1. Start Engine Stop (with Convenience Key)
   With the key fob in the vehicle, pressing this button starts the engine and shuts the engine off when the vehicle is in Park.

2. MMI® Controls
   MMI controls consist of a control knob with joystick, control buttons and function buttons. Turn the control knob to the left or right and press it to select a menu in the MMI.

3. Navigation
   Get started with setting destinations and discover more as you become familiar with the interface.

4. Electromechanical Parking Brake
   Pull the switch up to engage the parking brake. To disengage, place your foot on the brake and push down on the switch.

5. Climate Control
   Set preferences for temperature, airflow distribution and recirculation. Use in AUTO or Manual mode.

6. Voice Recognition
   Press the TALK button on the steering wheel to activate Voice Recognition in the MMI. To disengage, place your foot on the brake and push down on the switch.

7. USB Ports
   Two USB Ports - one located underneath center armrest and another in center console, allow for connections to the MMI and Audi smartphone interface and allows for device charging.

8. Media
   Select the MEDIA function to access available media from connected sources (e.g., Bluetooth audio, USB, and more).

9. Steering Wheel Controls
   Assist with navigating through a variety of vehicle functions. To select a menu item, press the thumbwheel.

10. Instrument Cluster/Audi Virtual Cockpit
    Displays vehicle system and function information. Menu selections can be accessed using either the MMI control knob or the multi-function steering wheel controls.

11. Cruise Control
    The switch allows you to set a preferred speed to be maintained above 15 mph. (Optional Adaptive Cruise Control allows a speed to be set and maintained between 20 - 95 mph.)

Center Console

The Audi Multi Media Interface (MMI) can be controlled from the center console as well as the steering wheel controls. There are input redundancies to allow you to access MMI functions in the way that best suits you.

1. MMI Control Knob/Touchpad
   The rotary pushbutton/touchpad allows you to browse menus and zoom in and out of map views by rotating the knob, and select items by pressing the knob. Enter alphanumerical information by writing with your finger on the touchpad. The MMI will display your entry.
   - To enter a space, swipe left-to-right. To delete a character, swipe right-to-left.
   - The knob can also be shifted in four directions:
     Up: Opens the speller to enter alphanumerical information (e.g., Navigation address).
     Down: Moves down through a menu.
     Left/Right: Opens Selection and option menu, same as control buttons.

2. Control Buttons
   - Left: The left control button opens the Selection menu to call up further functions for individual menu items (e.g., RADIO).
   - Right: The right control button opens the Options menu to select and confirm specific functions for individual menu items.

3. NAV/MAP TEL Function Switch
   NAV/MAP: Toggle up repeatedly on the NAV/MAP to switch the display between Navigation input mode and Map mode.
   TEL: Toggle down to enter the Telephone menu to access the Contact directory.

4. MENU Button
   Opens the selection menu in a given function (e.g., RADIO, TEL, NAV, etc.).

5. RADIO/MEDIA Function Switch
   RADIO: The RADIO menu allows you to select or manage radio options, including presets and equalization. Toggle up repeatedly to move through radio bands (AM, FM, SAT).
   MEDIA: Allows you to select auxiliary devices and manage music and video content in folders, playlists and tracks. Toggle down repeatedly to move through the available Media sources (Bluetooth, SD, DVD, etc.).

6. BACK Button
   Moves back through the menu hierarchy in reverse order of your recent selections. When entering text, pressing BACK will delete a character. Pressing and holding will remove all characters on a line.

7. Infotainment System
   Turns the MMI Infotainment system on/off and controls volume. Tilting the knob to the right or left will move through tracks or preset radio stations. Pressing briefly mutes audio. Press and hold to turn system off.

Important Safety Instructions and Warnings: MMI Controls
- Only use the infotainment system when traffic conditions permit and always in a way that allows you to maintain complete control over your vehicle.
- Adjust the volume of the audio system so that signals from outside the vehicle, such as police and fire sirens, can be heard easily at all times.
Cruise Control

Activate

To activate, pull the control stalk toward you to put it in the ON position.

Set Cruising Speed

At your desired speed, press the SET button at the end of the stalk. The set speed, along with CRUISE, is shown in the instrument cluster or Audi Virtual Cockpit.

Changing Speed

There are several ways to change your speed:

- Accelerate or decelerate, then press the SET button again.
- Push the stalk up or down one detent to increase/decrease speed in 1 mph increments.
- Push the stalk up or down to the second detent and release to increase/decrease speed in 5 mph increments.
- Hold the stalk up or down to increase/decrease speed; release when desired speed is reached.

Adaptive Cruise Control*

Adaptive Cruise Control (ACC) helps you maintain a safe distance between you and vehicles in front of you, eliminating the need to reset your Cruise Control after braking.

When you approach a slower-moving vehicle in front of you, ACC will automatically slow down to that vehicle's speed and maintain a safe distance.

When the vehicle is no longer present, ACC will accelerate back to the stored speed.

There are four preset distance settings that can be adjusted using the distance switch on top of the stalk. The default is distance 3 and will reset to that time each you turn on the ignition.

*Adaptive Cruise Control: Optional feature available.

Important Safety Instructions and Warnings: Cruise Control & Adaptive Cruise Control

- Always pay attention to the traffic around you when the Cruise Control system is operation. You are always responsible for your speed and the distance between your vehicle and other vehicles.
- Always keep a safe distance between your vehicle and other vehicles.
- When a vehicle in front of you is accelerating, the ACC system will adjust your speed to maintain a safe distance.
- Please note that unaccustomed “heating” of your foot on the accelerator pedal prevents the Cruise Control from braking.

Cancel/Resume

1. To cancel, press the brake pedal or push the stalk slightly away from you to the CANCEL position.
2. The CRUISE light will go off.
3. To resume, pull the stalk toward you; you will return to your set speed.

Your must recently set speed remains in memory until you turn Cruise Control or your Audi off.

Bluetooth® & Voice Recognition
Setting a Destination
Your MMI Navigation system has extraordinary capabilities to enhance your drive with user-definable views, routing selections, and more. Get started with setting destinations and discover more as you become familiar with the interface.

1. Toggle the NAV/MAP switch to open the Destination entry input screen.
2. Use the touchpad to write the address or Point Of Interest name, or shift the control knob forward to open the spinner and enter information manually selecting letters and numbers. Press the BACK button to return to writing mode.
3. Available addresses will appear as information is entered, filtering to show only addresses meeting the currently entered information.
4. Select appropriate address, then select Start route guidance.
   - Additional destination features can be seen by pressing the left control button.
   - To cancel route guidance, select the right control button and select Cancel route guidance from menu.

Alternative Routes
The Navigation system can display additional, alternative routes based on speed, economy and traffic congestion. When this feature is enabled, alternative routes will always be displayed when route guidance is active.

To enable Alternative routes:
- Select the NAV/Map function.
- Press the right control button and choose Navigation settings.
- Select Show alternative routes to place a check mark in the box to enable this feature.

To select Alternative routes while route guidance is active:
- Press the right control button to choose Show alternative routes.
- If available, up to three route suggestions will be displayed and can be selected via the control knob (Route type: fast [1], economic route [2].

Additional Settings
Additional settings can be configured within the Options menu using the right control button.
- Map settings include display settings to change between Standard and Google Earth view as well as 2D and 3D modes.
- Route criteria allows you to set the mode of travel to include or avoid roads such as HOV lanes, toll roads and more.
- Voice guidance allows you to configure responses from Complete to Shortened, along with voice guidance volume.

Note:
Always pay careful attention to the road, and do not drive while distracted. Enter destinations while vehicle is stationary away from traffic. When pressing the BACK button, the last navigation announcement will be repeated.

Important Safety Instructions and Warnings: Navigation
- The forwards of traffic require your full attention.
- Obey all traffic laws when driving.
- The route calculated by the navigation system is a recommendation for reaching your destination.

Navigation
Climate Control
Audi smartphone interface
Bluetooth® & Voice Recognition
3-Zone Climate Control

Press any button or turn the temperature dial to activate the system.

1. AUTO
   Your Climate Control system will help the cabin maintain your selected temperature by regulating the temperature, fan speed and airflow.
   - When AUTO is selected, A/C will come on automatically to condition and dehumidify the cabin’s interior.

2. HI/LO
   When HI or LO are selected as the desired temperature, the system will run continuously, heating or cooling with the fan at high speed when in AUTO mode.

3. Heated Seats
   To warm up more quickly on a cool morning, turn on your heated seats.

4. Air Distribution
   Direct airflow to defrost, panel and floor vents or a combination by selecting the appropriate airflow button or buttons.

5. Recirculation
   The recirculation function helps prevent outside air and odors from entering the cabin. It may also be used in conjunction with A/C to cool the cabin more quickly. Do not leave the system in recirculation mode for extended driving.

6. Turning the Climate Control System Off
   Pressing the FAN button turns the system off.

7. Vent Flow
   - Adjust the airflow amount, turn the ridged outer adjustment ring.
   - Stop the airflow, turn the adjusting ring all the way to the right.
   - Adjust the airflow direction, turn the air vent grille insert.

Cabriolet:
Top Open/Closed Climate Settings
When you turn the Climate Control system on, it automatically detects whether the top is open or closed. It will then revert to the last saved setting in that position.

Important Safety Instructions and Warnings: Climate Control
- Poor visibility can lead to accidents.
- For safety reasons, keep all windows free of ice, snow, and fog.
- Become familiar as quickly as possible with the correct use and function of the Climate Control system, especially with the defrosting and dehumidifying function.
- If the temperature is below freezing, only use the windshield washer system after the windshield has been warmed by the Climate Control system.
- The washer fluid could freeze on the windshield and impair visibility.
- You should not use the recirculation mode for an extended period since no fresh air is drawn in. With the air conditioning switched off, the windows can fog up, which increases the risk of an accident.
- Individuals with reduced sensitivity to heat or temperature could develop burns when using the seat heating function. To reduce the risk of injury, these individuals should not use seat heating.

Climate Control
Audi smartphone interface
Bluetooth® & Voice Recognition
Connecting
You can connect your Apple® iPhone or Android™ phone to the MMI. Certain content on your phone will be adapted to the Infotainment system display while driving and can be operated through the MMI controls*. This gives you the benefit of the familiarity with your phone's system combined with the MMI display.
To connect:
1. The vehicle must be stationary with the ignition on.
2. Connect your smartphone with a manufacturer approved cable to either the USB or auxiliary port on your vehicle. Before installing Android Auto™, you must download the Android Auto app from the Google Play™ Store. You must have an active Google account and internet connection.
3. You will see a connection prompt in the MMI.
4. Using the control knob, select to activate the device.
5. Respond to prompts as necessary from both the MMI, as well as the smartphone.
Once connected, you have access to the apps displayed on the screen. Select the apps using the MMI control knob.

*Not all apps will work with the Audi smartphone interface, and some functions may be limited. The functions that can be used depend on the operating system version and the software of the app being used. Some MMI functions may not be available when Apple CarPlay® or Android Auto® is active. Refer to apple.com/cn/usecarplay or android.com/outline for additional information.

Apple CarPlay® Operation
- If a Bluetooth connection is active when CarPlay® is activated, it will disconnect Bluetooth and use CarPlay exclusively for telephone connectivity.
- MMI control knob
  - Turn the knob and press to open selected apps and control functions within that app.
  - Shift the knob downward or up to change levels to access apps more quickly. Shift the control knob to the right to advance to the next screen.
- Press and hold the BACK button to return to the active app menu.

Android Auto® Operation
- If you have not previously paired your phone with Bluetooth, it will be paired automatically with the MMI system**.
- MMI control knob
  - Shifting the knob downward will change usage from within an open app to allowing you to select another app.
  - Shifting the knob upward will change usage from an open app to allowing you to select another app.
  - Shifting the knob to the right within an active app will open additional features or settings. For example, shifting to the right will activate Talk to Google.
**The Android phone may prompt to acknowledge additional requests.

Returning to Apple CarPlay® or Android Auto®
If you select another MMI function and wish to access either CarPlay or Android Auto again:
- Select the MENU function button.
- Scroll using the MMI control knob to select Apple CarPlay or Android Auto from the menu.

Access the Connection Manager
Allows you to manage your device settings (use device with MMI media or Apple CarPlay/Android Auto) within the MMI for Audi smartphone interface.
- In the MMI system when traffic conditions permit and in a way that allows you to maintain complete control over your vehicle and its passengers.
- Always make sure that you follow the instructions and heed the WARNINGS in this Manual. It is your interest and the interest of your passengers that this is possible.
- Always keep all the complete owner’s literature in your vehicle when you lend or sell your vehicle so that the important information will always be available to the owner and passengers.
- Always keep the owner’s literature handy so that you can find it easily if you have questions. Driving requires your complete and undivided attention. As the driver, you have complete responsibility for safety in traffic. Never operate mobile devices while driving, because this increases the risk of an accident.

Note:
Pairing a Compatible Device

Bluetooth pairing is a one-time procedure. Once paired, your phone will automatically connect when you start your vehicle*. Your contact list will automatically synchronize, allowing you to access contacts and make and receive calls through the infotainment system. For information regarding phone compatibility, visit audisusa.com/bluetooth.

1. Switch ignition to Accessories mode.
2. Activate your phone’s Bluetooth and set to pairing or discovery mode.
3. In the list of available devices, select the Audi MMi listing for the vehicle.
4. When the prompt appears in the MMi, select Accept using the control knob.
5. Confirm the PIN matches and select Yes in response to the prompt.
6. Select Pair on your device.

*Some phases may require an additional response to prompts to allow full connectivity.

Two active phones can be connected simultaneously to receive calls through the MMi; grant your primary and secondary devices. To change the order of devices:

1. Select the TEL function.
2. Press the right control button.
3. Select Switch Main and Additional phone.
4. This will also make the contact list from the new primary phone active.

If the primary phone is in use, the secondary phone will only receive calls from the phone, not the MMi system.

Note:
Bluetooth® Pairing
Apple products connected via the USB cable will disable Bluetooth audio. To reestablish Bluetooth audio, disconnect the USB cable and select the device from the Media/Source menu. Bluetooth® pairing requires compatible devices. See your phone’s Owner’s Manual for specifics. Bluetooth® compatibility varies between Apple and other devices. The apple icon symbol appears in the MMi® screen along with network strength bars, and it will be displayed whenever a paired phone is connected to the Infotainment system.

Important Safety Instructions and Warnings: Bluetooth® Pairing & Voice-Recognition

• Only use the Infotainment system when conditions permit and always in a way that allows you to maintain complete control over your vehicle.

• Remember that cell phones can interfere with the function of parameters. Always maintain a minimum distance of 20 centimeters between the cell phone antennas and the parameter.

• Do not use the voice recognition system in emergencies because your voice may change or distort in stressful situations. It may take longer to dial the number or the system may not be able to dial at all. Dial the emergency number manually.

• Switch your cell phone off in areas where there is a risk of explosion. These locations are not always clearly marked. This may include gas stations, fuel and chemical storage facilities or transport vehicles, or locations where flammable gases such as propane or gasoline vapor in vehicles or buildings. In these areas, large quantities of solid or liquid flammable materials, seed oil, sandblasting or metal may be present in the air. This also applies to other dangerous substances, where flammable gases may be present in the air.

• The demands of traffic require your full attention.

• Because your phone works with real-time information, your position cannot be guaranteed under all circumstances. Do not rely on only your phone when it comes to essential communication (such as a medical emergency).

• Always follow the instructions given by the emergency personnel during an emergency call; and only ask the caller to do so.
