Setting a Destination

Your MMI Navigation system has extraordinary capabilities to enhance your drive with user-definable views, routing selections and more. Get started with setting destinations and discover more as you become familiar with the interface.

1. Press the NAV function button.
2. Select the Destination control button.
3. Many methods of entering information for Navigation can be selected from this menu. One method is to select Free search from the Navigation menu.
4. Using the MMI touch control pad, enter the address information, starting with street number and address. Address information will populate as you enter the address. When the address is displayed, use the control knob to select.
5. When completed, select Start route guidance.

Alternative Routes

- After entering an address and before starting Route guidance, select Display alternative routes.
- Or while there is an active route, press the Route button and select Display alternative routes.
- If available, up to three route suggestions will be displayed and can be selected using the control knob. (Route type: 1 fast, 2 fast alternative, 3 economic route.)

Note:
Always pay careful attention to the road and do not drive while distracted. Enter destinations while vehicle is stationary away from traffic. When pressing the NAV button, the last navigation announcement will be repeated.

Important Safety Instructions and Warnings: Navigation
- The demands of traffic require your full attention.
- Obey all traffic laws when driving.
- The route calculated by the navigation system is a recommendation for reaching your destination. Obey traffic lights, stop signs, one-way streets, lane change restrictions, etc.

Start-Stop System

Climate Control

Cruise Control

Audi smartphone interface

Bluetooth® & Voice Recognition
Operation
The Start-Stop System shuts off the engine when you stop at traffic signals or during certain stop-and-go driving conditions to save fuel. When conditions are met and the engine shuts off, the Start-Stop System light appears in the Driver Information System in the instrument cluster. Releasing the brake pedal instantly restarts the engine and makes power available before your foot even reaches the accelerator.

For the A6 3.0L TFSI models, the Start-Stop function engages to turn off the engine at speeds below approximately 2 mph in situations where the vehicle senses you are coming to a complete stop. This helps achieve improved fuel economy, while making the stop engagement of the engine more seamless. For the 2.0L TFSI A6 models, as well as the S6, the engine stop function is not engaged until a full stop has been achieved.

Start-Stop ON or OFF?
If you wish to turn off the Start-Stop System, simply press the ON/OFF button located below the MMI display. The button will illuminate to tell you the Start-Stop is deactivated. When the system is deactivated, the engine will continue to run when the vehicle is stopped at traffic signals or during stop-and-go driving; therefore, you will not receive the potential fuel savings or CO₂ reduction benefit.

Important Safety Instructions and Warnings: Start-Stop System
- Always switch the Start/Stop system off when driving through water.
- To reduce the risk of polycarbon, never allow the engine to run in constant spaces.

Climate Control

4-Zone Climate Control

1. AUTO Setting
   The AUTO setting of your Climate Control system will help the cabin maintain your selected temperature by regulating the temperature, fan speed and airflow. Once activated, there is no need to alter the settings. When AUTO is selected, A/C will come on automatically to condition and dehumidify the air.

Dual Temperature Settings
Temperature and airflow can be operated independently for each side of the cabin using the control knobs. AUTO will maintain separate temperatures for the driver and front passenger.

2. Synchronize Zones
   Pressing the SYNC button will synchronize the driver and passenger side controls along with the rear settings to the same temperature, fan speed and airflow. The synchronization disengages once a passenger adjusts their temperature setting.

3. Heated Seats
   To warm up more quickly on a cool morning, turn on your heated seats.

4. Fan Speed
   Fan speed can be operated independently. To change the speed, press the FAN button followed by turning either the driver or passenger control knob.

5. Recirculation
   The recirculation function helps prevent outside air and odors from entering the cabin. It may also be used in conjunction with A/C to cool the cabin more quickly.

6. Airflow
   The airflow selector directs air to the floor, panel or defrost vents, or a combination. Pressing multiple times will toggle between different airflow settings.

Important Safety Instructions and Warnings: Climate Control
- Poor visibility can lead to accidents.
- For safer driving, keep all windows free of ice, snow and fog.
- Become familiar, as quickly as possible, with the correct use and function of the Climate Control system, especially with the defrosting and dehumidifying functions.
- When the temperature is below freezing, only use the windshield washer system after the windshield has been warmed by the Climate Control system. Failure to do so may result in the windshield and impair visibility.
- You should not use the recirculation mode for an extended period of time since no fresh air is drawn in. With the air-conditioning switched off, the ventilation can fog up and increase the risk of accidents.
- Individuals with reduced sensitivity to pain or temperature could develop burns when using the seat heating function. To reduce the risk of injury, these individuals should not use seat heating.

Climate Control

Cruise Control

Audi smartphone interface

Bluetooth® & Voice Recognition
Activate
To activate, pull the control stalk toward you to put it in the ON position.

Set Cruising Speed
At your desired speed, press the SET button at the end of the stalk. The set speed and selected CRUSE icon are shown in the Driver Information Display.

Changing Speed
There are three ways to change your speed:
- Accelerate or decelerate, then press the SET button again.
- Push the stalk up or down one detent to increase/decrease speed in 1 mph increments.
- If you hold the lever up or down, speed will increase/decrease 1 mph.
- Push the stalk up or down to the second detent and release to increase/decrease speed in 5 mph increments.

Cancel/Resume
1. To cancel, press the brake pedal or push the stalk slightly away from you to the CANCEL position.
2. The CRUSE light will go off.
3. To resume, pull the stalk toward you; you will return to your set speed.

Adaptive Cruise Control
Adaptive Cruise Control (ACC) helps maintain a safe distance between you and vehicles in front of you, eliminating the need to reset your Cruise Control after braking. When you approach a slower-moving vehicle in front of you, ACC will automatically slow down to that vehicle’s speed and maintain a safe distance. When the vehicle is no longer present, ACC will accelerate back to the stored speed.

There are four preset distance settings that can be adjusted using the distance switch on top of the stalk. The default is distance 3 and will reset to that time you turn on the ignition.

Changing Speed with Adaptive Cruise Control Active:
- Push the stalk up or down one detent to increase/decrease speed in 2.5 mph increments.

Important Safety Instructions and Warnings: Adaptive Cruise Control:
- Always pay attention to traffic when Adaptive Cruise Control (ACC) is switched on and braking guard is active. As the driver, you are still responsible for operating the vehicle at all times.
- Always remain attentive when braking guard is used to assist you. The driver must always take action to avoid a collision. The driver is always responsible for braking when the vehicle is moving.
- Always pay attention to traffic when Adaptive Cruise Control (ACC) is switched on. In urban areas, this may be less effective, especially during braking or when following vehicles are breaking.
- Always pay attention to the traffic around you when Adaptive Cruise Control is in operation. You are always responsible for your speed and the distance between you and the vehicle in front.
- Always ensure that your vehicle is suitable for the vehicle in front. If you are unable to follow the vehicle in front, such as in heavy traffic or in construction zones, the system may not function as intended.
- Always pay attention to traffic when Adaptive Cruise Control (ACC) is switched on. In urban areas, this may be less effective, especially during braking or when following vehicles are breaking.
- Always ensure that you are always able to stop your vehicle safely. The ACC cannot slow or brake the vehicle safely when you follow another vehicle too closely. Always remember that the automatic braking function cannot bring the vehicle to a sudden or emergency stop in these conditions.
- To prevent unintended operation, always switch ACC off when it is not being used. If you press the SET button when driving at speeds below 20 mph (30 km/h), the vehicle accelerates automatically up to 29 mph (48 km/h), which is the minimum speed that can be set.
- It is dangerous to activate Cruise Control and resume the stored speed when the current road, traffic or weather conditions do not permit this. This increases the risk of an accident.
- Following other vehicles too closely increases the risk of collisions and serious personal injury.
- Set your cruise speed allowance to a value that is comfortable and safe for you.
- The cruise guard is an optional feature and cannot stop your vehicle safely. It cannot slow or brake the vehicle safely when you follow another vehicle too closely. Always remember that the automatic braking function cannot bring the vehicle to a sudden or emergency stop in these conditions.
- To prevent unintended operation, always switch ACC off when it is not being used. If you press the SET button when driving at speeds below 20 mph (30 km/h), the vehicle accelerates automatically up to 29 mph (48 km/h), which is the minimum speed that can be set.
- It is dangerous to activate Cruise Control and resume the stored speed when the current road, traffic or weather conditions do not permit this. This increases the risk of an accident.
- Follow other vehicles too closely increases the risk of collisions and serious personal injury.
- Always ensure that you are always able to stop your vehicle safely. The ACC cannot slow or brake the vehicle safely when you follow another vehicle too closely. Always remember that the automatic braking function cannot bring the vehicle to a sudden or emergency stop in these conditions.
- To prevent unintended operation, always switch ACC off when it is not being used. If you press the SET button when driving at speeds below 20 mph (30 km/h), the vehicle accelerates automatically up to 29 mph (48 km/h), which is the minimum speed that can be set.
- It is dangerous to activate Cruise Control and resume the stored speed when the current road, traffic or weather conditions do not permit this. This increases the risk of an accident.
- Following other vehicles too closely increases the risk of collisions and serious personal injury.
- Always ensure that you are always able to stop your vehicle safely. The ACC cannot slow or brake the vehicle safely when you follow another vehicle too closely. Always remember that the automatic braking function cannot bring the vehicle to a sudden or emergency stop in these conditions.
Connecting

You can connect your Apple® iPhone or Android™ phone to the MMI. Certain content on your phone will be adapted to the infotainment system display and can be operated through the MMI controls. This gives you the benefit of the familiarity with your phone’s system combined with the MMI display along with the ease of your phone’s voice recognition system.

To Connect:

1. Ensure your phone has the most current operating system.
2. The vehicle must be stationary with the ignition on.
3. Connect your smartphone with a manufacturer-approved cable to either USB port.*
4. For Android Auto, start the Android Auto app on your phone. You must have an active Google account and Internet connection.
5. On initial connection, you will see a prompt in the MMI. Using the control knob, select to activate the device and agree to the data transfer.
6. Respond to prompts as necessary from both the MMI as well as the smartphone.

With Apple CarPlay® and Android Auto™ You Can:

- Use the digital assistant, “Siri” Voice Control or “Talk to Google”.
- Make and receive calls.
- Send and receive text messages.
- Set reminders.
- Get turn-by-turn navigation.
- See recent places.
- Listen to music apps.

After the initial connection of a phone with CarPlay or Android Auto, it will automatically deactivate CarPlay or Android Auto the next time it is connected, unless you have deactivated the function before disconnecting the cable.

Apple CarPlay™/Android Auto™ Operation

Both systems use similar controls to operate their respective functions. Common controls include the control knob to choose on-screen options, move through menus or select items. While Apple CarPlay is activated, all Bluetooth capability** is disabled.

Using CarPlay:

- Use the control knob to move and select apps, press to open.
  - You can also use the left/right, up/down arrows on the touchpad to move to a different screen/menu.
  - Use the touchpad arrows to jump levels in a menu list.
  - Press the BACK button to return to the menu of the active app.
  - A long press of the TALK button activates Siri Voice Control.
  - Enter navigation information using Siri Voice Control.

Using Android Auto:

- Use the down touchpad arrow to access the menu bar and select apps.
- Use the touchpad arrows or upper left/right control buttons to move to a different level/menu.
- Use your finger on the touchpad to move the view within a map.
- Where applicable, touch the down touchpad arrow to enter the speller mode.
- Use your finger on the touchpad to enter text or numerals instead of the speller.
- A long press of the TALK button or upper right control button activates Talk to Google.

Deactivating and Reactivating CarPlay or Android Auto

While in CarPlay or Android Auto, you may access certain MMI functions such as Navigation by pressing the respective function button. CarPlay or Android Auto remains connected in the background. CarPlay and Android Auto can be deactivated, allowing you to simply charge your phone, prevent automatic connection or access full MMI functionality.

To Reactivate:

1. Select the Menu function \Setup\ Deactivate CarPlay or Deactivate Android Auto.
2. Return to the main MENU or press any function button.

To Reactivate and Enable Automatic Reconnection, Follow These Steps:

1. From the MENU screen, select Audi smartphone interface.
2. If the screen shows no device connected, select Switch to device list.
3. Choose your device.
4. Select Activate CarPlay or Activate Android Auto.
5. Scroll to Audi smartphone interface and ensure there is a check in the box for your device.

*Non-certified cables may not support transfer or maintain a reliable connection.
**For Android Auto, only use Oxford-issued or your phone’s browser to see if it’s compatible. Not all apps work with the Audi smartphone interface, and some functions may be limited. Available functions depend on the operating system version and the capabilities of the app. CarPlay requires iOS 5 or newer.
***Deactivation may not be available when Apple Carplay or Android Auto is active. Refer to www.apple.com/carplay or www.android.com/autotips for additional information.
****Deactivating your car will not maintain or establish a Bluetooth connection to the connected device.

Note:
Audi smartphone interface requires compatible device, operating system and mobile app. Standard text and data rates apply. See mobile app provider for rates and pricing. Apple CarPlay is a trademark of Apple. Siri must be enabled on device to activate Siri features.

All trademarks and service marks are owned by their respective owners. Audi smartphone interface.
- Only use if it’s touchpad to move in screens and menus. For audio devices, you can also use it to enter alphanumeric, letters.

Audi smartphone interface
Initial Setup
Bluetooth pairing is a one-time procedure. Once paired via Bluetooth, your phone will automatically connect when you start your vehicle* and your phone’s contacts automatically synchronize, allowing you to retrieve contacts and make and receive calls through the infotainment system. For more information regarding phone compatibility visit audisша.com/bluetooth.

1. Switch ignition to Accessories mode.
2. Enable the Bluetooth in your phone’s Settings and set to pairing or search mode.
3. Select Audi MMI when it appears on the phone’s screen.
4. Use the MMI control knob to select Yes.
5. Confirm that the six-digit PIN displayed matches the PIN displayed on your phone, and select Yes.
6. Select Pair on your phone to complete the pairing process.

Pairing a Second Compatible Phone
Two active phones can be connected simultaneously to receive calls through the MMI, giving you priority in calls, messages, and secondary devices. If the primary phone is in use, the secondary phone will only receive calls from the phone, not the MMI system.
To pair an additional phone, follow above steps 1-6. Both contact lists/directories from each device will be loaded into the MMI.

Switch Roles:
1. Press the TEL function button and choose Switch roles.

*Some phones may require a response to automatically connect for future connections. Once paired, the Bluetooth symbol appears on the MMI screen along with network strength bars, and it will be displayed whenever a paired phone is connected to the infotainment system.

Important Safety Instructions and Warnings: Bluetooth®

Important Safety Instructions and Warnings: Voice Recognition

Note:
Bluetooth® Pairing
Save your phone’s Owner’s Manual for specific Bluetooth activation instructions. Vehicle must be stationary with the parking brake engaged while performing the operation. Once paired, the Bluetooth symbol appears in the MMI screen along with network strength bars and it will be displayed whenever a paired phone is connected to the infotainment system.

Important Safety Instructions and Warnings: Bluetooth®

Direct your full attention to driving. As the driver, you assume responsibility for safety in traffic. Only use the functions in such a way that you are able to concentrate on driving at all times. Obey all applicable laws regarding the use of telephones while driving.

Do not use the Voice Recognition system in emergencies because your voice may change in stressful situations. It may take longer to dial the numbers if the system may not be able to do it at all. Dial the emergency number manually.
Bluetooth® Pairing

Initial Setup
Bluetooth pairing is a one-time process. Once paired, Bluetooth® devices stay connected automatically when you start your vehicle and its Bluetooth® system is turned on. To enable Bluetooth® pairing, allow your phone to automatically connect with your Bluetooth® system or you will need to manually pair your device with your vehicle.

1. Press the button to access your settings.
2. Press the Bluetooth® button on the steering wheel.
3. Select the phone icon on the phone paired with your vehicle.
4. Press the Bluetooth® button on the phone's Bluetooth® menu.
5. Press the Bluetooth® button on the phone's Bluetooth® menu.

Paring a Second Compatible Phone
Bluetooth® technology is designed to allow vehicles to connect with a second smartphone without having to reset the system. However, some vehicles may require you to reset the system after pairing a second smartphone for the first time.

1. Press the button to access your settings.
2. Select the Bluetooth® button on the phone's Bluetooth® menu.
3. Press the Bluetooth® button on the phone's Bluetooth® menu.
4. Press the Bluetooth® button on the phone's Bluetooth® menu.

Switching
1. Press the button to access your settings.
2. Select the phone icon on the phone paired with your vehicle.
3. Press the Bluetooth® button on the phone's Bluetooth® menu.
4. Press the Bluetooth® button on the phone's Bluetooth® menu.

Read Messages
Your vehicle's Bluetooth® system allows you to read text messages from your phone without having to manually connect with your Bluetooth® phone from the MIs system.

Wireless Audio Streaming
When your Bluetooth® device is paired to your vehicle, you can stream audio from your device through your vehicle's stereo system. Bluetooth® allows streaming audio from your phone, and your vehicle will respond to your voice commands.

1. Connect the phone to your vehicle's Bluetooth® system.
2. Press the button to access your settings.
3. Select the phone icon on the phone paired with your vehicle.
4. Press the Bluetooth® button on the phone's Bluetooth® menu.
