Start-Stop System

Audi connect®

Bluetooth® & Voice Recognition
1. **MMI® Controls**  
   MMI controls consist of a control knob with joystick, control buttons and function buttons. Turn the control knob to the left or right and press it to select a menu in the MMI.

2. **Navigation**  
   Get started with setting destinations and discover more as you become familiar with the interface.

3. **Electromechanical Parking Brake**  
   Pull the switch up to engage the parking brake. To release, depress the brake and push the switch down.

4. **Climate Controls**  
   When AUTO is selected, the system maintains your temperature selection by regulating air temperature, fan speed and airflow.

5. **Start-Stop System**  
   This advanced Audi technology is designed to help save fuel and reduce CO2 emissions at the same time.

6. **Trunk Release Button**  
   Pull this button to unlock and open the rear lid.

7. **Media/Audi connect® (CD/DVD/SD card)**  
   Press the MEDIA button to access available media from connected sources (e.g., Bluetooth Audio, SD card, DVD, Jukebox and iPod connected via the Audi Music Interface).

8. **MMI® Display**  
   The MMI Display screen displays MMI menus and multi-media information, including Voice Recognition commands, media selections and radio information.

9. **Voice Recognition**  
   Press the TALK function button on the steering wheel to activate Voice Recognition in the MMI.

10. **Driver Information System (DIS)**  
    The DIS provides important driver information, including trip computer data, outside temperature and vehicle alerts.

11. **DIS Controls**  
    The DIS is controlled with the multifunction steering wheel controls. To select a menu item, turn and press the thumbwheel.

12. **Cruise Control**  
    To activate, pull the stalk toward you. Braking or pushing the stalk away slightly will cancel Cruise Control.

13. **Windshield Wipers**  
    From the OFF position, move the stalk up one click for rain-sensing wipers, up two clicks for low-speed continuous wipe and up three clicks for high-speed continuous wipe.

14. **Memory Seats**  
    Program the seat and mirrors to your desired position.

Audi Navigation
Setting a Destination

Your MMI Navigation system has extraordinary capabilities to enhance your drive with user-definable views, routing selections and more. Get started with setting destinations and discover more as you become familiar with the interface.

1. Press the NAV function button.
2. Select the Destination control button.
3. Select Address from the Navigation menu.
4. Select City/Zip code field and enter the information.
5. Continue by entering the Street and House number.
6. When complete, select Start route guidance.

Additional Settings

Selecting Route criteria allows you to change the way the route is calculated based on current traffic situations, such as heavy traffic, construction or road closings. To change route criteria:

1. Press the NAV function button.
2. Select the Settings control button.
3. Select Route criteria.
   - Auto reroute automatically adjusts your route based on SiriusXM Traffic information.
   - Alternative routes displays multiple route options: Short, Fast or Mixed.

Note:
Always pay careful attention to the road and do not drive while distracted. Enter destinations while vehicle is stationary away from traffic. When pressing the Nav button, the last navigation announcement will be repeated.

Important Safety Instructions and Warnings: Navigation & Infotainment
- The demands of traffic require your full attention.
- Obey all traffic laws when driving.
- The route calculated by the navigation system is a recommendation for reaching your destination.
- Obey traffic lights, stopping restrictions, one-way streets, lane change restrictions, etc.
1. AUTO Setting
The AUTO setting of your Climate Control system will help the cabin maintain your selected temperature by regulating the temperature, fan speed and airflow. Once activated, there is no need to alter the settings. When AUTO is selected, AC will come on automatically to condition and dehumidify the air.

2. Dual Temperature Settings
Temperature and airflow can be operated independently for each side of the cabin using the control knobs. AUTO will maintain separate temperatures for the driver and front passenger.

3. Synchronize Zones
Press and hold the driver’s side temperature control knob to synchronize both sides to the same temperature, fan speed and airflow.

4. Heated Seats
To warm up more quickly on a cool morning, turn on your heated seats.

5. Fan Speed
Fan speed can be adjusted by first pressing the FAN button and then adjusting the fan speed with either the driver or passenger control knob.

6. Recirculation
The recirculation function helps prevent outside air and odors from entering the cabin. It may also be used in conjunction with AC to cool the cabin more quickly.

7. Airflow
The airflow selector directs air to the floor, panel or defrost vents, or a combination.

---

Import: Safety Instructions and Warnings: Climate Control
- Reduced visibility is dangerous and can cause accidents.
- For safe driving it is very important that all windows be free of ice, snow and condensation.
- Completely familiarize yourself with the proper use and function of the heating and ventilation system and especially how to defog and defrost the windows.
- Never use the windshield washer system in freezing weather until you have warmed the windshield first, using the heating and ventilation system. The washer solution may freeze on the windshield and reduce visibility.
- Do not use the recirculation for extended periods of time. The windows could fog up since no fresh air can enter the vehicle. If the windows fog up, press the air recirculation button again immediately to switch off the air recirculation function or select defrost.

Bluetooth® & Voice Recognition
Cruise Control

Activate

To activate, pull the control stalk toward you to put it in the ON position.

Set Cruising Speed

At your desired speed, press the SET button at the end of the stalk. The set speed and the illuminated CRUISE icon are shown in the Driver Information Display.

Changing Speed

There are three ways to change your speed:

- Accelerate or decelerate, then press the SET button again.
- To increase/decrease speed in 1 mph increments, tap the stalk up or down.
- Hold the stalk up or down to increase/decrease speed in 5 mph increments; release when desired speed is reached.

Cancel/Resume

1. To cancel, press the brake pedal or push the stalk slightly away from you to the CANCEL position.
2. The CRUISE light will go off.
3. To resume, pull the stalk toward you; you will return to your set speed.

Your most recently set speed appears as a small icon in the Driver Information Display. It remains in memory until you turn Cruise Control or your Audi off.

Important Safety Instructions and Warnings: Cruise Control

- Always pay attention to the traffic around you when the Cruise Control is in operation. You are always responsible for your speed and the distance between your vehicle and other vehicles.
- For reasons of safety, Cruise Control should not be used in the city, in stop-and-go traffic, on twisting roads and when road conditions are poor (such as for, top, gravel, heavy rain and high temperatures). Because this increases the risk of an accident.
- Turn off the Cruise Control temporarily, when entering toll lanes, highway exit lanes or construction zones.
- Please note that inadvertently “ticking” your foot on the accelerator pedal causes the Cruise Control to not be active. This is because the Cruise Control is interrupted by the driver’s acceleration.
- Do not use Cruise Control on very winding roads or when the steering system is switched off. The braking function in the system may be switched off. The other Cruise Control Functions remain active as long as the indicator light is on.
- You should only return to the saved speed if it is not too fast for the current traffic conditions - risk of an accident.

Cruise Control

Start-Stop System

Audi connect®

Bluetooth® & Voice Recognition
The Start-Stop System shuts off the engine when you stop at traffic signals or during certain stop-and-go driving conditions to save fuel. When the system shuts off the engine, the Start-Stop System light appears in the Driver Information System in the instrument cluster. Releasing the brake pedal instantly restarts the engine and makes power available before your foot even reaches the accelerator.

When this feature is activated, the ignition and other systems remain on for your convenience. To ensure proper vehicle shutdown, it is critical that you turn your ignition off by pressing the “Start Engine Stop” button to completely turn your vehicle off.

Please refer to your Owner’s Manual for operating conditions.

Start-Stop System activated when light is off.
Start-Stop System deactivated when light is on.

Note:
Start-Stop feature available on select engines.

Important Safety Instructions and Warnings: Start-Stop System
- Never allow the engine to run in confined spaces because this increases the risk of asphyxiation.
- Never turn off the engine before the vehicle has come to a complete stop.
- The brake booster and power steering no longer function when you stop the engine. You must use more force when braking or steering. Because you cannot brake and steer as you usually would, this could lead to accidents and serious injuries. These functions are still active if the Start-Stop System has stopped the engine.

Start-Stop System

Audi connect®

Bluetooth® & Voice Recognition
Audi connect® Wi-Fi Configuration

Audi connect can provide you with Google Earth™, Google Voice™ Local Search, Wi-Fi Hotspot, Online Services (fuel prices, weather information, travel information, personalized feeds and more) and myAudi Destinations®.

1. Ensure the SIM card (provided by dealer) is present in the SIM slot.
2. Press the TEI function button.
3. Select the Settings control button.
4. Select Wi-Fi settings.
5. Then select Wi-Fi active and choose Visible.
6. Select Password. The default password may be used or a new eight character long password may be entered.

Most devices use encryption type WPA2 as the default.
7. Select Apply settings to save your password.
8. On your device, search for wireless hot spot, select and enter the password to connect.
You may connect up to eight wireless devices at one time.
To continue with Data Configuration
9. Press the BACK button, scroll to Data connection and select.
10. Select Without request. Press the BACK button to exit.

Google Voice™ Local Search

You can also perform an Online Point of Interest Search using Google Voice Local Search.
1. Press the TALK button on the steering wheel.
2. Say “Online destinations” or “Google Search” followed by a keyword such as “Coffee shop” (e.g., bookstore, museum, pizza, etc.).
   - The system will respond with “Retrieving requested information” and display a list.
3. Make your selection from the displayed list:
   - By speaking the line number.
   - Or saying “Next page” to view additional results.
4. Say “Start route guidance” to start the navigation to your destination.

*Always pay careful attention to the road and do not drive while distracted. The features and technologies discussed are optional, may require an additional subscription with separate terms and conditions and should be used only when it is safe and appropriate. The Wi-Fi feature is intended for passengers use only. Audi connect services are only available where there is mobile network coverage. You can obtain more information from your current service provider. Vehicle must be stationary with the parking brake engaged while performing this operation.*

Note: Cellular connectivity is dependent on available cellular signal. Online Destinations requires Audi connect and may require an additional subscription with separate terms and conditions. The features and technologies discussed are optional and should be used only when it is safe and appropriate. Enter destinations while vehicle is stationary and away from traffic. This feature is available on select trim lines.

Important Safety Instructions and Warnings: Audi connect®

- To reduce the risk of an accident, only use Audi connect services when road and traffic conditions permit.
- To reduce the risk of an accident, only use Audi connect services when traveling at or below 15 miles per hour.
- To reduce the risk of an accident, only use Audi connect services with a Wi-Fi hotspot in a vehicle, if the vehicle is in motion only when the vehicle is stationary or when the vehicle is stationary.
- At all times, do not engage in the use of a Wi-Fi hotspot to distract you from driving, as this could increase the risk of an accident.
- It is only safe to use laptop and similar mobile devices when the vehicle is stationary, because, like all loose objects, they could be thrown forward in the case of a sudden stop or severe accident.
- Do not use any wireless devices in the rear seat within range of the airbags while driving.
- Read and follow the safety precautions in the vehicle’s Owner’s Manual under “Important information about the front airbag system” in the “Airbag System” chapter.
Bluetooth® Pairing

1. Switch ignition to Accessories mode.
2. Enable Bluetooth in your phone's Settings and set to pair or search mode.
3. Choose the Audi selection from the Devices list in your phone.
   For MMI:
   * Select Yes with the control knob.
   * Confirm that the 6-digit PIN matches; select Yes with the control knob.
   * Select Pair on the phone.
   For Concert Radio:
   * Enter default PIN 1-2-3-4.
4. The phone is now paired and contacts will synchronize.
5. MMI will display synchronizing icon and Bluetooth icon.
6. Contacts synchronizing.
7. Bluetooth active and network strength bars.

*Some phones may require a response to automatically connect for future connections. Once paired, the Bluetooth symbol appears on the MMI screen along with network strength bars, and it will be displayed whenever a paired phone is connected to the infotainment system.

Notes:
Bluetooth® Pairing
See your phone's Owner's Manual for specific Bluetooth activation instructions. Vehicle must be stationary with the parking brake engaged while performing this operation. Once paired, the Bluetooth symbol appears in the MMI screen along with network strength bars, and it will be displayed whenever a paired phone is connected to the infotainment system.

Voice Recognition
Voice Recognition commands pertaining to phone must have a phone paired with system to activate.

Important Safety Instructions and Warnings: Voice Recognition
* Drive your full attention to driving. Be alert, possess complete responsibility for safety in traffic. Only use the functions in such a way that you always maintain complete control over your vehicle in all traffic situations.
* Do not use the voice recognition system in emergencies because your voice may change in stressful situations. It may take longer to dial the number or the system may not be able to dial it at all. Dial the emergency number manually.

Important Safety Instructions and Warnings: Bluetooth® Pairing
* Medications may inhibit cellular phone use. Repeatedly make sure you are in a position to observe the function of pacemakers. Always maintain a minimum distance of 20 centimeters between the cell phone antennas and the pacemaker.
* Do not carry the cell phone in a pocket directly over the pacemaker when the phone is switched on.
* Switch the cell phone off immediately if you suspect it is interfering with the pacemaker.
* Do not use the voice recognition system in emergencies because your voice may change in stressful situations. It may take longer to dial the number or the system may not be able to dial it at all. Dial the emergency number manually.

*Waypoints are not always clearly marked. This may include points of interest such as gas stations, fuel and chemical storage facilities or transport vehicles, or locations where fuel spills such as prepare or gas tank in vehicles or buildings. Chemically on large quantities of toxic substances such as fuel, water, oil or metal may be present in the air. This also applies to locations where you would normally turn your vehicle engine off.
* Avoid distractions of traffic require your full attention.
* Obey all applicable laws regarding use of telephones in vehicles.
* Do not switch off the telephone when use of cell phones is prohibited. Obey all applicable notices and regulations.

**Wireless Audio available on MMI Navigation equipped vehicles.
Bluetooth® Pairing

Initial Setup

1. Switch Ignition to Accessories mode.
2. Check for “bluetooth®” on your phone’s Settings and set to pairing/search mode.
3. Please refer to the software for details on how to turn on/off Bluetooth® in your phone.

Manual Pairing:

1. Select Pairing from the main menu.
2. Choose the device that you wish to connect.
3. Select the Bluetooth® enabled device.

Voice Recognition: MMI®

Call by Name

1. Press the Call button on the steering wheel.
2. Speak "Call" from dictionary cues or "Call John Smith."
3. The user number is displayed.

If multiple numbers are stored for a given name, a list will be shown. After selecting the desired entry, say "call" or "dial.

Note: After correctly calling someone with your voice, you can either hang up or continue the call as it is stored in your phonebook.

Setting a Destination

1. Press the Call button on the steering wheel.
2. Tell "enter address" or "enter destination." (Other commands are available in the voice menu.
3. After the beep, the voice command prompt example: "Enter European Road in Lisbon, Portugal."
4. Select the search result.

If no results are found, a list will be shown. After selecting the desired entry, say "set as destination.

Note: After correctly calling someone with your voice, you can either hang up or continue the call as it is stored in your phonebook.

Voice Recognition Phone

Concert Radio: Name Tag

1. Press the Call button on the steering wheel.
2. After the beep, say "dial name.
3. If prompted, select the desired number and proceed with dialing. If you do not want to use the voice command, you may also use the phonebook or the keypad.

Voice Recognition Phone

Concert Radio: Call by Name

1. Press the Call button on the steering wheel.
2. After the beep, say "call name.
3. If prompted, select the desired number and proceed with dialing. If you do not want to use the voice command, you may also use the phonebook or the keypad.

Voice Recognition Phone

Concert Radio: Call by Name
