The information within this guide must be used in conjunction with the information in the Audi Owner's Manuals. Refer to your vehicle's Owner's Manual for all information and warnings. By using this guide, you acknowledge that you are aware of and have read the warnings and information provided in the Owner's Manual on the topics in this guide and will use this information to augment that material.
Welcome

Your new A5 is equipped with many features designed to accentuate your driving experience and create an environment that is refined, elegant and supremely functional. This guide will assist you in better understanding some of the features of your A5 and provide you with the knowledge needed to enjoy your new Audi to its fullest.

The MMI® system consists of the MMI® display screen and the MMI® control panel. This panel is composed of a control knob with joystick, control buttons and function buttons.

Pressing one of the six function buttons such as RADIO or NAV displays that features options in each corner of the MMI® screen.

The four control buttons surrounding the control knob correspond to the four corners of the MMI® display. Selecting the desired button will access sub menus.

While operating the menus and functions, you can return to a previous screen by pressing the BACK button.

To make a selection or confirm a request, simply turn the control knob and press the center of the joystick to select.

To move to a specific location within the Navigation Map or control the main menu of a DVD, move the joystick located on top of the control knob.
Volume/Track Advance Button

Tipping the knob right or left allows you to move through audio tracks and radio stations. Pressing will mute audio when in Radio mode and pause when playing media. Holding the button down will turn the system off.

Media Function Button

- Access available media from connected sources
  - BLUETOOTH® Audio, SD card, DVD, Jukebox, and Audi Media Interface (AMI).
  - The iPod AMI cable comes standard with MMI® Navigation plus.
  - The AMI connection can be found in your glove box.

Steering Wheel Controls

In addition to the MMI® control panel, you can use the multifunction steering wheel controls to display specific MMI® features in the Driver Information System.

Simply press the MODE button until you reach your desired function, including Radio functions.

The thumbwheel can be used to scroll through the options. Press it to make a selection. Steering wheel controls allow you to select Phone functions.

The button is used to activate Voice Recognition. The volume thumbwheel is used to adjust the volume, pressing it will mute audio or pause media.

Pressing the NAV button* will repeat the last Navigation announcement when navigation is active.

* Available with optional MMI® navigation only.
Setting Station Presets

You can set any mix of up to 50 Presets from FM, AM or Sirius options.

1. Press the RADIO function button multiple times to toggle between FM, AM or SIRIUS.
2. Tune to the desired station using the control knob and pressing to select.
3. Press and hold the center control knob until the Presets screen shows the Preset list.
4. Scroll to the numbered list position where you want to save your selection.
5. Press the center control knob again; the station is saved to this position.

To access your Presets:

- Press the RADIO function button then the Presets control button.
- Use the MMI® control knob to scroll through your Presets.
- Press the center button of the control knob to select a Preset.
- Using Voice Recognition, press after the beep, say “Presets”.

NOTE: Occasionally, tall buildings and tunnels may interrupt the satellite signal. For more information, please refer to the SiriusXM® brochure in your glove box.
BLUETOOTH® Pairing: MMI®
Initial Setup

BLUETOOTH® pairing is a one-time procedure. Once paired via BLUETOOTH®, your phone will automatically connect when you start your vehicle and your phone’s contacts automatically synchronize, allowing you to retrieve contacts and make and receive calls through the infotainment system. For more information regarding phone compatibility visit audiusa.com/bluetooth.

To pair a phone:

1. Switch ignition to accessories mode.
2. Activate your phone’s BLUETOOTH® function and set to Pairing or Search mode.
3. Select Audi MMI® when it appears on the phone’s screen.
4. Use the MMI® control knob to select Yes.
5. Confirm the six-digit PIN displayed matches the PIN displayed on your phone, and select Yes.
6. Select Pair on your phone to complete the pairing process.
7. Contacts synchronizing.
   • BLUETOOTH® active and network strength bars.

NOTE: See your phone’s owner manual for specific BLUETOOTH® activation instructions. Vehicle should be stationary with the parking brake engaged while performing this operation.

NOTE: Once paired, the BLUETOOTH® symbol appears in the MMI® screen along with network strength bars, and it will be displayed whenever a paired phone is connected to the infotainment system.

Important Safety Instructions and Warnings which you must read, are listed on the last panel under BLUETOOTH® Pairing.
Voice Recognition*: MMI®

Call By Name

TEXT A5VOICE1 to 38981
Do not text and drive. Message and data rates may apply.

1. Press the button.
   A beep will sound.

2. Say, “Call” <Name from directory>
   (e.g., “Call John Smith”).

3. To confirm the request, say “Yes”. The number will be dialed.

NOTE: If multiple numbers are stored for a given contact, the system will ask which number you wish to dial. When calling by name using voice recognition, you must say the name as it is stored in your phone book.

Natural Language Commands

You may also speak natural language commands using the button.

Verbal destination commands can be given while in any screen.

Your Audi MMI® Navigation system has many Global Voice Recognition commands available. This means that you can access any function or while another function or mode is active.

Commands such as:
- Enter Number
- Enter Destination
- Presets
- Media
- Redial
- Online Destination
- FM, AM

You can begin your request from any screen.

Once your requested function is active, you can continue with commands for that mode.

For example:
- Enter Number
- Dial
- Repeat
- Correction

To cancel Voice Recognition while active, say “Cancel” after the beep or press the button until system responds with cancelled.

Refer to your owner’s manual for further commands.

*Available in Coupe models only.

Important Safety Instructions and Warnings which you must read, are listed on the last panel under Voice Recognition.
BLUETOOTH® Pairing:
Audi concert radio

Initial Setup

BLUETOOTH® pairing is a one-time procedure. Once paired via BLUETOOTH®, your phone will automatically connect when you start your vehicle and your phone’s contacts automatically synchronize, allowing you to retrieve contacts and make and receive calls through the infotainment system.

For more information regarding phone compatibility visit audiusa.com/bluetooth.

To pair a phone:

1. Switch ignition to accessories mode and turn on the Audi concert radio.
2. Activate your phone’s BLUETOOTH® function and set to Pairing or Search mode.
3. Select Audi UHV when it appears on the phone’s screen.
4. Enter default PIN 1-2-3-4 and press Pair.
5. The phone is now paired and your contacts will be synchronized.

NOTE: See your phone’s owner manual for specific BLUETOOTH® activation instructions.
Voice Recognition*: concert radio

Name Tag Creation

A name tag is required to operate the voice recognition system.

To create a name tag:

1. Press the button.
2. After the beep, say “Store Name”.
3. When prompted say the <name>. A second prompt will ask you to repeat the <name>, (e.g. John Smith).
4. The system will ask for the phone number. Speak the <numbers>, (e.g., 8-0-0, 5-5-5-, 1-2-3-4.)
5. If incorrect, say “Back” to remove the last set of numbers.
6. If correct, say “Store Number”, and the system will confirm that <name> is saved.

NOTE: To confirm or play back the saved voice tags, press the button. After the beep, say “Play Phone Book”.

Call by name

1. Press the button.
2. Say “Select Name”.
3. When prompted, say the <name>.
4. After name confirmation, say “Dial”, and the number will be dialed.

*Available in Coupe models only.

Important Safety Instructions and Warnings which you must read, are listed on the last panel under Voice Recognition.
Audi connect®
Initial Setup

Audi connect® can provide you with Google Earth™, Google Voice™ Local Search, Wi-Fi Hotspot, Online Services (fuel prices, weather information, travel information, news feeds) and myAudi Destinations.

TEXT A5CONNECT to 38981
Do not text and drive. Message and data rates may apply.

Audi connect® Configuration:

1. Ensure SIM card (provided by dealer) is present in the SIM slot.
2. Press the TEL function button.
3. Press the Settings control button.

Vehicle should be stationary with the parking brake engaged while performing this operation.
Wi-Fi Configuration

4. Select Wi-Fi settings.

5. Then select Wi-Fi active and choose Visible.

6. Select a password that is at least eight characters long. The default password can be used. Or a new password can be entered.

NOTE: Most devices use Encryption type WPA2 as the default.

Data Configuration

7. Select Apply settings to save your password.

8. On your device, search for Wi-Fi networks, select SSID and enter your password to establish a connection.

NOTE: You may connect up to eight wireless devices at one time.

9. Press the Back button, scroll to Data connection and select.

10. Select Without request. Press the back button to exit.

Always pay careful attention to the road, and do not drive while distracted. The features and technologies discussed are optional, may require an additional subscription with separate terms and conditions, and should be used only when it is safe and appropriate. The Wi-Fi hotspot feature is intended for passenger use only.

Audi connect® services are only available where there is mobile network coverage. You can obtain more information from your current service provider.

Important Safety Instructions and Warnings which you must read, are listed on the last panel under Audi connect®.
Audi Navigation

Setting a Destination

Your MMI® Navigation system has extraordinary capabilities to enhance your drive with user-definable views, routing selections and more. Get started with setting destinations and discover more as you become familiar with the interface.

To set a destination:

1. Press the NAV function button.
2. Select the Destination control button.
3. Select Address from the Navigation Menu.
4. Select City/Zip code field and enter information.
5. Continue by entering the Street and House number.
6. When complete, select Start route guidance.

Please drive safely. Enter destinations while vehicle is stationary away from traffic. Always pay careful attention to the road, and do not drive while distracted.

TEXT A5NAV7 to 38981
Do not text and drive. Message and data rates may apply.

Important Safety Instructions and Warnings which you must read, are listed on the last panel under Navigation & Infotainment.
To set a Destination with voice commands:

1. Press the Button.
2. Say “Enter Address.” *(Other commands are available on screen.)*

3. After the beep, speak the address; for example “2024 Main St, Los Angeles, California.” (Speak street number as single digits.) The system will respond with repeating the address for confirmation.
4. System will respond, “The list is being loaded,” it will repeat the address, and then ask if you would like to start route guidance; after the beep say, “Yes” and guidance will begin.

NOTE: The MMI® will display the most frequently used voice commands while waiting for your response. When pressing the button, the last navigation announcement will be repeated.

*Available in Coupe models only.

---

Google Voice™ Local Search (Online Destinations)*:

1. Press the button.
2. Say “Online Destinations” followed by a keyword such as “Coffee Shop”, (e.g., bookstore, museum, pizza, etc.)
   The system will respond with “retrieving requested information” and display a list.
3. Make your selection from the list displayed by speaking the line number, (for example 1, 2, 3, or 4). The system will confirm your selection.
4. Say “Start route guidance” to start the navigation to your destination.

*Google Voice™ Local Search requires Audi connect®, and may require an additional subscription with separate terms and conditions. The features and technologies discussed are optional, and should be used only when it is safe and appropriate.
**Automatic Climate Control**

**AUTO Setting**

The **AUTO** setting of your Climate Control System maintains the cabin temperature to your selected temperature by regulating the temperature, fan speed and airflow. Once activated, there is no need to alter the settings. When **AUTO** is selected, **AC** will come on automatically to condition the air.

**NOTE:** AC is used to dehumidify the air.

**Synchronize Zones**

Press and hold the driver’s side temperature control knob to synchronize both sides to the same temperature and airflow.

**Dual Temperature Settings**

Temperature and airflow can be operated independently for each side of the cabin using the temperature control knobs. **AUTO** will maintain separate temperatures for the driver and front passenger.
Automatic Climate Control cont.

Fan Speed
Fan speed is the same for both zones. Fan speed can be adjusted by first pressing the button and then adjusting the fan speed with either the driver or passenger control knob.

Recirculation
The recirculation function prevents outside air and odors from entering the cabin. It may also be used in conjunction with AC to cool the cabin more quickly.

Airflow
The airflow selector directs air to the floor, panel or defrost vents, or a combination.

MMI® Display
Your climate control adjustments such as Temperature, Fan speed and Airflow can be seen on your display for convenience.

NOTE: Temperature display only shown with MMI® Navigation system. The ideal fan speed to heat or cool your interior will be displayed with a on the fan speed level.
Windshield Wipers

Wash
Pull the stalk toward you to spray washer fluid.

Rain Sensing Wipers
To activate rain-sensing wipers:
1. From the “OFF” position, move the wiper stalk up one click.
2. The rain sensor will automatically turn the wipers on when it begins to rain, adjusting wipe frequency with rainfall intensity.
3. The lever on the top of the stalk controls the sensitivity. Move it left for less sensitivity and right for more sensitivity.

NOTE: Turn off the wipers before going through a car wash.

Continuous Wipe
- “LOW”: From the “OFF” position, move the wiper stalk up two clicks.
- “HIGH”: From the “OFF” position, move the wiper stalk up three clicks.

Single/Quick Wipes
- Single/quick wipe: From the “OFF” position, press the wiper stalk down once briefly.

NOTE: For faster wiping, press the wiper stalk down once and hold for two seconds.

Important Safety Instructions and Warnings which you must read, are listed on the last panel under Windshield Wipers.
Cruise Control

Activate

To activate, pull the control stalk toward you.

Set Cruising Speed

At your desired speed, press the SET button at the end of the stalk. The set speed and the illuminated CRUISE icon are shown in the Driver Information Display.

Changing Speed

There are three ways to change your speed:

1. Accelerate or decelerate, then press SET again.

2. To increase/decrease speed in 1 mph increments, tap the stalk up or down.

3. Hold the stalk up or down to increase/decrease speed in 5 mph increments; release when desired speed is reached.

Cancel/Resume

To cancel and resume cruise control:

1. Press the brake pedal or push the stalk slightly away from you.

2. The CRUISE light will go off.

3. To resume, pull the stalk towards you; you will return to your set speed.

Your most recently set speed appears as a small icon in the Driver Information Display. It remains in memory until you turn your Audi off.

Important Safety Instructions and Warnings which you must read, are listed on the last panel under cruise control.
Clock Setting: MMI

To set time with GPS:
1. Press the function button.
2. Press the Time control button.
3. Using the control knob, scroll to Time source.
4. Make sure the Time source is set to GPS.
5. Ensure your time zone is accurate for your location.

To manually adjust the time:
1. Rotate the control knob to Manual and select.
2. Turn the knob until you reach Time; select to activate.
3. Turn the knob to the desired hour and press set.
4. The minute display is now highlighted; repeat the selection process.
5. Save the time by pressing the control knob.

NOTE: Turn on Daylight Savings time to allow the clock to change automatically.

Clock Setting: Audi Concert Radio

To adjust the time:
1. Press the SETUP function button.
2. Press the Time/Date control button to enter the Time Setup menu.
3. Rotate the control knob to time, select to highlight the hour.
4. Turn the knob to the desired hour and press to set.
5. The minute display is now highlighted; repeat the selection process.
6. Save the time by pressing the control knob.

Vehicle should be stationary with the parking brake engaged before performing these operations.
Brakes
*S5® only*

Brake Noise

The majority of today’s vehicles use semi-metallic brake pads, which offer excellent performance. Because of the metal-to-metal contact involving semi-metallic pads, the sounds generated by the brake system under normal operation can be greater than the sounds produced by vehicles equipped with previous-generation brake pads. Depending on the local environment, weather conditions and individual driving patterns, sounds from the braking system may be more or less apparent.

Frequent, aggressive brake application increases the wear of brake components and can reduce the potential for brake noise. Frequent, light brake application allows glazing to develop on the brake surface, which increases the potential for brake noise.

Brake Dust

Brake dust is a result of friction created by brake pads and discs during braking. As brake pads and discs make contact during braking, they wear down, which causes dust particles to be expelled. This is a normal characteristic of all brake systems and is not an indicator of a defect.

⚠️ Important Safety Instructions and Warnings which you must read, are listed on the last panel under Brakes.
Importat Safety Instructions and Warnings

Audi connect®

- Only use Audi connect® services when road and traffic conditions permit. Using these services could increase the risk of an accident. Some Audi connect® services are only available when the vehicle is stationary to reduce the risk of distracting the driver.
- To reduce the risk of a collision, use the Audi connect® services with a Wi-Fi hotspot in the rear seat only if the vehicle is in motion or only when the vehicle is stationary.
- As the driver, do not allow usage of the Wi-Fi hotspots to distract you from driving, as it could increase the risk of an accident.
- It is only safe to use laptops and similar mobile devices when the vehicle is stationary because, like all loose objects, they could be thrown around the inside of the vehicle in a crash and cause serious injuries. Store these types of devices securely while driving.
- Do not use any Wi-Fi devices in the front seats within range of the airbags. Read and follow the safety precautions in the separate vehicle owner’s manual in the “Airbag System” chapter under “Important information about the front airbag system”.

Automatic Climate Control

- Reduced visibility is dangerous and can cause accidents.
- For safe driving it is very important that all windows be free of ice, snow and condensation.
- Completely familiarize yourself with the proper use and function of the heating and ventilation system and especially how to defog and defrost the windows.
- Never use the windshield wiper/washer system in freezing weather until you have warmed the windshield first, using the heating and ventilation system. The washer solution may freeze on the windshield and reduce visibility.
- Do not use the recirculation for extended periods of time. The windows could fog up since no fresh air can enter the windshield or on or near the area on the steering wheel marked “AIRBAG,” the instrument panel, the seat backrests or the areas between these points and the driver/passengers. Mobile phones can lead to serious injuries in cases of collisions, especially when the airbags are inflated.
- Always switch off your mobile telephone at gas stations or wherever there is a fire or explosion hazard. Electromagnetic radiation can cause sparks which can start fires.
- The mobile phone will automatically connect to the mobile network when the Bluetooth connection to the mobile phone package is disconnected.
- Using a radio device in the vehicle without a connection to an external antenna might exceed electromagnetic radiation thresholds. This also applies if the external antenna is not installed properly.
- Keep a distance of at least eight inches between the antennas of the mobile phone and a pacemaker, since mobile phones can affect the functionality of a pacemaker.
- Do not carry a mobile phone on standby mode in the breast pocket directly on top of a pacemaker.
- If interference is suspected, immediately switch off the mobile phone.
- Always keep the armrest closed while driving. The center armrest can interfere with the driver’s elbow movement and thus cause collisions and severe injuries.

Brakes

- Do not press the accelerator pedal inadvertently if the vehicle is stationary and the engine is running and a gear is selected. Otherwise the vehicle will start to move immediately and could result in a crash.
- New brake pads don’t have the best stopping power and must be “broken-in” during the initial 100 to 150 miles (150 to 200 kilometers) of normal city driving. You can compensate for this by pressing the brake pedal more firmly. This also applies later when new pads are installed.
- You should perform braking maneuvers for the purpose of cleaning the brake system only if road conditions permit.
- Other road users must not be put at risk - you may cause an accident!
- Before descending a steep grade, reduce speed and shift transmission into a lower gear or lower driving range. Do not ride the brakes or hold the pedal down too long or too often. This could cause the brakes to get hot and diminish braking efficiency.
- Do not “ride the brakes” by resting your foot on the pedal when you do not intend to brake. This may cause the brakes to overheat, premature wear and increased stopping distance.
- Under certain climatic and operating conditions such as passing through water, driving in heavy rain or after washing the vehicle, the effectiveness of the brakes can be reduced. In winter, ice can accumulate on the brake pads, linings, discs and drums. Carefully apply brakes for a test. Brakes will dry and ice coatings will be cleaned off after a few careful brake applications.
- Driving for an extended period of time on salt covered roads without using your brakes can also affect braking efficiency. Clean off accumulated salt coating from brake discs and pads with a few careful brake applications.
- If you damage the front spoiler, or if you install a different spoiler, be sure the airflow to the front brakes is not obstructed. Otherwise the brake system could overheat and possibly in tunnels, garages and subways, phone conversations may be interrupted, and it may be impossible to make phone calls, even emergency calls!
- In some countries, emergency calls may only be supported when the mobile phone is connected to a mobile phone package which has a SIM card that is “not blocked” and/or has sufficient credit on it.
- Unmounted or improperly mounted mobile phones can fly around in the event of a sudden driving or braking maneuver or a collision. This may cause injury.
- Never place or mount a mobile phone on doors, on the windshield or on or near the area on the steering wheel marked “AIRBAG,” the instrument panel, the seat backrests or the areas between these points and the driver/passengers. Mobile phones can lead to serious injuries in cases of collisions, especially when the airbags are inflated.
- Always switch off your mobile telephone at gas stations or wherever there is a fire or explosion hazard. Electromagnetic radiation can cause sparks which can start fires.
- The mobile phone will automatically connect to the mobile network when the Bluetooth connection to the mobile phone package is disconnected.
- Using a radio device in the vehicle without a connection to an external antenna might exceed electromagnetic radiation thresholds. This also applies if the external antenna is not installed properly.
- Keep a distance of at least eight inches between the antennas of the mobile phone and a pacemaker, since mobile phones can affect the functionality of a pacemaker.
- Do not carry a mobile phone on standby mode in the breast pocket directly on top of a pacemaker.
- If interference is suspected, immediately switch off the mobile phone.
- Always keep the armrest closed while driving. The center armrest can interfere with the driver’s elbow movement and thus cause collisions and severe injuries.

Cruise Control

- Always pay attention to the traffic around you when the cruise control is in operation. You are always responsible for your speed and the distance between your vehicle and other vehicles.
- For reasons of safety, cruise control should not be used in the city, in stop-and-go traffic, on twisting roads and when road conditions are poor (such as ice, fog, gravel, heavy rain and hydroplaning) - risk of accident.
- Turn off the cruise control temporarily when entering turn lanes, highway exit lanes or in construction zones.
- Please note that inadvertently “resting” your foot on the accelerator pedal causes the cruise control not to brake. This is because the cruise control is overridden by the driver’s acceleration.
• If a brake system malfunction such as overheating occurs when the cruise control system is switched on, the braking function in the system may be switched off. The other cruise control functions remain active as long as the indicator light is on.
• You should only return to the saved speed if it is not too fast for the current traffic conditions - risk of an accident!

Navigation & Infotainment
• The demands of traffic require your full attention.
• Obey all traffic laws when driving.
• The route calculated by the navigation system is a recommendation for reaching your destination. Obey traffic lights, stopping restrictions, one-way streets, lane change restrictions, etc.

Voice Recognition
• Driving requires your complete and undivided attention. As the driver, you have complete responsibility for safety in traffic. Only use the MMI® system when traffic conditions permit and always in a way that allows you to maintain complete control over your vehicle.
• Adjust the volume of the audio system so signals from outside the vehicle such as police and fire sirens can be heard easily at all times.
• Always follow the safety precautions when using the Audi connect® services when using the wireless hotspot.
• Obey all applicable laws regarding use of telephones in vehicles.
• Medical experts warn that cell phones can interfere with the function of pacemakers. Always maintain a minimum distance of 20 centimeters between the cell phone antenna and the pacemaker.
• Do not carry the cell phone in a pocket directly over the pacemaker when the phone is switched on.
• Switch the cell phone off immediately if you suspect it may be interfering with the pacemaker.
• Do not use voice recognition system in emergencies because your voice may change in stressful situations. It may take longer to dial the number or the system may not be able to dial it at all. Dial the emergency number manually.
• Switch your cell phone off in areas at risk for an explosion. These locations are not always clearly marked. They may include gas stations, equipment that stores or transports fuel or chemicals, or locations where fuel vapors (such as propane or gasoline vapor in vehicles or buildings), chemicals or large quantities of dust particles (such as flour, sawdust or metal) may be present in the air. This also applies to all other locations where you would normally switch your vehicle off.
• Pay attention to the traffic reports when making a call.

Windshield Wipers
• Wiper blades are crucial for safe driving! Only when they are in good condition are they able to clear the windows properly to provide uncompromised visibility. Worn or damaged wiper blades are a safety hazard.
• The rain sensor is only designed to assist and support the driver. It remains entirely the driver’s responsibility to monitor outside weather conditions and to manually activate the wipers as soon as rain or drizzle reduces visibility through the windshield.
• Dirty windshield wiper blades can impair your view. This can lead to accidents.
• For your safety, you should replace the wiper blades once or twice a year. See your authorized Audi dealer for replacement blades.
