a solid, sleek diode design that ingeniously reinvents our signature style, Audi LED lighting technology is once again unmistakably ours. It is an efficient, beautiful way to help you see and be seen during dawn and dusk. Look deeply into our eyes, and you’ll know the truth of our attraction.

1 Features listed are available on all models.
Get away from it all, every day, around 6 p.m., when you leave work and enter into a customized world that’s completely dedicated to your comfort and entertainment. This place, of course, is the cabin of your Audi. Optimized luxury, designed by committed craftsmen who have you in mind when they choose the leather seating surfaces, create the adjustable seats or provide the refinement of ergonomic design and a more intuitive MMI. There are small touches that help simplify the overall design, like a stylish contoured electromechanical parking brake at the foot of the center stack and an available Bang & Olufsen® retracting acoustic lens, perfectly positioned for richly detailed sound quality. And there are large statements, like a steering wheel with easily accessed controls to help you feel comfortably at ease. It is your Audi interior, where you leave the world behind, even when the world might seem in front of you on the way home.1

It’s Audi because optimized design makes your commute shine a little brighter.

1. Steering wheel
   The Audi steering wheel is both an ergonomic command center and an elegant structure of performance. Easily accessed controls on the wheel give you control over your MMI® and Audi connect®, which is designed to give you effortless access to visual information on the driver information display.7

2. Audi connect and MMI
   Simple voice or finger motions can help you access information, music and Bluetooth® enabled features.1

3. Electromechanical parking brake
   Properly positioned in the center console, the parking brake control is another small, but telling, design cue for Audi. The parking brake control serves to enhance the overall ergonomic intent of the vehicle, while delivering easy access and simple functionality.1

4. Bang & Olufsen® Advanced Sound System
   With retractable acoustic lenses and speakers positioned around the Audi specifically to optimize sound quality, Bang & Olufsen® engineers have worked tirelessly with Audi sound designers to create an immersive audio experience.1

---

1. Optional features. Features and technologies listed will not be available on all models. 2. Always pay careful attention to the road, and do not drive while distracted. The features and technologies discussed above are optional, may require additional subscription with separate terms and conditions, and should be used only when it is safe and appropriate. The Wi-Fi hotspot feature is intended for passenger use only.
With innovative pigments and dyes, the Thermocool technology Audi uses in select leather seating surfaces just might prevent that startling moment on hot sunny days. You know the one, when you sit down and feel, immediately, an intense, searing feeling on your leg. Now you can keep your cool. This supple leather doesn’t heat up as much in direct sunlight as traditional leather does. In fact, the difference between untreated leather and the temperature on your seat treated with Thermocool can be as much as 86°F. A perfect solution for your Audi A5 Cabriolet, TT Roadster or R8 Spyder. Thermocool technology is Audi to its core. Because it keeps its cool, you can keep yours.

It’s Audi because it’s as if we have SPF for seats.

Reduce as much as 86°F
Offering an education to every road. Now that you’ve had a chance to explore who we are as a brand, take a moment to see our experience come together in physical form. What you’ll witness is a vehicle with performance in its DNA, designed to carry you and your passengers in exquisite comfort, whether it’s through the heart of the city or out on the open road. It’s a bold vision of an ideal driving experience.

The story of our collection of obsessions: Precision. Design. Vision. These are the kind of attributes that we deliver as a company, the kind of passions that go way past getting you from point A to point B. That’s because Audi knows that how you get to your destination is every bit of the story. And so it is with us as a luxury brand. Our obsessions are our commitments, a collection of inspirations that make up our core truth: That from a foundation of brilliant engineering, we craft more than great vehicles—we tell great stories.
A lesson plan of luxury.

Some lessons are better learned by seeing rather than by listening. Consider this a good thing, then—the 2014 Audi A6 is a visual lesson in luxury design. Clean, assertive lines mark the beginning of the education with style. Class continues with the signature Audi Singleframe® grille up front, and a pair of beautifully sculpted exhaust outlets out back. From there, the course branches out into the seemingly relentless grip of available Audi quattro® all-wheel drive, and an available supercharged 3.0-liter TFSI® V6 engine, which gives you the muscle of a V8 with the thirst of a V6. Now you have the uncompromising performance of a technologically advanced luxury sport sedan. From every angle, it commands attention. With every drive, it enlightens.
Its character is cast in a brilliant light.

It’s been said that great writers start with one exceptional character and let the plot organically build and flow from there. We took a page from their book, so to speak, when designing certain aspects of the Audi A6. Specifically, our signature LED lighting technology. Developed with purpose in mind, it ended up serving as an equally brilliant design feature. Just consider the formation of the available full LED headlights. The design not only spreads light evenly across the road, but plays a central role in the vehicle’s character. From there, the story progresses one line at a time, starting with something we call the Tornado line. Bisecting the body profile, it runs strongly through the middle of the vehicle to give it a bold, progressive stance that tells the world that there’s pedigree here, but not a predictable one. Before you know it, the narrative becomes yours.
Some people like to fight it, others willingly embrace it. However you feel about it, you can put us down as being bullish on progress. In fact, you can clearly see our position on this with the Audi A6. Crafted with precision, appointed luxuriously and built with performance in mind, it is engineered lighter than the previous-generation A6 for improved efficiency,¹ and connected like no car before. And just to parade our commitment to progression, you can now enjoy all the low-end torque and long-range ability provided by our available TDI® clean diesel engine. The A6 was not built for those content with standing still, but for those who see progress as the only way to move forward.

From our point of view, progress is inevitable.

¹ When it comes to energy density, diesel has gasoline beat—period. This helps give the available Audi TDI® clean diesel engine its initial efficiency advantage. From there, its advanced technology and potent low-end torque do the rest to prove its point.

Imagine that this is how life looks from this point forward. Take a moment to indulge in the wraparound curve of the Audi A6 dashboard. See how it integrates intuitively with the overall driver-centric layout. Discover how the design centers on the available Audi MMI® Navigation plus with its eight-inch display deploying from and retracting into the instrument panel. Then admire the finely crafted decorative inlays displayed before you. Now imagine you just shifted into Drive. The world is undeniably yours for the taking.
Incorporating painstaking craftsmanship, the Audi approach to our wood and aluminum inlays is the same as it is to our engineering. Imperfection is not an option. So natural wood shines, and brushed aluminum glistens. We capture the right accent of your interior choice, and add a singular finish to its fit.

Balance has never been a prerequisite for passionate design. Maybe that’s why nothing, from the gleaming aluminum-trim surrounds to the burnished decorative wood or brushed aluminum inlays, is symmetrical. We considered every component of the interior and found that the people interacting with it would have different needs. So the wraparound interior isn’t in balance—it’s designed to meet the particular needs of the driver or the passenger. We feel this is a uniquely Audi perspective, to design with an imbalance in mind. From the layout of the dash to the luxurious materials and top-flight craftsmanship, we are proud to stand apart. Crafted with an eye on originality, the Audi A6 interior provides a welcome contrast to those obsessed with all things being equal.

It’s by design that we have no equal.
Available front-seat ventilation offers multiple levels of cooling while available heated rear seats keep rear passengers warm.

A more perfect union of style and function.

There’s a reason we keep pushing our innovative design team to change the way you interact with interior appointments, and it centers on an enduring drive to create style with purpose in mind. With luxurious materials, available twelve-way power front seats and four-zone automatic climate control in the Audi A6, you literally create a unique cabin environment to fit your own unique style. This is true for the smallest details too, like an available heated steering wheel, or heated and ventilated front seats that help keep you comfortable. All this so that, when you get in, what you experience is luxury perfection.

Craftsmanship:
We’ve ensured that every stitch represents the detail that we put into every aspect of an Audi.

Leather:
Designed specifically for Audi, leather envelops the vehicle’s seating surfaces, to add the right touch to your luxury interior.
We say, if you’re going to dress the part, play the part. We’re sure it will come as no surprise when we tell you the Audi S6 was made for this role. But you could have guessed that with just a glimpse of its commanding profile. Or by the roar of its 4.0-liter TFSI® V8 that produces an unrelenting 420 hp, while helping save fuel using Audi cylinder on demand™ engine efficiency technology. But what's power without control? That’s where the legendary Audi quattro® all-wheel drive system comes into play, not to mention the sport differential and Audi adaptive air suspension. And, as a final show of its ability to mesh luxury and power, it offers signature sport seats with integrated head restraints. Breaking character is not an option here.

**S6**

**Audi Sport**

See your dealer or audiusa.com for details.

---

1. EPA estimates not available at time of printing. See www.fueleconomy.gov for updated information.
2. Top track speed is electronically limited. Obey all speed and traffic laws.
The case for unbreakable bonds.

Conventional wisdom may suggest that an all-wheel drive system is there purely to provide confidence in inclement weather, but the available Audi quattro® all-wheel drive is much more than just a foul-weather friend. It’s performance engineering that takes on a dry, twisty mountain road as beautifully as it tracks through powder! In other words, quattro® helps enhance performance by appropriately transferring power to the necessary wheels when accelerating and turning, so you have confidence-inspiring performance for almost any road condition. Inclement weather aside, the really gripping story about quattro® is how it performs overall, forging a bond between you and the road that really connects.¹

All-around confidence

Just like life, the road can throw you a curve. So throw one right back with the superior grip and control of quattro®. It helps provide the performance and confidence you would expect from Audi, no matter if you’re commuting in the city or crisscrossing the country. This is advanced engineering you can live with.

¹ When driving during cold, rainy, snowy or icy weather conditions, ensure that your vehicle is equipped with appropriate all-season or winter tires. Even with appropriate tires, you must always drive in a manner appropriate for the weather, visibility and road conditions. ¹

All-out performance

You don’t win races by playing nice.² That’s why quattro® features one of the most fierce performance features around—torque vectoring. By taking into account your steering input and desired level of acceleration, it can independently brake the inside wheels through a corner and transfer torque to the outside wheels, helping to promote neutral handling.

All-weather capability

There is a reason quattro® is considered such a friend in foul weather. Under normal driving conditions, the center differential splits torque at a ratio of 40:60 front to rear, but as conditions change and become more challenging, the ratio is optimized to help maximize grip. And with the ability to transfer the majority of available torque mechanically to the wheels with the most grip, the operation is exceptionally smooth, even under extreme conditions.³

³ Always adhere to local speed limits and traffic laws.
It’s about time to put the road in its place.

Sometimes the road can get out of line, but the available Audi quattro® all-wheel drive® is more than an unruly pavement enforcer—it’s actually a response to the conditions around our Ingolstadt headquarters. With the weather and the terrain the way they are, all-wheel drive seemed like a smart solution for the problems presented. Since they design mountain roads with hairpin turns, it’s only natural that we wanted to keep the road in check. Here’s how it works:

**Asymmetric torque split**

60% | 40%
---|---

**Dynamic mode**

Tighter steering and a more responsive throttle give this setting an aggressive feel and focused performance.

**Auto mode**

The best of both worlds, dialled to automatically adjust settings for a seamless combination of comfort and responsiveness based on your driving style and road conditions.

**Individual mode**

Take the turn your way—this mode allows you to adjust the steering, throttle and transmission upshifts to your style.

**Comfort mode**

Perfect for less-than-perfect roads, this setting adds optimized steering and a closer shift pattern to help provide a more relaxed drive.

1. **Steering**

When you turn the steering wheel, you expect the vehicle to react accordingly. Audi drive select can adjust the response to the amount of torque. The more you turn, the more torque is applied to the inside front wheel to keep the vehicle on course.

2. **Torque vectoring**

This feature is available in Dynamic mode. It helps keep the vehicle稳定 when you make a hard turn, preventing it from understeering. It does this by applying more torque to the inside front wheel.

3. **Dynamic mode**

This mode is designed for drivers who want a more responsive and engaging driving experience. It increases the responsiveness of the steering, throttle, and transmission to provide a more engaging drive.

4. **Individual mode**

In this mode, you can adjust the settings of steering, throttle, and transmission to your preference. This allows you to tailor the driving experience to your personal style.

---

1 When driving in cold, wet, snow, or icy weather conditions, ensure that your vehicle is equipped with appropriate all-season or winter tires. Even with appropriate tires, you must always drive in a manner appropriate for the weather, visibility and road conditions.
For us, losing weight has nothing to do with vanity. It’s all about making us stronger and more agile. By reducing the weight of the chassis and engine, we are able to harness more power more quickly—and, not incidentally, more efficiently! That means the Audi A6, equipped with the supercharged 3.0-liter TFSI® engine, delivers the potent acceleration of a traditional V8 with the efficiency of a V6—improved miles per gallon and more beats per minute! We call that a win-win.

### With efficiency comes great power.

**Audi multitronic® transmission**

As a continuously variable transmission, the available Audi multitronic® transmission combines the efficiency of a manual gearbox with the convenience of an automatic transmission.1 Thanks to its variable ratios and adaptive map control, the Audi multitronic always utilizes the optimal rev range of the engine.

**Eight-speed Tiptronic® automatic transmission**

As the perfect companion for almost any road trip, the eight-speed Tiptronic® automatic transmission available in the Audi A6 offers eight optimized, carefully chosen gear ratios. Selecting automatically or via its console-mounted shifter or steering wheel with available shift paddles, precise shifts are delivered without sacrificing the smoothness of the Tiptronic® automatic. A high final drive ratio allows optimization of lower gears, yet the transmission’s upper range emphasizes fuel economy—particularly at highway speeds.1

---

**Audi multitronic® transmission**

As a continuously variable transmission, the available Audi multitronic® transmission combines the efficiency of a manual gearbox with the convenience of an automatic transmission.1 Thanks to its variable ratios and adaptive map control, the Audi multitronic always utilizes the optimal rev range of the engine.

**Eight-speed Tiptronic® automatic transmission**

As the perfect companion for almost any road trip, the eight-speed Tiptronic® automatic transmission available in the Audi A6 offers eight optimized, carefully chosen gear ratios. Selecting automatically or via its console-mounted shifter or steering wheel with available shift paddles, precise shifts are delivered without sacrificing the smoothness of the Tiptronic® automatic. A high final drive ratio allows optimization of lower gears, yet the transmission’s upper range emphasizes fuel economy—particularly at highway speeds.1

---

1. EPA estimates not available at time of printing. See www.fueleconomy.gov for updated information. Your mileage will vary.
2. Starts-stop efficiency system standard on 3.0 TFSI and TDI® models.
We thought you should know: Diesel sports a greater power density than traditional gasoline, which means that a gallon of diesel fuel has about 15% more energy than a comparable amount of gas, and combuts more efficiently in the engine. The Audi TDI® clean diesel engine has achieved ultra-low emissions vehicle (Biim-S/ULEV II) status in all 50 states while producing approximately 20% fewer CO₂ emissions than the traditional gasoline-fueled engine. And the brainy attributes don’t hide the brawn—in fact, Audi has dominated the 24 Hours of Le Mans over the years with Audi TDI® prototype race cars. With these facts in mind, maybe you are thinking that an Audi TDI® might be your choice—which goes to show that clean diesel really is fuel for thought.

**Fuel for thought.**

**TDI® clean diesel**

- **Diesel packs more power.** On average, one gallon of diesel contains about 147,000 BTUs, versus 125,000 for gasoline.

- **Combustion more efficient.** Combining a high compression ratio with direct injection makes combustion cleaner than those of engines with a lower compression ratio.

- **Combustion more efficient.** With innovative direct particulate filters and the nontoxic AdBlue® reducing agent, we eliminate up to 95% of diesel NOX emissions.

- **After-exhaust treatment.** With innovative diesel particulate filters and the nontoxic AdBlue® reducing agent, we eliminate up to 95% of diesel NOX emissions.

- **Variable vane turbocharger.** Adding turbo power to clean diesel engines, our adjustable vane turbocharger produces impressive torque punch and mid-range passing power.

- **Piezo direct injection.** Precise injections help lower the combustion noise normally associated with diesel engines, while optimizing the distribution of fuel in the combustion chamber, helping to further reduce exhaust emissions.

- **Diesel packs more energy.** On average, one gallon of diesel contains about 147,000 BTUs, versus 125,000 for gasoline. 

- **Combustion more efficient.** Combining a high compression ratio with direct injection makes combustion cleaner than those of engines with a lower compression ratio.

- **Combustion more efficient.** With innovative direct particulate filters and the nontoxic AdBlue® reducing agent, we eliminate up to 95% of diesel NOX emissions.

We shed light on your blind spots.

Audi strives to constantly up the ante on the driver assistance tools built right into the Audi A6, and they’re all designed to work in tandem with you, wherever you go. Whether it’s advanced technologies like night vision assistant that uses infrared technology to spot pedestrians and other obstacles on the road, or radar sensors that Audi side assist utilizes to inform you of vehicles approaching from the side and rear, you’ll find that we’ve developed them to work together to help keep you in charge of the road.

The whole suite of available driver assistance features can be found in the A6. It’s another testament to the effort Audi puts into helping ensure that you’re not the only one keeping an eye on the road.

Driver Assistance

We’re solving problems before you even know you have them.

Audi adaptive cruise control with stop & go
Not only retains a preset distance from vehicles ahead, but resumes acceleration when you’re ready. Using long-range radar and a camera, the available Audi adaptive cruise control with stop & go helps read the traffic conditions and adjusts the speed, helping to bring the vehicle to a full stop before accelerating when traffic flow resumes.

Audi pre sense® plus
The available Audi pre sense plus offers comprehensive driving assistance with sensors in the front, side and rear. After visual, physical and aural collision warnings, there are four distinct phases for automatic preparation for the unavoidable: an upsurge of brake pressure, safety belt pre-tensioning, partial braking, and sunroof and window preparation. In severe cases, Audi pre sense plus will engage full braking and deceleration.

Audi active lane assist
Operating at speeds above 38 mph, this available system helps detect when the vehicle begins to leave the lane without signaling. Then, through gentle, corrective steering efforts, it helps the vehicle remain in the lane and vibrates the steering wheel as an additional warning. This way, Audi active lane assist complements the driver’s decision-making process and further solidifies the bond between driver and machine.

Night vision assistant
Using infrared technology to detect what lies ahead, this available feature uses thermal-imaging technology to help you avoid trouble. Pedestrians can be detected over 300 feet in front of the vehicle, while objects can be detected over 900 feet ahead—all shown on the 7” color driver information system.

Top and corner view cameras
Four cameras on this available technology allow for an overhead view of your surroundings, making parking just a little easier. The technology shows you where your vehicle is in relation to obstacles nearby, giving you the confidence to maneuver in practically any environment.

Head-up display
With easy-to-view, accurate visual information right at your head, this available feature displays the speedometer, navigation and even pedestrian-detection warnings.

The available Audi side assist uses radar sensors and two different optical warnings to help keep the driver informed about what is approaching from hard-to-see angles behind and to the side of the vehicle.

Audi side assist

Using radar sensors and two different optical warnings to help keep the driver informed about what is approaching from hard-to-see angles behind and to the side of the vehicle.

Audi side assist uses radar sensors and two different optical warnings to help keep the driver informed about what is approaching from hard-to-see angles behind and to the side of the vehicle.

Audi side assist uses radar sensors and two different optical warnings to help keep the driver informed about what is approaching from hard-to-see angles behind and to the side of the vehicle.

Audi side assist uses radar sensors and two different optical warnings to help keep the driver informed about what is approaching from hard-to-see angles behind and to the side of the vehicle.
Audi engineers don’t equate strength with size. Big is just big—strong is a more flexible concept. While you may not think about weight savings when it comes to strength, we’d like you to take a second and think again. The aluminum hybrid construction developed by Audi engineers is a lightweight and unyielding revolutionary technology that offers an innovative approach to both weight savings and strength. Airbag technology is designed to respond differently based on seat position, and specially constructed crumple zones give way upon impact to help mitigate potential injury in a collision.1 All of this, combined with the rigidity of laser seam-welded joints that enhance the strength of every Audi we make, helps diminish the impact of an unavoidable event.

ESC and ABS
Computerized technology that works in perfect sync with the Anti-lock Brake System (ABS), Electronic Stability Control (ESC) helps minimize any loss of stability, applying brake pressure to individual wheels and reducing throttle input to help counter oversteer or understeer when the vehicle needs it.

Safety
Working to spread a "bend, don't break" philosophy.

Tailor-made blanks
Developed to make the best possible use of the body’s potential, specially made blanks are the result of a special manufacturing process that can help strengthen the upper part of the B-pillar, while the lower zone is designed to help mitigate the impact in the event of a side collision.

Aluminum body panels
Due to their strength and the nature of their integration into the structure, aluminum body panels provide an important load-bearing function on top of cutting down on unnecessary weight.

Ten airbags strategically placed around the occupants, the option of up to ten airbags in the Audi A6 offers passive safety in the event of a collision, helping to protect the driver and passengers on all sides.
Function buttons

helping you navigate through the MMI system with ease are four well-placed function buttons. Each button correlates to a command at the corner of the screen, and, when pressed, takes you to your desired selection.

Audi MMI touch

Developed by the Audi human machine interface (hmi) team, Audi MMI touch illustrates why making something simple to use can be so complex. The hmi team designed a system so advanced, it can read almost any handwriting even if you choose to write with your non-dominant hand.

MMI System

We've brought the backseat driver front and center.

Audi MMI Navigation plus

count on the available advanced navigation system to home in on your destination with stunning precision while putting a little more depth in your journey with help from Google Earth™.1

BLUETOOTH® wireless technology

unlock your mobile phone’s potential through the MMI system. Simply pair them up and start enjoying near complete control at the touch of a button.3

SiriusXM® Satellite Radio

go ahead. Cross the country. We assure you, you’ll never run out of entertainment options, with over 130 channels of music, talk, sports and news.

Audi media

The media function opens up a world of options when equipped with the Audi MMI Navigation plus, allowing you to control the Audi media interface, Secure Digital (SD) card slots, hard disk drive (HDD) audio jukebox or DVD, and BLUETOOTH® streaming audio.2,3

Get in touch with your needs.

A lot can be said with a simple touch. Case in point, the available Audi MMI® touch. A revolution in intelligent simplicity, MMI touch with handwriting recognition is a technology that gives you the ability to give commands and retrieve media simply by its recognizing a few strokes of your finger. Access information such as music files, contact information and destinations through the Audi MMI touch—or give input to the optional Audi connect®, an innovative infotainment system with Google Earth™ mapping service. Now staying in touch with your world isn’t just a good gesture, it’s one simple gesture.1,2

1 Always pay careful attention to the road, and do not drive while distracted. The features and technologies discussed above are optional, may require an additional subscription with separate terms and conditions, and should be used only when it is safe and appropriate. The Wi-Fi® hotspot feature is intended for passenger use only.

2 See Infotainment/Technology section of the Feature Content page for important information regarding Audi MMI® Navigation plus and required SiriusXM® subscriptions.

3 Requires compatible phone.
Don’t reach—relax. While touchscreens are seemingly everywhere, they don’t need to be in your vehicle. With available Audi connect®, you may never have to reach out again.1 Thanks to Google Voice™ Local Search, Audi connect allows you to search Google Earth™ by simple voice commands. The crisp display is nestled farther up, closer to the windshield, so your eyes don’t have to focus and refocus between the screen and the road ahead of you. For those times when you are feeling tactile, we’ve placed toggle buttons near the gear shifter, where your hand naturally rests while you drive. So while other automobile manufacturers still want you to reach out, we’ve found a few ways for you to make information a lot more accessible while your hands are on the wheel.

**Voice Commands**
The point-of-interest search with voice control means that the digital world is with you every journey.

**Ice-Chip Features**
Plan travel from your personal computer. Send your desired destinations to your vehicle ahead of time and access your route from your vehicle later.

**Weather Plus GPS**
Current local conditions and forecasts for your destination can help you prepare for your trip.

**Point of Interest**
Get information about current events, exciting locations and places of interest at your travel destination, current location or other chosen location instantly.

**Google Earth™ Integration**
Simply tell your Audi what you are in the mood for: turn on the cloud-processing power of Google™ speech recognition, interpret your request and bring up a list of destinations in the area of your choice.

**Travel Info**
If nothing else, you know your car is listening to you.

1. Display your mental attention to the road, and do not drive while distracted. The features and technologies discussed above are optional, may require an additional subscription with separate terms and conditions, and should be used only when it is safe and legal to do so and when it will not detract from the driver’s ability to safely operate the vehicle. The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Audi North America, Inc. is under license. Only use this feature if it is legal to do so where you live. The Google Earth™ integration requires an internet connection. The crisp display is nestled farther up, closer to the windshield, so your eyes don’t have to focus and refocus between the screen and the road ahead of you. For those times when you are feeling tactile, we’ve placed toggle buttons near the gear shifter, where your hand naturally rests while you drive.

---

**Travel Info**
If nothing else, you know your car is listening to you.
When even a German lullaby is an ode to sound engineering.

It would be an interesting challenge, a note-perfect Brahms’ lullaby delivered through the tuned speakers of an Audi sound system versus the exhilaration of the passing lane. Either way, performance wins. But it goes way beyond the gentle tones of a German composer. Audi sound engineers don’t simply make the cabin acoustics sound perfect for your music, they make the drive a dream. Or, if not dream, then put it in harmony with every other element of the driving experience. From the sound of a shuttering door, to the click of a turning knob, to the full integration of the available Bose® or Bang & Olufsen® sound systems, there’s an orchestra of engineering that fills your cabin with faithfully rendered, thrilling sound. Whatever it is you are looking for, Audi sculpts sounds in a way that matches your mood, even when you need soothing while in traffic.

Optimized sound flows through strategically placed speakers around the cabin. Hear it, and you’ll instantly become engrossed in the tiniest detail and warmth of the sound.

15 speakers

---

Bose® Surround Sound System

Hitting the right note on every drive, the available Bose® Surround Sound System turns your Audi into a 14-speaker powerhouse with the help of innovative sound engineering and optimized speaker placement. The result: sound as captivating to your ears as an Audi is on your eyes.

Bang & Olufsen® Advanced Sound System

The passion of Bang & Olufsen® matches well with Audi. Just consider the remarkable available Bang & Olufsen® Advanced Sound System. By focusing on design and performance together, it has become the symbol of acoustic perfection. Bang & Olufsen® engineers help to craft meticulously rendered sound through 15 speakers (including two innovative retractable aluminum acoustic lenses) and an impressive 1,300 watts of pure power. The result: sound as captivating to your ears as an Audi is on your eyes.
It’s like a parting gift from the passing lane.

It feels good to give, so why not make a grand offering for every person you glide past in your Audi A6. Known for our stylish signature headlights, Audi also takes pride in how we say farewell to others with our stunning LED taillight technology. Not only do you leave every straggler pining for more, when they disappear in your rear view mirror, you’ll be left with much more than just a feeling of goodwill: a sense of pride knowing that you are at the leading edge of the automobile’s twenty-first century glory days.

LED taillight technology
Sleek and stylish, these rear light-emitting diodes are brighter and longer-lasting than conventional bulbs and illuminate faster than traditional brake lights, which can help give the driver behind you more time to respond.

Tires are supplied and warranted by their manufacturer. High-performance tires are designed for optimum performance and handling in warm climates. They are not suitable for cold, snowy or icy conditions. If you drive under those circumstances, you should equip your vehicle with all-season or winter tires, which offer better traction under those conditions. We suggest you check your owner’s manual for the tires recommended for your vehicle or its equivalent. These high-performance tires also have a lower aspect ratio that aids performance and handling; however, in order to avoid tire, rim or vehicle damage, it is important that tire inflation pressure is regularly checked and maintained at optimum levels. Please also remember in making your selection that, while these tires deliver responsive handling, they may ride less comfortably and make more noise than other choices. Finally, these tires may wear more quickly than other choices.

1 Decorative inlay options will vary based on model and interior color combination. See your dealer for details.

2 See your owner’s manual for inflation pressure recommendations.
Technical Specifications

**Engine**

- **Type**: Four-cylinder
- **Capacity (cc)**: 1,984
- **Bore and Stroke (mm)**: 82.5 x 92.8
- **Displacement (cc)**: 1,984
- **Horsepower (@ rpm)**: 220 @ 4,450–6,000
- **Torque (lb-ft @ rpm)**: 258 @ 1,500–4,300
- **Compression Ratio**: 9.6:1
- **Valve Configuration**: 16-valve DOHC with variable valve timing
- **Induction/Fuel Injection**: Turbocharged/TDI®
- **Start-Stop Efficiency System**: —
- **Transmission**: Audi multitronic® continuously variable transmission with front-wheel drive
- **Drivetrain**: Audi quattro® all-wheel drive

**Body**

- **Exterior**: Audi ultra® lightweight technology—aluminum exterior body panels and a steel chassis
- **Wheels**: 19 inches
- **Tires**: 225/40 R19
- **Brakes**: Ventilated front disc/Ventilated rear disc
- **Steering**: Electromechanical power steering system
- **Suspension**: Front: five-link; Rear: trapezoidal-link
- **Electrical**: 120 A alternator

1. Airbags are supple mental restraint only and will not deploy under all crash circumstances. Always use safety belts and seat children only in the rear, using restraint systems appropriate for their size and age.
**Black is the new black.**

If the Audi A6 makes a statement, the A6 Black Optic package is an outright declaration. First off, 20” Titanium-finish 5-arm rotor design wheels set this vehicle apart even at a standstill. Add to that a striking Black Audi Singleframe® grille and the already muscular and sporty look provided by the Prestige model, and you’ll see why some things never go out of style.

1. Audi®MMI® Navigation plus depends on coverage from the worldwide Global Positioning Satellite Network. Your vehicle’s structural system and existing precision satellite technologies may be capable of operating properly for the system to function. The system is designed to provide you with suggested routes only to make your journey more enjoyable. Changes in street names, new or altered routes, changes in street names and other road system changes must be updated to the navigation system in order to ensure your vehicle’s navigation plus is up-to-date. For more information, see your Audi dealer or call 1-800-FO-Audi (362-8434) for details.

2. See the Audi®connect® page for important information about Audi®connect®.

3. Audi® Traffic service available in select markets.

4. Some Audi models are equipped with a keyless ignition customer agreement (see www.audiusa.com) and are continuous until you call 1-800-FO-Audi (362-8434) for details.

5. SiriusXM® Satellite Radio™ Technology ——

6. Surround® System with 14 speakers, AudioPilot® noise compensation and 1,300 watts ——

7. Complete detailed mapping of lanes, roads, streets, toll roads, highways, etc., is not possible, therefore you may encounter discrepancies between the mapping and your actual location. Please rely on your individual judgment in determining appropriate action.

8. Subscription is governed by a separate agreement for details.

9. **® refers to “Registered trademark” of the respective owner registered in the United States and/or other countries. For more information about these trademarks, please visit audi.com/brand-terms.®

10. In some states, only one painting is allowed. For paint codes, see your Audi dealer or call 1-800-FO-Audi (362-8434) for details.

11. See the Audi®connect® page for important information about Audi®connect®.

12. Surprisingly, Audi®tm® Wireless Technology preparation for mobile phone and Audi® Streaming Audio™ Technology preparation for mobile phone are available and capable of playing Apple® iPod® and Samsung® Android devices.

13. The Audi® Traffic service is available in select markets.

14. Surround® System with 15 speakers and 1,300 watts ——

15. For more information about the audio system, please visit audi.com/brand-terms.
Add a new point of view, a dash of distinction and the ultimate in self-expression with Audi Genuine Accessories. Whether you need the cargo carrier with climbing gear or add a set of sporty new wheels, we’ve got the accessories that will help enhance every facet of your lifestyle. Designed for seamless compatibility with your Audi, all pieces are backed by your vehicle’s 4-year/50,000-mile limited warranty or the accessory’s 12-month/12,000-mile limited warranty, whichever extends longer from the accessory purchase date. If you’re looking to personalize or protect, Audi offers an intelligent solution.

- **Fork-mount bike rack**
  Mode of anodized aluminum, this rack features a quick-clamping device that can be secured with the included lock.1,2

- **Compact cargo center**
  A functional, aerodynamic design that offers a generous 16.95-cu-ft capacity.2,3 Stay flat. Bend, fold wide, 15” high.2

- **Ski and snowboard rack**
  Fork-mounted, leg-style ski and tall board ratchets are designed to fit nearly any ski and snowboard—standard and twin-tip. Deluxe attachment holds up to two sets of skis or two snowboards.2,3

- **28” 5-tri-spoke wheels**
  A sporty yet elegant design in Anthracite with machine-polished spokes.2,3 A bold, aggressive stance and strong, dynamic design.

- **Premium textile floor mats**
  Custom fit for the Audi A6. This custom fit transparent film helps protect the rear bumper.2,3 Deep-ribbed, channeled design helps protect the floor and carpeting from water, mud, sand and snow. Black mats feature the vehicle logo and are available in sets of two for front or rear.

Audi Genuine Sport and Design Accessories
- **Audi Genuine Alloy Wheels**
  Go almost anywhere. Give your Audi the proper invitation. Each part of your vehicle features a rim that speaks volumes about Audi’s engineering. Our rims are engineered, manufactured and tested to meet rigorous factory and regulatory standards—an area where other wheels often fall short.

Audi Genuine Sport and Design Accessories
- **Audi Genuine Tactical Accessories**
  Precision touch floor mats are made of long-life fabric to help protect the vehicle’s interior from the elements. Mats are black and available in a set of four.

Audi Genuine Tactical Accessories
