Climate Control

Audi smartphone interface

Bluetooth®, Voice Recognition & MMI®
1. **MMI® Controls and Optional Touchpad**
   Rotary pushbutton/touchpad with integrated joystick allows you to browse menus, zoom in and out of maps/views and select items by pressing the knob. Control and function buttons allow you to select and personalize settings. The touchpad can be used to write letters and numbers.

2. **Infotainment Control**
   Control for Infotainment system on/off and volume control. Tilt the knob to the right or left will move through tracks or preset radio stations. A brief press mutes audio. Press and hold will turn system off.

3. **Electromechanical Parking Brake**
   Pulling up on the switch engages the parking brake. To release, depress the brake pedal and push the switch down.

4. **Climate Control**
   Set preferences for temperature, airflow distribution and recirculation. Use in AUTO or Manual mode.

5. **Voice Recognition**
   Press the TALK button on the steering wheel to activate Voice Recognition in the MMI.

6. **Steering Wheel Controls**
   Assist with navigating through a variety of vehicle functions. To select a menu item, press the thumbwheel.

7. **Audi Virtual Cockpit/Instrument Cluster**
   Displays vehicle system and function information. Menu selections can be accessed using either the MMI control knob or the multifunction steering wheel controls.

8. **Cruise Control**
   The stalk allows you to set a preferred speed to be maintained above 15 mph (20 mph with optional Adaptive Cruise Control).

9. **Start/Stop System**
   This advanced Audi technology is designed to help save fuel and reduce CO₂ emissions at the same time.

Setting a Destination

Your MMI Navigation system has extraordinary capabilities to enhance your drive with user-definable views, routing selections and more. Get started with setting destinations and discover more as you become familiar with the interface.

1. Using the NAV/MAP switch, toggle up to open the Destination entry screen.

2. Use the optional touchpad to write the address or Point of Interest name, or shift the control knob forward to open the speller and enter information by manually selecting letters and numbers. Shift the knob down to close the speller.

3. Available addresses will populate as information is entered, filtering to show only addresses meeting the currently entered information.

4. Select appropriate address, then select Start route guidance.
   - Additional destination features can be seen by pressing the left control button.

Cancel Route Guidance

- Toggle the NAV/MAP switch to display the Destination entry screen, and select Cancel route guidance.
- Or press the TALK button on the steering wheel and say “Cancel route guidance” after the beep.

Alternative Routes

The Navigation system can display additional alternative routes based on speed, economy and traffic congestion. When feature is enabled, alternative routes will always be displayed when route guidance is active.

To enable Alternative routes:
- Select the NAV/MAP function.
- Press the right control button and choose Navigation settings.
- Select Show alternative routes by placing a checkmark in the box.

To select Alternative routes while route guidance is active:
- Select the right control button to choose Show alternative routes.
- If available, up to three route suggestions will be displayed and can be selected via the control knob (Route type: 1. fast, 2. fast alternative, 3. economic route).

Note:
Always pay careful attention to the road and do not drive while distracted. Enter destinations while vehicle is stationary away from traffic. When pressing the NAV button, the last navigation announcement will be repeated.

Warnings: Navigation
- The demands of traffic require your full attention.
- Obey all traffic laws when driving.
- The route calculated by the Navigation system is a recommendation for reaching your destination. Obey traffic lights, stopping restrictions, one-way streets, lane change restrictions, etc.

Cruise Control

Activate
To activate, pull the control stalk toward you to put it in the ON position.

Set Cruising Speed
At your desired speed, press the SET button at the end of the stalk. The set speed and the illuminated CRUISE indicator light are shown in the Driver Information System display.

Changing Speed
There are several ways to change your speed:
- Accelerate or decelerate, then press the SET button again.
- Push the stalk up or down one level to increase/decrease speed in 1 mph increments.
- Push the stalk up or down two levels to increase/decrease speed in 5 mph increments.
- Hold the stalk up or down to increase/decrease speed; release when desired speed is reached.

Cancel/Resume
1. To cancel, press the brake pedal or push the stalk slightly away from you to the CANCEL position.
2. The CRUISE indicator light will go off.
3. To resume, pull the stalk toward you; you will return to your set speed.

Your most recently set speed appears as a small icon in the Driver Information System. It remains in memory until you turn Cruise Control or your Audi off.

Warnings: Cruise Control
- Always pay attention to the traffic around you when the Cruise Control system is in operation. You are always responsible for your speed and the distance between your vehicle and other vehicles.
- For safety reasons, Cruise Control should not be used in the city, in stop-and-go traffic, on winding roads and when road conditions are poor (such as ice, fog, gravel, heavy rain and hailstone/lashing) because this increases the risk of an accident.
- Switch the Cruise Control off temporarily when driving in tunnels/lanes, highway exits or in construction zones.
- Please note that excessively “setting” your foot on the accelerator pedal prevents the Cruise Control from braking. This is because pressing the accelerator pedal overrides the Cruise Control system.
- If a brake system malfunction, such as one recording occurs when the Cruise Control system is switched on, the braking function in the system may be switched off. The rest of the Cruise Control system functions remain active as long as the CRUISE indicator light is on.
- You should only resume the stored speed if it is not too high for existing traffic conditions; otherwise, you risk an accident.

Start/Stop System
Climate Control
Audi smartphone interface
Bluetooth®, Voice Recognition & MMI®
Start/Stop System

Operation
The Start/Stop System shuts off the engine when you stop at traffic signals or during certain stop-and-go driving conditions to save fuel. When the system shuts off the engine, the Start/Stop System light appears in the Driver Information System in the instrument cluster. Releasing the brake pedal instantly restarts the engine and makes power available before your foot even reaches the accelerator.

When this feature is activated, the ignition and other systems remain on for your convenience. To ensure proper vehicle shutdown, it is critical that you turn your ignition off by pressing the "Start Engine Stop" button to completely turn your vehicle off.

Please refer to your Owner’s Manual for operating conditions.

Start/Stop ON or OFF?
If you wish to turn off the Start/Stop System, simply press the \image{bb} button located below the MMI display.

The button will illuminate to tell you the Start/Stop System is deactuated. When the system is deactivated, the engine will continue to run when the vehicle is stopped at traffic signals or during stop-and-go driving; therefore, you will not receive the potential fuel savings or CO2 reduction benefit. Once you have turned off Start/Stop, it will remain deactivated until you cycle the ignition again.

Basic Requirements for Start/Stop Mode
- The driver’s door must be closed.
- The driver’s seat belt must be fastened.
- The hood must be closed.
- The vehicle must have driven faster than 2 mph (3 km/h) since the last time it stopped.
- A trailer must not be hitched to the vehicle.

If you leave the vehicle during a stop phase, the engine can be restarted within approximately 30 seconds if the following requirements are met:
- The driver’s door must be closed, the driver’s safety belt must be fastened, and the brake pedal (automatic transmission) or the clutch pedal (manual transmission) must be pressed.
- Or
- The driver’s door must be closed, the brake pedal (automatic transmission) or the clutch pedal (manual transmission) must be pressed, and a gear must be engaged.

Warnings: Start/Stop System
- To reduce the risk of pulsating, never allow the engine to run in confined spaces.
- The brake booster and power steering no longer function when you stop the engine. You must use more force when braking or steering. Because you cannot brake and steer as you usually would, this could lead to accidents and serious injuries. These functions are still active if the Start/Stop system has stopped the engine.
- Never turn off the engine before the vehicle has come to a complete stop.
- Please note that the brake booster and power steering only work when the engine is running. When the engine is off, you must use more force to steer or brake the vehicle. Because the usual steering and braking capability is not available, the risk of accidents or injuries increases.
- For safety reasons, always park the vehicle with the selector lever in the "P" position; otherwise, there is the risk that the vehicle could roll.
- After the engine has been switched off, the radiator fan can continue to run for up to 10 minutes—even with the ignition switched off. It can also switch on again after some time if the coolant temperature rises so the result of heat build-up or if the engine is already warm and the engine continues to run.
- After driving through water or mud, the effectiveness of the brakes may be reduced due to moisture on the brake rotors and brake pads. A few careful brake applications should dry off the brakes.

Start/Stop System

Climate Control

Audi smartphone interface

Bluetooth®, Voice Recognition & MMI®
System Controls

The 3-Zone Climate Control system allows separate temperatures to be set for each of the three vehicle areas. Pressing any button or turning the temperature dial will activate the system.

The AUTO setting will help the cabin maintain the selected temperature by regulating the temperature, fan speed and airflow. Once activated, there is no need to alter the settings. A/C will come on automatically to condition and dehumidify the air.

The system uses rocker switches to activate various functions. The rocker switches are touch-sensitive; they will display the function. Toggling these switches changes the action of that function.

Driver and Passenger Controls

1. AUTO
   Displays set temperature. Press to activate AUTO for each zone. Press again to deactivate AUTO. Changing the air distribution or fan speed will also turn off the AUTO function.

2. 3-ZONE/SYNC
   Toggles through 4 system settings: Open/Close Wide vent, 3-ZONE, SYNC, and Set Rear. The Wide vent is located in front of the passenger to disperse air more evenly. With SYNC activated, the settings for the driver's side are applied to all other areas except for seat heating/ventilation. If settings for the passenger or rear are changed, SYNC is disabled. Set Rear allows the rear seat settings to be controlled from the front panel.

3. Air Distribution
   Press up or down repeatedly until the desired distribution setting is displayed.

4. Fan Speed
   Press up or down repeatedly until the desired fan speed is achieved.

5. A/C
   Toggles through ON, OFF, A/C MAX. Indicates when air conditioning system is on. The A/C system only works when the fan is on. When A/C is off, the air is neither cooled nor dehumidified, and windows may fog as a result. The AUTO setting turns A/C on automatically. Activating A/C MAX will cool and dehumidify the vehicle interior as quickly as possible. Temperature will be set to 10° and fan speed will increase.

6. Seat Heating and Ventilation
   If you press the button, the seat heating/ventilation is switched on at the highest level (3). The LEDs indicate the temperature level. To reduce the temperature, press the button again. To switch the seat heating/ventilation off, press the button repeatedly until the LED turns off.

7. Max Defrost
   Cuts the windshield of fog or frost as quickly as possible. Most of the air will be directed to the windshield vents, and temperature is regulated automatically. Once clear, readjust the settings. Sufficient engine heat is necessary for effective defrosting.

8. Recirculation
   Press the button to recirculate air in the cabin and prevent outside air from entering.

9. Defrost Rear
   Activates electric heater embedded in rear glass. The heater will turn off automatically after about 10-20 minutes, depending on the outside temperature.

10. OFF
    Deactivates the system.
    • Rear heating and cooling can be turned off from the front control panel by selecting Set Rear with the 3-ZONE/SYNC button, then selecting OFF.

Residual Heat

When the ignition switch is turned off, pressing the driver's temperature selection knobs will allow the residual engine coolant heat to warm the interior. This function turns off after about 15 minutes.

Climate Control

Audi smartphone interface

Bluetooth®, Voice Recognition & MMI®
Connecting
You can connect your Apple® or Android® phone to the MMI. Certain content on your phone will be adapted to the Infotainment system display while driving and can be operated through the MMI controls. This gives you the benefit of the familiarity with your phone's system combined with the MMI display.
To connect:
1. The vehicle must be stationary with the ignition on.
2. Connect your smartphone with a manufacturer-approved cable to either USB port located underneath the center armrest. Before using Android Auto, you must download the Android Auto app from the Google Play Store. You must have an active Google account and internet connection.
3. You will see a connection prompt in the MMI.
4. Using the control knob, select to activate the device.
5. Respond to prompts, as necessary from both the MMI as well as the smartphone.
Once connected, you have access to the apps displayed on screen. Select the apps using the MMI control knob.

With Apple CarPlay™ and Android Auto® you can:
• Activate Siri® Voice Control or Talk to Google with a long press of the TALK button on the steering wheel.
• Make and receive calls.
• Send and receive text messages.
• Set reminders.
• Get turn-by-turn navigation.
• See recent places.
• Listen to music.

*Not all apps will work with the Audi smartphone interface, and some functions may be limited. The functions that can be used depend on the operating system version and the software of the app being used. Some MMI functions may not be available when Apple CarPlay®, or Android Auto® is active. Refer to apple.com/us/AppleCarPlay® or android.com/automobile for additional information.

Apple CarPlay® Operation
While using Apple CarPlay, you can choose to use the Navigation system from the phone or switch back to the MMI Navigation system using MMI controls.
If a Bluetooth connection is active, and Apple CarPlay® is activated, it will disconnect Bluetooth and use CarPlay exclusively for telephony connectivity.
• MMI control knobs:
  • Turn the knob and press to open selected apps and control functions within that app.
  • Shift the knob down or up to change levels to access apps more quickly. Shift the control knob continuously to the right to advance to the next screen.
  • Press and hold the back button to return to the main CarPlay screen.

Android Auto® Operation
While using Android Auto, you can choose to use the Navigation system from the phone or switch back to the MMI Navigation system using MMI controls.
• If you had not previously paired your phone with Bluetooth, it will be paired automatically with your MMI system**.
• MMI control knobs:
  • Shifting the knob down will change usage from within an open app allowing you to select another app.
  • Turning the knob and pressing will open the selected app.
  • Shifting left or right within an open app will open additional features or settings. For example, swiping to the right while listening to a song will activate the song's playback settings.
  • Use your fingers to “pinch” or “spread” the view using the MMI touchpad. Press to select a location to begin route guidance.
** The Android phone may prompt to acknowledge additional requests.

Access to Apple CarPlay® and Android Auto®
If you have an active Apple CarPlay or Android Auto session and have accessed another MMI function and wish to return:
1. Select the MENU function button.
2. Scroll using the MMI control knob to select Apple CarPlay or Android Auto from the Menu.

Connection Manager
If your device is presently using MMI Media as the source and you wish to activate Apple CarPlay or Android Auto instead:
1. Select the MENU function button.
2. Scroll using the MMI control knob to select Audi smartphone interface. This will open the Connection Manager.
3. To activate, scroll to Audi smartphone and press the control knob, and place a check in the box for your device. Remove the check to deactivate from the Audi smartphone interface.
4. The Connection Manager can also be accessed by selectingMenu ➔ Settings ➔ Connection Manager.

Note:
- Always pay careful attention to the road, and do not drive while distracted. Audi smartphone interface features require compatible device, operating systems, and mobile app. CarPlay® requires iPhone 5s or newer. For Android Auto® using a USB cable or Android Auto cable on your phone while driving to see if it is compatible. CarPlay® must be enabled on device to activate Siri® features. Standard fuel and data usage rates apply. See mobile app provider for terms and privacy. Android Auto® is a trademark of Google Inc. Apple CarPlay® is a trademark of Apple Inc.
- View only the navigation information that you need while driving to help you keep your eyes on the road and your hands on the wheel.
- Only use the information system when traffic conditions permit and always in a way that allows you to maintain complete control over your vehicle.
- Always keep your hands on the wheel when you need to drive your car so that the important information shown will always be available to the driver at a glance.
- Always keep the Driver's literature handy so that you can find it easily if you have questions. Driving requires your complete and undivided attention. As the driver, you have complete responsibility for safety to traffic. Never operate mobile devices while driving, because this increases the risk of an accident.

Audi smartphone interface
Bluetooth®, Voice Recognition & MMI®
Pairing a Compatible Device
Bluetooth pairing is a one-time procedure. Once paired, your phone will automatically connect when you start your vehicle*. Your contact list will automatically synchronize, allowing you to access contacts and make and receive calls through the Infotainment system. For information regarding phone compatibility, visit audiocsa.com/Bluetooth.

1. Switch ignition to Accessories mode.
2. Activate your phone’s Bluetooth and set to pairing or discovery mode.
3. In the list of available devices, select the AUDI MMI listing for the vehicle.
4. When the prompt appears in the MMI, select Accept using the control knob.
5. Confirm the PIN matches and select Yes in response to the prompt.
6. Select Pair on your device.

Two active phones can be connected simultaneously to receive calls through the MMI, giving you primary and secondary devices. To change the order of devices:

1. Select the TEL function.
2. Press the right control button.
3. Select Change Primary and Additional Phone.
4. This will also make the contact list from the new primary phone active.

If the primary phone is in use, the Secondary phone will only receive calls from the phone, not the MMI system.

*Some phones may require an additional response to prompts to allow full connectivity. Once paired, the mobile phone symbol and network strength bars will appear at the bottom of the MMI screen.

Bluetooth® Audio
Wireless Audio Streaming
Streams music wirelessly via a Bluetooth connection. To connect a device (or additional devices), follow the pairing instructions above. Once paired, Bluetooth audio player is established automatically.

To stream audio:
- Select MEDIA ▶ press left control button ▶ select Bluetooth as the source.
- Use the BACK button to browse within playlists, Artists, Songs, etc.

Your Bluetooth wireless audio is also capable of streaming audio for other apps too:
- To begin playing from another app or restarting audio stored on your device, start the app from the source.

Warranty: Voice Recognition
- Bluetooth® Pairing
  - Bluetooth® experts warn that cell phones can interfere with the function of parking assist systems.
  - Do not attempt to use the cell phone with the parking assist system engaged.
  - If you are using your cell phone and do not want to be disturbed by parking assistance, please take your phone off your belt or do not use your cell phone while driving.

- Wireless Audio Streaming
  - Always follow the instructions given by the emergency personnel during an emergency call and only end the call when you instruct them to do so. As the driver, you are always the most important person. In an emergency, always follow the advice given by the emergency personnel.
  - If your mobile phone is in use when you are involved in an accident, you may have to use your mobile phone to report the accident.
  - You may also have to use your mobile phone to report the accident.

- Bluetooth® Multi Media Interface (MMI)
  - Only use the Infotainment system when traffic conditions permit and always in a way that allows you to maintain complete control over your vehicle.

- Bluetooth® Voice Recognition
  - Only use the Infotainment system when traffic conditions permit and always in a way that allows you to maintain complete control over your vehicle.

- Adjust the volume of the audio system so that signals from outside the vehicle, such as police and fire sirens, can be heard easily at all times.
Bluetooth® Pairing

Pairing a Connected Device
Bluetooth® pairing is a one-time procedure. Once paired, your phone will automatically connect when you power on and show your Bluetooth® icon. You can also access and manage services by tapping on the Bluetooth® and make and receive calls through the Information system. For information regarding phone compatibility, consult the phone’s user manual.

1. Switch to a vehicle accessory’s main menu.
2. Select your phone’s Bluetooth® device to go to pairing or discovery mode.
3. Choose “Bluetooth” to search and a list of available devices, select the Audi HU MH6 by the line “Audi HU MH6.”
4. If the Bluetooth® device appears in the menu, select Accepting to confirm your Bluetooth® device.
5. Changing the pairings for the menu will update in the menu.
6. Tap on your phone’s device.

Two active phones can be connected simultaneously to receive calls through the HU MH6, giving you primary and secondary devices. To disconnect either device, follow the steps:

1. Select the “Select Function.”
2. Press the Connected service.
3. Select “Change Primary and Additional Phone.”
4. Tap on the phone number of the primary phone or additional device.
5. If the primary phone is in use, the secondary phone will only receive calls from the phone, not the HU MH6.

Call by Name
When using Voice Recognition, speak in a normal voice, facing forward and make eye contact with the navigation.

1. Press the “Unlock” button. A voice will sound.
2. Say, “Call,” then type in a name or number you know.
3. After three seconds, the screen will display the name or number of the call, and the phone will automatically dial the number.

Bluetooth® Audio

Voice Recognition

Printed on Display: Internet Search

1. Press the “Web” button.
2. Say, “Internet Search,” then type in the search you want to perform.

MMI Controls

The Audi MMi Multimedia Interface (MMI) is controlled from the central menu.

1. Press the MMI button.

Call by Name

Press the “Unlock” button and type in the contact number or name. You can also access and manage services by tapping on the Bluetooth® and make and receive calls through the Information system. For information regarding phone compatibility, consult the phone’s user manual.

1. Select a vehicle accessory’s main menu.
2. Press the “Unlock” button.
3. Press the Connected service.
4. Select “Change Primary and Additional Phone.”
5. Tap on the phone number of the primary phone or additional device.
6. If the primary phone is in use, the secondary phone will only receive calls from the phone, not the HU MH6.

Voice Recognition

Printed on Display: Internet Search

1. Press the “Web” button.
2. Say, “Internet Search,” then type in the search you want to perform.
