If it was this easy, it wouldn’t be an Audi.

When you were a kid, you probably felt quite proud when you completed a model kit. We understand. At Audi, it takes countless hours for a single Audi to go from idea to design to roadworthy, and that’s time we are very proud to devote. Our obsession for detail, commitment to premium fit and finish and passion for unparalleled engineering go into every model. It’s the kind of discipline that the word “painstaking” was invented to describe. Not to say it’s a chore—no, assembling an Audi is a labor of love, and it shows every time you sit in one, engage the ignition and nudge the accelerator. Creating an Audi isn’t easy, but the results help define what Audi means to the people who drive one.
The door of perception.

It’s said that, when one door closes, another one opens. It sounds as if whoever said it spent some time at an Audi research and development facility. After all, while you’ll open and close the door on your Audi thousands of times without thinking about it, we’ve obsessed about it for you, in detail. Not just about the reliability of it opening and closing, but on the proper weight that will make it more pleasing to close. How the locks should click when they are engaged. The optimal acoustic placement for the speaker port. There are the hinges too, of course. And the door itself, which we designed to take the brunt of side-impact collisions, and several dozen other safety considerations (to say nothing of the countless other components, processors, sensors, window features and the inner workings most people will never see). Our doors are more than a symbol of welcoming you into your vehicle; they are products of Audi engineering, and the very perception of Audi hinges on them as much as our hinges help support the door.

Our reputation hinges on the quality of things you don’t see.

Innovative Design

By using fully pressurized aluminum doors in the Audi A6, the doors were able to reduce by an astonishing 44 lb compared to the previous model. Optimal speaker placement helps deliver the most extraordinary sound you can find in the automotive space. We use soft mounts on our window regulator and a sound-absorbing backing within the door cavity itself to make the cabin even quieter.
quattro® HAS MAINTAINED ITS GRIP ON OUR THINKING AND THE ROADS WE TRAVEL.

For more than 30 years, Audi has been focused on quattro® all-wheel drive. During that time, it has evolved into an overarching idea of performance, a technological system of ratios, power delivery and driving dynamics working seamlessly together, orchestrated through the drivetrain, providing power where and when it is needed most. In many ways, this has been a three-decade drive, from the Alps to the autobahn—points beyond. You’ve seen quattro® capabilities in the way we dominated the World Rally Championship for years, in the grip you have in inclement weather, and in the variable power distribution you enjoy in good conditions. For more than 30 years, and with over five million quattro® systems on the road, we have continued to refine the technology, developing an available rear sport differential to help maximize performance and available torque vectoring to assist with cornering traction while helping to improve handling. We’re biddly stuck to what worked while the world was trying to catch up, and we built on it.

1. When driving during cold, rainy, snowy or icy weather conditions, ensure that your vehicle is equipped with appropriate all-season or winter tires. Even with appropriate tires, you must always drive in a manner appropriate for the weather, visibility and road conditions.
The obsessive engineering of maximum fitness.

ENGINEERING POWER IS MORE THAN JUST ADDING MUSCLE.

There is an art to fitness. Yes, there are some who go for the massive, sculpted muscle look. But there is something more compelling out there for those with more refined tastes. The kind of sculpted efficiency found in Audi engines elevates the driving experience through smaller, finely tuned forced-induction engines. For the drive to feel lean and precise, we’ve shaved off unwanted sounds. Sure, large numbers might distract some, but a champion impresses with its grace, power and athletic balance—captured in the right suspension setting, a torque-vectored corner. Audi engineers shape power that celebrates a true dedication to craft. It means strength that pulses at the moment of acceleration, provides a true, quick response as you change lanes, and burns the most routine cloverleaf into a joyful application of performance handling. This is the art of maximum fitness, to the point where others just feel a little flabby.

FSI®
The FSI direct injection fuel system directly injects fuel into the combustion chambers at precisely controlled times and depths. What that means for drivers is that a fully homogenized intake charge helps increase power while also inducing fuel consumption and emissions, resulting in efficiency more powerful!

TFSI®
At Audi, TFSI represents a combination of two of the brand’s core areas of expertise—direct injection and forced induction. By adding turbocharging or supercharging to FSI direct injection, the pressurized intake charge is cooled by directly injected fuel, thus achieving efficiency and performance combined with higher compression ratios—previously only attainable by naturally aspirated engines.

TDI®
A turbocharged, fuel-sipping variant, our TDI® clean diesel engines deliver uncompromising Audi performance with bold efficiency. It gets better mileage per gallon than comparable gasoline engines, but also produces more low-end torque, which is best expressed in the elasticity you have when passing in the 30- to 60-mph range.

1. Given vary of speed and traffic laws.
2. Based on EPA estimated fuel economy.

Performance

The obsessive engineering of maximum fitness.
ELEPHANT SKULL,

How nature solved the apparent conundrum of an elephant’s skull didn’t escape the notice of Heinrich Timm, the longtime lead engineer for Audi. The weight of the tusks and the general size of an elephant’s head would seem to make it impossible for the animal to actually be able to carry it. But the design genius behind the elephant’s skull is to make it lightweight yet sturdy. Its predominantly hollow design is followed by thin, connective bone walls, which act as strong, weight-bearing cells. Audi engineers used that idea when developing our aluminum and steel structures. Reducing weight, yet enabling strength.

THE ELEGANT STRUCTURE OF NATURE BECOMES A BLUEPRINT OF EFFICIENCY.

It seems strange to say that, while we build strong, complex and high-performing machines, we’re naturalists at heart. Then again, it might not be that unusual, seeing how nature itself builds strong, complex and high-performing machines as well. When we developed the thinking behind our ultra® lightweight technology initiative, we knew that nature would serve as an inspiration to greater structural efficiency. Take the structure of the elephant skull pictured here. It has to be lightweight, yet capable of carrying a heavy load. It’s porous, but its structure is such that it enhances its stability and strength. We do the same, for example, with aluminum. Positioned one way, aluminum materials can be flexible. Positioned another, they are strong and rigid, and help give better support. We also looked to bamboo, which is strong at the conjoined areas (nodes), and flexible along its stem. Our designs allow for both rigidity and flexibility where each is most needed, and for efficiency overall. As we continue to develop strategies to improve the performance aspects and efficiency of our vehicles, we don’t shy away from the world around us. We boldly engage it even closer still.

How studying elephant skulls makes for superior handling.

THE ELEGANT STRUCTURE OF NATURE BECOMES A BLUEPRINT OF EFFICIENCY.

It seems strange to say that, while we build strong, complex and high-performing machines, we’re naturalists at heart. Then again, it might not be that unusual, seeing how nature itself builds strong, complex and high-performing machines as well. Always pay careful attention to the road, and do not drive while distracted. The features and technologies discussed above are optional, may require an additional subscription with separate terms and conditions, and should be used only when it is safe and appropriate. The Wi-Fi® hotspot feature is intended for passenger use only. Features and technologies listed are not available on all models. The voice control feature is not available on Cabriolet or Roadster models.

MMI® navigation plus depends on signals from the worldwide Global Positioning Satellite network. The vehicle’s electrical system and existing wireless and satellite technologies must be available and operating properly for the system to function. The system is designed to provide you with suggested routes in locating addresses, destinations and other points of interest. Changes in street names, construction zones, traffic flow, points of interest and other road system changes are beyond the control of Audi of America, Inc. Complete detailed mapping of lanes, roads, streets, toll roads, highways, etc., is not possible, therefore you may encounter discrepancies between the mapping and your actual location. Please rely on your individual judgment in determining whether or not to follow a suggested MMI® navigation plus route. For mapping updates please see your Audi dealer or call 1-800-FOR-AUDI for details.

Features and technologies listed are not available on all models.
Even in the dark, you know when you’re staring at an Audi. In fact, it might just be love at first sight. That’s because, instead of cursing the darkness, we celebrate the light. Available full LED headlights stand out from the rest: their color intensity is engineered to be reminiscent of daylight. But while we illuminate the night, we don’t forget the day—so we made our LED daytime running lights to look even more dramatic. New featuring a sleek diode design that gives us the freedom to elegantly reshape our signature style, Audi LED lighting is once again ours. It is an efficient, beautiful way to help you see and be seen from dusk to dawn and back again. Look deep into our eyes, and you might just see the soul of a company.

Hey, bright eyes.
CLEAN, BEAUTIFUL DESIGN COMES FROM DEDICATED CRAFTSMEN UNAFRAID OF GETTING THEIR HANDS DIRTY.

How we know exactly what you feel.

Our hands give you shade and sanctuary.
Our hands give you comfort and control.
You might not sense our hands nearby, but our hands know exactly what you feel. That’s because we’ve been there. After all, our hands crafted a customized world that’s dedicated to control, comfort and entertainment. We’re talking, of course, about the cabin of your Audi vehicle. Optimized luxury, designed by committed craftsmen who had you in mind when they chose the leather seating surfaces, created the contoured seats or provided the refinement of ergonomic design and an available more intuitive MMI® system. There are small touches that help simplify the overall design, and there are large statements to help you feel at ease. It is your Audi interior, shaped by the kind of people who know you want to experience luxury firsthand.
You have to weather adversity to know things like this.

Think of it this way—If it rains, would you notice a dry side view mirror? Maybe not, but compared to one with beads of rain on it and distorted reflections, you would. It’s a little thing, perhaps, but these little things are part of our deep obsession with crafting a premium driving experience.

We design our exterior side mirrors with small sills to channel water along their upper edge, helping leave your view unobstructed. We also design our windshield moldings with channels that allow rain water to efficiently run off instead of returning to the windshield wiper path. These are small touches, thought of by engineers and crafted by designers who don’t necessarily call attention to their skills. Instead, these details reflect a commitment to quality that you might never notice—until a moment of bad weather or adversity, when you might. But don’t worry. We don’t mind if you don’t notice us, now and then.
Either think about the future, or make history.

Talking about a better future is easy. After all, how can you be held accountable for something that never arrives? But if you really want to affect it, to make history, you have to do more than talk. Enter e-tron®. It’s not the first plug-in electric hybrid to the market, but we are making it the most forward-thinking Audi ever produced. For example, we will be including a level 2 charger with our A3 Sportback e-tron PHEV for qualified owners who want to drive on electricity as much as possible. We also plan to offer unique sustainable energy offerings like an available solar program to help provide power to your home and vehicle. It’s not just practical, it’s premium too, in style, in performance and in fit and finish, like any other Audi vehicle. But more than that, it will be Audi making smart technology smarter, with adaptive kinetic energy-harnessing when you brake, and better performing than what came before it. With the Audi e-tron vehicles, we’re saying the future is now.

1. 240-volt, 40-pin Siemens ChargeMaster hardware and cabinet included with the vehicle. Additional electrical work, if required, will be the responsibility of the owner. Visit www.audiusa.com for more details.
When you are attracted to something, the effects are immediate, the domination, total. For a relationship to last, though, it must move beyond that passionate initial phase. It’s what comes next that turns a bright flame into an eternal torch. That’s why Audi doesn’t simply design premium vehicles for the short-term, but offers an entire experience that we hope lasts a lifetime. Do you want to customize your Audi? We offer Audi exclusive materials and colors. Do you want care-free service options? Audi Care is available. MMI® updates, trial offers for Audi connect®, a full suite of available Audi driver assistance technologies—these might not be the reasons why you fell in love with an Audi, but they are, perhaps, the things that help keep the heart fires stoked.1

1 Optional features and technologies listed are not available on all models. See Infotainment/Technology section of the Featured Content page for important information regarding MMI® navigation and required SiriusXM® subscription.
The alchemy needed to build an automotive icon is elusive. Sure, it’s found, partly, on an assembly line, with committed artisans taking pride in every stitch they overseen. It’s also on a drafting board, sketched by visionaries looking to further expand what we look for in automotive design lines. But it’s also in the countless inspirations, small and large, that not only explain a bold thought or striking idea, but execute them. Examples of these can be found in the foundational stories we tell about our company and our vehicles. These stories show how an abstract idea can turn into a powerful, sculpted machine, and then how that machine can help forge an iconic reputation for a brand. Out of the inspirations we find in engineering, art and the large world of ideas, we have created a fearless, iconic company of substance and luxury: Audi.

Inspirations that build an icon.
A standout in the city square.

With backdrops ranging from the ultramodern downtown loft or the work-in-progress brownstone; the city moves to its own beat. The sound of cabbies hustling for their next fare and the wail of distant police sirens accompany every step. Take in the familiar scents of hotdogs and churros wafting in the air while surveying, at every intersection, the flashing neon lights and sights that can often border on the bizarre. Yes, this is the city, in all its splendor. But there’s more. It’s a bustling ecosystem comprised of art scenes and beat cafés, sporting venues and concert halls, and this is a vehicle that stands out from the urban fabric, just as you will. Introducing the all-new Audi Q3.
Cross over into the city necessity vehicle.

You won’t mean to turn heads as you crawl through busy intersections, making your way from uptown to downtown, just consider it collateral damage. The Audi Q3 is designed to match the pace of the city, and that’s why movement is engineered into its design. Its modernity is displayed in its sloping roofline, giving the Q3 its coupe-like look and feel. The Singleframe® grille and xenon plus headlights with LED daytime running lights radiate a city-like determination, illuminated for improved visibility to cyclists and other motorists while getting you where you need to be with style. With intention, we blend design and practicality, helping ensure the Q3 is the perfect companion for city life. We’ve simply delivered both in a single, stylized package suited equally for the symphony or the farmers market.
It’s OK to fall for these lines.

Our mission wasn’t to contribute to the architecture of the city, but the lines we implemented in the design of the Audi Q3 delivered. Complementary to your style, your surroundings and your lifestyle, the lines on the Audi Q3 were crafted to lure you in, no matter what your perspective. Sized for the city, but still featuring a higher seating position for improved driver visibility, the Q3 is the only accompaniment you’ll need to paint the town an assortment of available colors. One can definitely say that it’s intentionally slicker for the city.
Craftsmanship

We’ve ensured that every stitch represents the detail that we put into every aspect of an Audi vehicle.

Decorative inlays

Beautifully crafted aluminum or wood inlays add a warm and sophisticated touch to an already regal interior. And with two inlays available, you can be sure your style will match that of the city.

Urban engagement center.

The city is a mix of new and old thriving together, and, to an extent, it’s not unlike the interior of the Audi Q3. The Q3 is loaded with available technologies like MMI® navigation plus and award-winning Audi connect® and subtle touches like ambient lighting, developed especially for the modern world. But it wouldn’t be an Audi without the quality craftsmanship and refined materials we’ve relied upon for decades. Driver-centric controls are thoughtfully placed for easy engagement. Leather seating surfaces and a leather-wrapped steering wheel ensure that every encounter is luxurious one. So even when you surround yourself with the modernity of the technological world, there’s a little bit of bygone thinking at work too.

1 See Infotainment/Technology section of the Featured Content page for important information regarding Audi connect® and MMI® navigation plus.
Power tailgate
Made from aluminum, the available power tailgate with its wraparound design is an unmistakable styling element on the Audi Q3 that emphasizes the vehicle’s width and facilitates convenient loading and unloading of cargo.

Cargo space
You can pack a lot of good things into this small package. With 48.2 cu ft of storage space with the rear seat folded flat, the Q3 can answer the call of the wild as well as tame the urban jungle. Whether you’re stocking up at the store, or getting away for the weekend, the Q3 is engineered to adapt to you.

Split folding rear seatbacks
The 60/40 split folding rear seatback makes adventure possible, giving you the flexibility to house a variety of gear or equipment in your Q3.

Here’s where traffic gets a time out.
You’re perfectly adapted as a denizen of the city, but there are times it can become overwhelming. The happenings of a vibrant city can take their toll, so we made sure that the cabin of the Audi Q3 helps keep the noise out. It’s our way of letting you appreciate city life and get away from it at the same time. With the comfort of our supple leather seating surfaces, twelve-way power front seats (including four-way power lumbar support), we’ve engineered a place that is a little closer to a perfect sanctuary. And if you need a greater escape, the Q3 is capable of taking you on a variety of excursions; with the 60/40 split folding rear seats folded flat, you’ll be able to slide a generous amount of cargo over the available stainless steel trunk sill.
Climate control

Personal attention is paramount in the Q3. With the standard dual-zone automatic climate control, the driver and front passenger have the ability to dial in their ideal temperatures. The driver and front passenger have the ability to dial in their ideal temperatures.

Panoramic sunroof

The standard panoramic sunroof offers both the front and rear passengers an unobstructed view overhead while flooding the cabin with natural light. And when you decide you need to say goodbye to the sun, a power sunshade is there to make it an easy task.

Space is at a premium in the city, the pace is bustling, so we’ve crafted the kind of contemplative interior that is both expansive and comfortable. The large panoramic sunroof we engineered into the Audi Q3 is dramatic in its openness, and provides a stellar perspective of the skyline above you. So whether you’re taking in the city air through the panoramic sunroof or relying on the dual-zone automatic climate control that comes standard, the Q3 gives you the metropolis in style, no matter what your point of view.
A gripping story of twists and turns.

City streets can be as surprising as the stories they tell. Debris, broken glass, construction zones, gravel and neglected surfaces all make traction difficult. That’s why we developed the available quattro® all-wheel drive system. Leading us heroically to countless wins on the rally circuit, quattro® has also helped lead the way to wins on paved tracks like Le Mans. Much more than a tool for handling inclement weather, it also helps improve vehicle performance in city driving. quattro® ensures that, as the city saga unfolds, you’ll be a step ahead of the plot.1

With available quattro®, the Q3 can “read” the road, sensing changes in the surface beneath the wheels and adjusting their grip accordingly. So when driving conditions become more demanding, quattro® adapts to deliver precisely distributed power to where it’s needed to meet the changes in the terrain.

1 When driving during cold, rainy, snowy or icy weather conditions, ensure that your vehicle is equipped with appropriate all-season or winter tires. Even with appropriate tires, you must always drive in a manner appropriate for the weather, visibility and road conditions.
Comfort mode
Perfect for those long highway stretches, this setting adds optimized steering and throttle tip-in to help provide a more relaxed drive.

Dynamic mode
Tighter steering and a more responsive throttle give this setting an aggressive feel and focused performance.

Auto mode
The best of both worlds, dialed to automatically adjust settings for a seamless combination of comfort and responsiveness based on your driving style and road conditions.

At Audi, we believe you should be the ultimate master of your road-going domain. That’s why we created the available Audi drive select system. It gives you the ability to adjust the vehicle’s steering and throttle response with the utmost of ease. And with three modes to choose from, when almost any kind of road comes into question, Audi drive select will let you answer.
When you drive the parkway and ditch the highway.

Producing more power from smaller engines has been a “right-sizing” philosophy of ours for quite some time, something you’ll soon realize when you motor through city streets. Moving through crosstown traffic requires the perfect combination of power and performance, so the Audi Q3 is aptly outfitted with a 2.0-liter TFSI® engine that delivers 200 hp and 207 lb-ft of torque. This ensures that, while your commute may consist of short bursts, your sprints will be both exciting and dynamic.

2.0 TFSI four-cylinder

This 2.0-liter turbocharged DOHC engine produces 200 horsepower and 207 lb-ft of torque, and combines FSI® direct injection and turbocharging for great power and overall performance.

Built to answer a red-light, green-light lifestyle.

Stop-and-go driving isn’t the best way to get around, but it’s an unavoidable aspect of life in the city. To combat this inefficiency, the six-speed Tiptronic® automatic transmission is engineered to shift smoothly, and has wide gear ratios that help maximize power and acceleration and minimize waste. It’s just another way we utilize smart technologies to give specific personalities to the drivetrains of each vehicle.

Transmission

As the perfect compromise between a dedicated manual and an automatic gearbox, the six-speed Tiptronic® automatic transmission offers six optimized, carefully chosen gear ratios. Selected automatically or via the console-mounted shifter or steering wheel with available shift paddles, precise shifts are delivered without sacrificing the smooth action of the Tiptronic® automatic.
A little insight into the things you cannot see.

It always happens: the light has turned green, but there are still shuffling stragglers in the crosswalk. It’s important to be alert, so we’ve equipped the Audi Q3 with a number of features to help you observe pedestrians and surrounding vehicles. Large, available power-folding side mirrors help keep you aware of your surroundings, and available Audi side assist helps with lane changes and is perfectly suited for the hustle and bustle of town. And since parking is always at a premium, the available parking system plus with rear view camera can help you maneuver into tight parking spots with ease. With all of this wrapped into a city-ready crossover, you’ll find the Q3 is eager to help you get around town.

Driver Assistance
We’re solving problems before you even know you have them.

Power-folding mirrors
In the city, parking spaces are tight. Fortunately, the Audi Q3 was engineered to seamlessly adapt. When you find the perfect spot, available power-folding mirrors will help ensure that no damage will occur from bicyclists and passersby.

Parking system plus with rear view camera
Helping to make parking a significantly easier task, the available parking system plus features front and rear acoustic parking sensors. For added benefit, the rear view camera offers selectable guidelines for parking in parallel or perpendicular spaces.

Hill descent assist
When traveling at lower speeds on a downslope, the driver can engage hill descent assist via a button located on the center console. Once selected, the system detects loss of traction due to slippery surfaces or wheels leaving the ground, and automatically responds by activating the brakes, thus helping to maintain a constant speed.
Q3

Crumple zones
Knautschzone may be an ugly word, but it’s a beautiful technology. German for “crumple zone,” this ingenious feature helps dissipate the energy from a collision by spreading the impact forces around the passenger cell and away from its occupants. In doing so, it also enhances the vehicle’s deceleration rate, which helps to further lessen the force of impact.

Tailor-made blanks
Developed to make the best possible use of the body’s potential, tailor-made blanks are the result of a special manufacturing process that can help strengthen the upper zone of the B-pillars, while the lower zone is designed to help mitigate the impact in the event of a side collision.

Safety
Working to spread a “bend, don’t break” philosophy.

ESC and ABS
Computerized technology that works in perfect sync with the Anti-lock Brake System (ABS), Electronic Stability Control (ESC) helps maintain your line of stability, applying brake pressure to individual wheels and reducing throttle input to help counter oversteer or understeer when the vehicle needs it.

Tough enough for the big, bad city.

Living, working and driving in the big city require a tough skin. Six standard airbags can be found throughout the interior! Lightweight and extremely strong aluminum and reinforced steel encase you and your passengers, and crumple zones are specifically engineered to help absorb impact, lessening the shock to everyone inside.

Six standard airbags
With six standard airbags, including front-impact, Sideguard® curtain, and thorax side airbags for both driver and front passenger, you’ll feel practically surrounded. And that’s a good thing.

1. Airbags are supplemental safety restraints only and will not deploy in all crash circumstances. Always use safety belts and seat children only in the rear, using restraint systems appropriate for their size and age.
SiriusXM® Satellite Radio
Go ahead. Crisscross the country. We assure you, you’ll never run out of entertainment options, with over 150 channels of music, talk, sports and news.1

Audi media
Now you’re in control. The standard Audi music interface helps give you seamless iPod® integration. Your compatible iPod® device can be controlled through the audio system and steering controls, and with SD card slots for your MP3 music, your entertainment options just keep getting better.

MMI navigation plus
Count on the available advanced navigation system to home in on your destination with stunning precision while putting a little more depth in your journey with help from the available Audi connect®.1,2

BLUETOOTH® wireless technology
Unlock your compatible mobile phone’s potential through the MMI system. Simply pair them up and start enjoying near complete control at the touch of a button.

MMI System
Putting your needs front and center.

Become your own city planner.
As cities modernize, they rise up higher and expand outward. New corridors emerge, connecting existing sights with the new ones. Keeping traffic under control becomes an around-the-clock occupation. So while congestion is common in and around town, we’ve decided to help you minimize the time you spend behind the wheel.

Function buttons
Helping you navigate through the MMI® system with ease are four well-placed function buttons. Each button correlates to a command at the corner of the screen and, when pressed, takes you to your desired selection.

1See Infotainment/Technology section of the Featured Content page for important information regarding MMI® navigation plus and required SiriusXM® subscriptions.
2Always pay careful attention to the road, and do not drive while distracted. The features and technologies discussed above are optional, may require an additional subscription with separate terms and conditions, and should be used only when it is safe and appropriate. The Wi-Fi® hotspot feature is intended for passenger use only.

Find the shortest distance between points A through Z.

Chart your journey before you’ve even left the house, thanks to available Audi connect® and your myAudi account.

Audi connect is your onboard personal assistant, traffic helicopter, meteorologist, navigator and much more. And with the benefits of Google Voice™, Local Search, Audi connect can help you find the meal you’ve in the mood for or points of interest you want to visit, and help reroute you in the event that you find yourself in some unexpected traffic. So no matter how many stops you have to make on your next outing, be sure you don’t do it alone.

Stay on top of the news by having your personal assistant stay on top of the news for you. Help keep your Audi connected by having the digital assistant interpret your request and bring up a list of current news sources, exciting locations and events, exciting locations and events, exciting locations and events.

The point-of-interest search with voice control means that the digital assistant can help you prepare for your trip. If you wish to search for parking, simply tell the digital assistant to help you find the meal you’re in the mood for, then let the cloud-processing power of Audi connect interpret your request and bring up a list of destinations in the area of your choice.

Get traffic information overlaid onto available 3D satellite imagery to visualize a true aerial view of your route, and let the MMI navigation plus system reconfigure your route to help avoid traffic.

Google Earth™ with 3D satellite imagery
With Google Earth™ integration, you’ll enjoy 3D satellite imagery, including Google Maps Street-View, displayed right on the MMI display.

Weather information
Current local conditions and forecasts for your destination can help you prepare for your trip.

City events
Get information about current events, exciting locations and destinations, current location or other chosen location instantly.

Parking information
Search for parking in your area of interest, see its availability, and set your vehicle as a destination to help navigate directly to the garage entrance.

Discover local landmarks in your area of interest, set them as your destinations, and let your vehicle lead the way as you explore the world around you.

Google Voice™-based Search
Simply tell your Audi what you are in the mood for, then let the cloud-processing power of Audi connect interpret your request and bring up a list of destinations in the area of your choice.

BOSE® Surround Sound System

Hitting the right note on every drive, the available 465-watt BOSE® Surround Sound System turns your Audi into a 14-speaker powerhouse with the help of innovative sound engineering and optimized speaker placement. Add to that AudioPilot® noise compensation, which helps maintain a consistent volume under varying speeds and road conditions, and you get an acoustic listening environment that rivals any live performance.

Your city. Block by block, beat by beat.

Tune in and turn it up. We offer an available premium BOSE® Surround Sound System in the Audi Q3, tuned to help ensure that every note matches the energy of the town. 465 watts power 14 speakers purposely placed to ensure that your favorite songs come through with the crispness and clarity the artist intended. And while we ensure that the sound within the cabin is always premium, the aerodynamic design of the Q3 is specifically engineered to help reduce noise from outside the cabin. You might say that we’re in the business of sound engineering too.
On notice about being noticed.

You didn’t mean to make a grand entrance, but you can rely on making a graceful exit. So make small talk as you wait for the valet to bring around your Audi Q3, and remember, people will take notice. Just for fun, look back before you pull away to see wide eyes illuminated by our signature LED taillights. Don’t be fooled by the red glow—deep down your onlookers are glowing green.

LED taillights
LEDs are among the most luminous taillights available. And, like Audi vehicles, they are efficient, technologically advanced and long-lasting.
2015 AUDI Q3 2.0T PREMIUM PLUS SHOWN IN FLORENT SILVER METALLIC.

  ▶ Balsamic Brown Walnut Wood decorative inlays

1. MMI® navigation plus depends on signals from the worldwide Global Positioning Satellite system. The vehicle’s side-top system and mapping service and satellite technologies must be available and operating properly for the system to function. The system is designed to provide you with suggested routes in locating addresses, destinations and other points of interest. ... street names, construction zones, traffic flow, points of interest and other road system changes are beyond the control of Audi of America, Inc. Complete detailed mapping of lanes, roads, streets, toll roads, highways, etc., is not available, and Audi does not guarantee the availability, accuracy, completeness or functionality of the mapping data. Please see your Audi dealer or call 1-800-FOR-AUDI for details.

2. Always pay careful attention to the road, and do not drive while distracted. The features and technologies discussed above are optional, may require an additional subscription with separate terms and conditions, and should be used only when it is safe and appropriate. The Wi-Fi® hotspot feature is intended for passenger use only.

3. SiriusXM Satellite Radio and SiriusXM Traffic subscriptions are sold separately or as a package after trial period and are continuous until you call SiriusXM to cancel. See Customer Agreement for complete terms and more information at www.siriusxm.com. SiriusXM Traffic service available in select markets. SiriusXM U.S. Satellite service available only to those at least 16 years of age. SiriusXM U.S. satellite service available only to those at least 16 years of age. (SiriusXM U.S. satellite service not available in Alaska or Hawaii.)
Analogous to the progressive nature in which all our vehicles are engineered are the technologies and offerings available in a variety of packages to enhance the experience of driving an Audi vehicle. To prove that luxury has progressed, we invite you to explore the package that best outfits your Audi Q3.

  - Three-spoke multifunction steering wheel with shift paddles
  - Twelve-way power front sport seats, including four-way power lumbar adjustment
  - Audi drive select

---

1. MMI navigation plus depends on signals from the worldwide Global Positioning Satellite system. The vehicle’s drive-by-wire system and existing wireless and cellular technologies make the MMI navigation plus system available. The system is designed to provide you with suggested routes to help you find your way to a destination. Changes to street names, construction zones, traffic, prices in aviation and other models may result in system operator errors. In addition, the system cannot control the accuracy of information provided by third parties. In some cases, inaccurate information may be provided. Therefore, please exercise your own judgment when following MMI navigation plus routes.

2. SiriusXM Satellite Radio and SiriusXM Traffic subscriptions are sold separately or as a package after trial period and are continuous until you call SiriusXM to cancel. See Customer Agreement for complete details. SiriusXM is not available in Alaska and Hawaii. SiriusXM’s satellite service is available only in the 48 contiguous U.S.A. and Canada. Fees and taxes may apply. For more information, call 1-888-538-2673. "All-in-One Satellite Radio" is subject to change. SiriusXM’s satellite service is available only in the 48 contiguous U.S.A. and Canada. SiriusXM Satellite Radio service is available only to those who are not in the rear of their vehicles. SiriusXM licensors’ names and logos are property of their respective owners. SiriusXM services are available only to those over the age of 18.

3. High-performance tires are designed for better performance and handling in warm climates. When driving in cold, snowy or icy weather, you should equip your vehicle with four all-season or winter tires, which offer better traction under those conditions. We suggest selecting the same brand and type of tire for all four wheels. High-performance tires also have a lower aspect ratio that aids performance and handling. Driving over rough or damaged road surfaces, as well as debris, curbs and other obstructions may cause serious damage to wheels, tires, vehicle body and suspension parts. Be careful to avoid road hazards and reduce your speed, especially if your vehicle is equipped with low-profile tires. Please also remember when making your selection that high-performance tires deliver responsive handling, they may ride less comfortably and make more noise than others. Finally, these tires may wear more quickly than other choices. It is important that the tire inflation pressure be checked and maintained at recommended levels.
Exterior Colors

Exterior colors, interior color and decorative inlay options will vary based on model and trim level combination. See your dealer for details.

*1. Airbags are supplemental restraints only and will not deploy in all crash circumstances. Always use safety belts and seat children only in the rear, using restraint systems appropriate for their size and age.*
maintain more distance from other vehicles since braking distances will be longer on ice- and snow-covered roads.

Remember that even with high-quality winter tires, you must always drive according to the conditions of the road and always be prepared for the worst. The features and technologies discussed above are not designed to protect you during a collision. Always pay careful attention to the road, and do not drive while distracted.

Always be prepared for the worst. The features and technologies discussed above are designed to provide you with suggested routes in locating addresses, destinations and other points of interest. Changes in the road system—including road, lane, and traffic flow, points of interest and other road system changes—are beyond the control of Audi of America, whether you load the cargo carrier with climbing gear or add a set of stylish new wheels, we have the accessories that will help enhance every facet of your lifestyle. When purchased from an authorized dealer, all pieces are backed by your vehicle's 4-year/50,000 mile limited warranty or for 12 months/12,000 miles from the accessory purchase date, whichever is greater. If you're looking to personalize or protect the vehicle you love, we have an Audi-designed solution that works for you.

The uniquely shaped design of this anthracite wheel gives your Q3 a more-distinguished presence. Also available in black.

Adding style and performance, this winter wheel and tire package is specifically engineered to help improve traction and handling in snow and on icy roads—a necessity for day-to-day use in temperatures below 45°F.2

For mapping updates please see your Audi dealer or call 1-800-FOR-AUDI for details.

Inc. Complete detailed mapping of lanes, roads, streets, toll roads, highways, etc., is not possible, therefore you may experience variations between the mapping and your actual location. Please rely on your individual judgment in determining whether or not to follow a suggested MMI® navigation plus route.
