Reason #4

Our vehicles are built to last.

We know our vehicles will be on the road for a long time, so it makes sense that we design our parts to last at least as long as the vehicle is on the road, and in some cases longer.

Our well-engineered LED headlights last approximately 10,000 hours.

That’s a long time—most likely longer than the life of your vehicle. 10,000 hours is also the same amount of time, it’s been said, it takes to master a skill. If that skill is designing parts that defy age, Audi should be considered the foremost expert.

The Audi MMI® touch is built to withstand 600,000 touches.

Not only is the innovative MMI touch system designed to help you input information intuitively, it’s built to keep helping you do this, day after day, month after month, year after year.

We have a record of significant durability.
Our vehicles are designed to stand the test of time. By looking to the past, we create designs that won't go out of style in the future. Just consider our iconic Audi Singleframe® grille. Its design dates back to 1935, but its iconic look is just as striking today as it was nearly 80 years ago. So what does design mean for you? You’ll never have to worry about your Certified pre-owned Audi looking outdated, and the timelessness design will help retain its value.

Auto Union Silver Arrow
Built in 1935, and raced by Tazio Nuvolari, this vehicle becomes the inspiration for the iconic Singleframe grille.

The Nuvolari Concept Car
Inspired by Nuvolari’s Silver Arrow, the Nuvolari concept car integrates the Singleframe grille for a super-modern look.

Singleframe grille A8
Design innovations on the Nuvolari Concept are integrated through Audi mass-produced cars.

Singleframe grille S7
The grille design is persistent for four to eight years, developing an iconic look, and ensuring that its design will remain timeless.

Reason #6

The driver is top of mind.

Our team of world-class automotive designers and engineers work tirelessly to make sure that every Audi is not only a stunning work of art, but also an exceptionally engaging vehicle to drive. This is apparent from the moment you sit in the driver’s seat to the moment you power through the apex of a twisty mountain road. We’ve had the driver in mind since the beginning, and we’re proud to say it.

This is how inspiration becomes reality.

Danny Garand & Stefan Sielaff
Designed the new A3 and the A7

“Our cars need to fascinate people. It’s about ease of use, technology, detailing. From the headlight’s graphic design to the sound a button or knob makes when it’s turned; it all needs to work together and it needs to inspire.”

—Danny Garand

“Personally I believe in a more reduced, clean design language, which is part of the genetic code of Audi. We’re creating quite elaborate, expensive products. Therefore it is like a question of aesthetic sustainability. A car will only be sustainable if it’s not a short-term fashion product.”

—Stefan Sielaff
