Navigation

Climate Control & Cruise Control

MMI® Controls

Audi smartphone interface

Bluetooth® & Voice Recognition
1. Luggage Compartment Lid
Pressing the button unlatches the front luggage compartment lid. Wipers must be turned off before opening lid.

2. MMI® Controls and Touchpad
The rotary pushbutton/touchpad with integrated joystick allows you to browse menus, zoom in and out of map views and select items by pressing the knob. Control and function buttons allow you to select system menus and personalize settings in the MMI®.

3. Engine Sound Controls*
Alters the exhaust note from exhaust Sport to exhaust Normal.

4. Electromechanical Parking Brake
Pulling up on the switch engages the parking brake. To release, depress the brake pedal and push the switch down.

5. Climate Control
Set preferences for temperature, airflow distribution and recirculation. Use in AUTO or Manual mode.

6. Performance Controls*
Alters the suspension setting, engine and transmission characteristics for wet, dry and snowy driving conditions. ESC and ASR intervention are extremely limited while driving in Performance mode.

*Available on V10 plus models.

**Available on V10 models only.

7. USB Ports
Allows connection of auxiliary devices and players. Two USB ports allow two devices to be connected to the MMI® system at the same time.

8. Voice Recognition
Press the TALK button on the steering wheel to activate Voice Recognition in the MMI®.

9. Cruise Control
Activating the Cruise Control system makes it possible to drive at a constant speed starting at 15mph (20km/h).

10. Audi Virtual Cockpit
Displays vehicle system and function information. Menu selections can be accessed using either the MMI® control knob or the multifunction steering wheel controls.

11. Audi Drive Select
Allows you to choose a drive mode (Comfort, Auto, Dynamic or Individual), which alters the steering, damper control**, engine sound and quattro settings to the mode selected.

12. Steering Wheel Controls
Assist with navigating through a variety of vehicle functions. To select a menu item, press the thumbwheel.

Audi connect®

Navigation

Climate Control & Cruise Control

MMI® Controls

Audi smartphone interface

Bluetooth® & Voice Recognition
Wi-Fi Configuration

Audi connect can provide you with Google Earth™, Google Voice™ Local Search, Wi-Fi Hotspot, Online Services (fuel prices, weather information, travel information, personalized feeds and more) and myAudi Destinations®. Once your dealer has activated your Audi connect subscription within the vehicle, you may begin to configure your Wi-Fi connection:

1. Select the TEL function.
2. Select the right control button.
3. Select Wi-Fi settings; ensure that Wi-Fi mode is set to On.
4. Select Network key and enter an eight-character password, or use the default password. Use the touchpad to enter characters or shift the control knob forward to open the keypad.
5. Scroll using the control knob to select OK.

Points of Interest: Online Destination Search

1. Press the TALK button on the steering wheel.
2. After tone, say “Google Search” or “Online Destinations” followed by a keyword (e.g., coffee shop, bookstore, museum, pizza, etc.).
3. Make your selection from the displayed list:
   - By speaking the line number.
   - Or saying “Next page” to view additional results.
4. Say “Start route guidance” to begin navigation to your destination, or say “Call,” which will call the location.

*Always pay careful attention to the road, and do not drive while distracted. Audi connect features and technologies are optional, may require an additional subscription with separate terms and conditions, and should be used only when it is safe and appropriate. The Wi-Fi feature is intended for passenger use only. Audi connect services are only available where there is mobile network coverage. You can obtain more information from your current service provider. Vehicle must be stationary with the parking brake engaged while performing this operation. Cell phone connectivity is dependent on available cellular signal. Enter destinations while vehicle is stationary and away from traffic. This feature is available on select trim lines.

Note: Refer to Owner’s Manual for additional commands. Cellular connectivity is dependent on available cellular signal.

⚠️ Warnings: Audi connect®
- To reduce the risk of an accident, only use Audi connect services when read and traffic conditions permit.
- Adjust the volume of the audio system so that signals from outside the vehicle, such as police and fire sirens, can be heard easily at all times.
- Only use the Infotainment system when traffic conditions permit and always in a way that allows you to maintain complete control over your vehicle.
- It is only safe to use tablets, laptops, mobile devices and other similar devices when the vehicle is stationary. Even if an object is kept away from the driver, it can become a distraction.
- To reduce the risk of accident, only use Audi connect services using a Wi-Fi hotspot when the vehicle is stationary.
- Do not use any Wi-Fi devices within range of the airbags while driving.
- As the driver, do not allow usage of the Wi-Fi hotspot to distract you from driving, as this could increase the risk of an accident.
- Do not use any wireless devices on the front seats within range of the airbags while driving.
Setting a Destination
Your MMI Navigation system has extraordinary capabilities to enhance your drive with user-definable views, routing selections and more. Get started with setting destinations and discover more as you become familiar with the interface.

1. Toggle the NAV/MAP switch up to open the Destination entry input screen.
2. Use the touchpad to write the address or Point of Interest name, or shift the control knob forward to open the spelller and enter information by manually selecting letters and numbers. Shift the knob down to close the spelller.
3. Available addresses will appear as information is entered, filtering to show only addresses meeting the currently entered information.
4. Select appropriate address, then select Start route guidance.

Additional destination features can be seen by pressing the left control button.

Cancel Route Guidance
- Toggle the NAV/MAP switch to display the Destination entry screen and select Delete destination.
- Or press the TALK button and say “Cancel route guidance” after the beep.

Alternative Routes
The Navigation system can display additional alternative routes based on speed, economy and traffic congestion. When this feature is enabled, alternative routes will always be displayed when route guidance is active.

To enable Alternative routes:
- Select the NAV/MAP function.
- Press the right control button and choose Navigation settings.
- Select Show alternative routes to place a check mark in the box to enable this feature.

To select Alternative routes while route guidance is active:
- Select the right control button to choose Show alternative routes.
- Up to three route suggestions will be displayed and can be selected via the control knob (Route type: fast, fast alternative, economic route).

Additional Settings
Additional settings can be configured within the Options menu using the right control button.
- Map Settings include display settings to change between Standard and Google Earth view as well as 2D and 3D modes.
- Route criteria allows you to set the mode of travel to include or avoid roads such as HOV lanes, Toll roads and more.
- Voice guidance allows you to configure responses from Complete to Shortened, along with voice guidance volume.

You can have Aud feature information on demand with the myAudi 3D app, which delivers video demos for your Audi. Download the iOS app now and put Audi knowledge in your pocket.

*Requires iOS 7.0 or later and available on iPad® only.

Warning: Navigation
- The demands of traffic require your full attention.
- Avoid all traffic laws when driving.
- The route calculated by the Navigation system is a recommendation for reaching your destination. Obey traffic lights, stopping restrictions, one-way streets, lane change restrictions, etc.
- Adjust the volume of the audio system so that signals from outside the vehicle, such as police and fire sirens, can be heard easily at all times.
- Only use the Infotainment system when traffic conditions permit and always in a way that allows you to maintain complete control of your vehicle.

Navigation
Climate Control & Cruise Control
MMI® Controls
Audi smartphone interface
Bluetooth® & Voice Recognition
The Climate Control system warns, cools and adjusts the humidity of the air in the vehicle interior. It functions most effectively when the windows are closed. Pressing any button will activate the Climate Control system.

1. Temperature and AUTO
   - Turn the knob to adjust the temperature and press to select AUTO. The temperature, fan speed and air distribution will be automatically adjusted. AUTO is turned off if any other climate control button is pressed.

2. Fan and A/C
   - Adjust the fan speed by rotating the knob. Press to turn AC on or off.

3. Air Distribution and Recirculation
   - Turn the knob for windshield, footwell or panel air distribution. Arrows in the display indicate airflow distribution. Press to select manual air recirculation. Auto recirculation may be set in the Infotainment system.

4. OFF
   - Press to turn the Climate Control system off. It also stops outside air from entering the cabin. Pressing any button will reactivate the Climate Control system.

#### Defrost
5. MAX Defrost
   - Press to clear the windshield and side windows of fog or frost. Fan speed and temperature will be regulated automatically. A/C may activate. Once clear, select AUTO or manually adjust the settings.

6. Rear Window Defogger
   - Activates an electric heater embedded in the rear glass. Will automatically turn off within 10-20 minutes.

#### Seat Heating
7. When switched on, heating is at the highest level. To reduce the temperature, press again for medium or low.

---

### Cruise Control

**Activate**
- To activate, pull the control stalk toward you (ON position).

**Set Cruising Speed**
- At your desired speed, press the SET button at the end of the stalk. The set speed, along with CRUISE, is shown in the Virtual Cockpit.

**Changing Speed**
- There are several ways to change your speed:
  - Accelerate or decelerate, then press the SET button again.
  - Push the stalk up or down one level to increase/decrease speed in 1 mph increments.
  - Push the stalk up or down two levels to increase/decrease speed in 5 mph increments.

**Warnings: Cruise Control**
- Always pay attention to the traffic around you when the Cruise Control is in operation. You are always responsible for your speed and the distance between your vehicle and other vehicles.
- For reasons of safety, Cruise Control should not be used in the city, in stop-and-go traffic, on winding roads and when road conditions are poor such as ice, fog, gravel, heavy rain and hydroplaning; you could have an accident.
- Switch the Cruise Control off temporarily when driving in turning lanes, highway exits or in construction zones.
- Please note that unnecessarily “testing” your foot on the accelerator pedal prevents the Cruise Control from functioning. This is due to the control system being recalibrated by the driver’s acceleration.
- If a brake system malfunction such as overheating occurs when the Cruise Control system is switched on, the braking function in the system may be switched off. The rest of the Cruise Control system functions remain active as long as indicator light is on.
- You should only resume the saved speed if it is not too high for existing traffic conditions. Otherwise you risk an accident.

**Warnings: Cruise Control**
- For reasons of safety, Cruise Control should not be used in the city, in stop-and-go traffic, on winding roads and when road conditions are poor such as ice, fog, gravel, heavy rain and hydroplaning; you could have an accident.
- Switch the Cruise Control off temporarily when driving in turning lanes, highway exits or in construction zones.
- Please note that unnecessarily “testing” your foot on the accelerator pedal prevents the Cruise Control from functioning. This is due to the control system being recalibrated by the driver’s acceleration.

### Climate Control & Cruise Control

**MMI® Controls**

**Audi smartphone interface**

**Bluetooth® & Voice Recognition**
MIM® Controls

Center Console
The Audi Multi Media Interface (MIM®) can be controlled from the center console as well as the steering wheel controls. There are input redundancies to allow you to access MIM functions in a way that best suits you.

1. MIM Control Knob and Touchpad
The rotary pushbutton/touchpad allows you to browse menus and zoom in and out of map views by rotating the knob and select items by pressing the knob. Enter alphanumeric information by writing with your finger on the touchpad. The MIM will display your entry.
   - To enter a space, swipe left-to-right. To delete a character, swipe right-to-left.
   The knob can also be shifted in four directions:
   - Up: Opens the speaker to enter alphanumeric information (e.g., Navigation address).
   - Down: Closes the speller.
   - Left/Right: Opens Selection and Options menus, same as control buttons.

2. Control Buttons
   - Left: Left control button opens the Selection menu to call up further functions for individual menu items (e.g., Radio).
   - Right: Right control button opens the Options menu to select and confirm specific functions for individual menu items.

3. NAV/MAP and TEL Function Switch
   - NAV/MAP: Toggle up repeatedly on the NAV/ MAP to switch the display between Navigation input mode and Map mode.
   - TEL: Toggle down to enter the Telephone menu to access the Contact directory.

4. RADIO and MEDIA Function Switch
   - RADIO: Toggle up repeatedly to move through radio bands (AM, FM, SAT) along with Preset stations.
   - MEDIA: Allows you to select auxiliary devices and manage music and video content in folders, playlists and tracks.
   - Toggle down repeatedly to move through the available Media sources (Bluetooth, SD, DVD, etc.).

5. MENU
   - Opens the main menu in a given function (e.g., Vehicle, Radio, Media, Telephone, Navigation, Audi connect, etc.).

6. BACK
   - Moves back through the menu hierarchy in reverse order of your recent selections.
   - When entering text, pressing BACK will delete a character. Pressing and holding will remove all characters on a line.

Steering Wheel MMI Controls
1. Tab Arrows
   - Switch between available functions in the Audi Virtual Cockpit.

2. Control Buttons
   - Left/right control buttons operate the same as the control buttons in the MMI console.

3. Thumbwheel
   - Use to move through menus in the Audi Virtual Cockpit. Press thumbwheel to choose selections.
   - Also zooms map in NAV view.

4. VIEW
   - Switches between Sport/Classic and Expanded view in Audi Virtual Cockpit.

Steering Wheel Audio Controls
1. Voice Recognition
   - Press to activate Voice Recognition. Speak available command after confirmation tone.
   - Press and hold to cancel Voice Recognition.

2. Telephone
   - Press to answer or end a phone call. Press to display call list when there is no active call.

3. Programmable Button
   - Allows selection of a custom command defined by the user. To change function, select MENU button ➤ Vehicle ➤ left control button ➤ Vehicle settings ➤ Steering wheel button.

4. Advance and Replay
   - Pressing the forward arrow advances to the next track or radio station. Back arrow returns to the previous track or station. Pressing and holding will fast forward or rewind an audio track.

5. BACK Arrow Button
   - Operates the same as the BACK button in the MMI console.

6. Thumbwheel
   - Turn volume up or down. Press to mute or pause. Press again to unmute or play.

7. NAV
   - While route guidance is active, pressing will repeat the last navigation cue.

MIM® Controls
Audi smartphone interface
Bluetooth® & Voice Recognition

[Warning: Multi Media Interface (MIM®)]
- Adjust the volume of the audio system to that signals from outside the vehicle, such as police and the sirens, can be heard easily at all times.
- Only use the Infotainment system when traffic conditions permit and always in a way that allows you to maintain complete control over your vehicle.
Connecting
You can connect your Apple® or Android™ phone to the MMI. Certain content on your phone will be adapted to the Infotainment system display while driving and can be operated through the MMI controls.1 This gives you the benefit of the familiarity with your phone’s system combined with the MMI display.

To connect:
1. The vehicle must be stationary with the ignition on.
2. Connect your smartphone with a manufacturer approved cable to either USB port. Before using Android Auto®, you must download the Android Auto app from the Google Play™ Store. You must have an active Google account and internet connection.
3. You will see a connection prompt in the MMI.
4. Using the control knob, select to activate the device.
5. Respond to prompts as necessary from both the MMI, as well as the smartphone.

Once connected, you have access to the apps displayed on the screen. Select the apps using the MMI control knob.

*Not all apps will work with the Audi smartphone interface, and some functions may be limited. The functions that can be used depend on the operating system version and the software of the app being used. Some MMI functions may not be available when Apple CarPlay® or Android Auto® is active. Refer to apple.com/us/ios/carplay or android.com/auto for additional information.

Apple CarPlay® Operation
- If a Bluetooth connection is active when CarPlay® is activated, it will disconnect Bluetooth and use CarPlay exclusively for telephone connectivity.
- MMI control knob:
  - Turn the knob and press to open selected apps and control functions within that app.
  - Shift the knob down or up to change levels to access apps more quickly. Shift the control knob to the right to advance to the next screen.
  - Press and hold the BACK button to return to the active app menu.

Android Auto® Operation
- If you had not previously paired your phone with Bluetooth, it will be paired automatically with your MMI system.*
- MMI control knob:
  - Shifting the knob down will change usage from within an open app to allowing you to select another app.
  - Turning the knob and pressing will open the selected app.
  - Shifting left or right within an active app will open additional features or settings. For example, shifting to the right will activate Talk to Google.

**The Android phone may prompt to acknowledge additional requests.

Access to Apple CarPlay® and Android Auto®
If you have an active Apple CarPlay or Android Auto session and have accessed another MMI function and wish to return:
1. Select the MENU function button.
2. Scroll using the MMI control knob to select Apple CarPlay or Android Auto from the Menu.

Connection Manager
If your device is presently using MMI Media as the source and you wish to activate Apple CarPlay or Android Auto instead:
1. Select the MENU function button.
2. Scroll using the MMI control knob to select Audi smartphone interface. This will open the Connection Manager.
3. To activate, scroll to Audi smartphone and press the control knob, and place a check in the box for your device. Remove the check to deactivate from the Audi smartphone interface.

The Connection Manager can also be accessed by selecting Menu ➔ Settings ➔ Connection Manager.

Note:
- Always keep a safe following distance to the car in front and do not drive while distracted. Audi smartphone interface features require compatible device, operating systems, and mobile app. CarPlay® requires iPhone 5 or newer. For Android Auto®, visit www.android.com/auto on your smartphone browser to see if it is compatible. Siri® must be enabled on device to activate Siri® features. Standard terms and data usage rates apply. Mobile app provider for terms and privacy. Android Auto® is a trademark of Google Inc. Apple CarPlay® is a trademark of Apple Inc.

**Warnings: Audi smartphone interface
- Only use the Infotainment system when traffic permits and always in a way that allows you to maintain control over your vehicle at all times.
- Always be aware of your surroundings.
- Always keep the owner’s literature handy so that you can find it easily if you have questions. Driving requires your complete and undivided attention. As the driver, you have complete responsibility for safety in traffic. Never operate mobile devices while driving, because this increases the risk of an accident.
Pairing a Compatible Device
Bluetooth pairing is a one-time procedure. Once paired, your phone will automatically connect when you start your vehicle. Your contact list will automatically synchronize, allowing you to access contacts and make and receive calls through the Bluetooth system. For information regarding phone compatibility, visit audiussa.com/bluetooth.
1. Switch ignition to Accessories mode.
2. Activate your phone’s Bluetooth and set to pairing or discovery mode.
3. In the list of available devices, select the Audi MMI listing for the vehicle.
4. When the prompt appears in the MMI, select Accept using the control knob.
5. Confirm the PIN matches and select Yes in response to the prompt.
6. Select Pair on your device.
Two active phones can be connected simultaneously to receive calls through the MMI, giving you primary and secondary devices. To change the order of devices:
1. Select the TEL function.
2. Press the right control button.
3. Select Switch main and additional phone.
4. This will also make the contact list from the new primary phone active.
If the primary phone is in use, the secondary phone will only receive calls from the phone, not the MMI system.
*Some phones may require an additional response to prompts to allow full connectivity. Once paired, the mobile phone symbol and network strength bars will appear at the bottom of the MMI screen.

Wireless Audio Streaming
Streams music wirelessly via Bluetooth connection. To connect a device (or additional devices) follow the pairing instructions above. Once paired, Bluetooth Audio playback is established. To use audio, select the Media Function button >> select Bluetooth as the source using the left control button.
Choose from Artists, Albums, Songs and more.

Note:
Bluetooth® Pairing
Apple products connected via the USB cable will enable Bluetooth Audio. To reestablish Bluetooth audio, disconnect the USB cable and select the Media Function button >> select Bluetooth as the source using the left control button.

Warning: Bluetooth® Pairing
- Adjust the volume of the audio system so that signals from outside the vehicle, such as police and fire sirens, can be heard readily at all times.
- Only use the Bluetooth system when traffic conditions permit and always in a way that allows you to maintain complete control over your vehicle.
- Pedestrians expect that cell phones can interfere with the function of pedestrians.
- Always maintain a minimum distance of 10 feet separating between the cell phone antenna and the pedestrian.
- Do not carry the cell phone in a pocket directly over the perimeter when the phone is switched on.
- Switch the cell phone off immediately if you detect it may be interfering with the perimeter.
- Do not use the Voice Recognition system in emergencies, because your voice may change in stressful situations. If the voice system is confusing, the speaker may adjust the voice output.
- Switch your cell phone on and if there is a risk of an explosion, these locations are not always clearly marked. This may include gas stations, fuel and chemical storage facilities, or transport vehicles, or locations where flammable gases or vapor in vehicles or buildings may be present because of their use, storage, or transportation, such as hospitals, sawmills or metal may be present in the area.
- The system may trigger false alerts.

Voice Recognition
- Direct your full attention to driving. As the driver, you must complete responsibility for safety in traffic. You must use the functions in such a way that you always maintain complete control over your vehicle in all traffic situations.
- Do not rely only on your phone when it comes to essential communication.
- Always follow the instructions given by emergency personnel during an emergency call and only the call the phone to instruct you to do so.
- Do not use the Voice Recognition system in emergencies because your voice may change in stressful situations. It may not take longer to the number on the keypad than it did if you had used a phone straight away.

Warning: Voice Recognition
- Direct your full attention to driving. As the driver, you must complete responsibility for safety in traffic. You must use the functions in such a way that you always maintain complete control over your vehicle in all traffic situations.
- In some jurisdictions, your vehicle’s electronic security system may lock if you are not wearing your seatbelt at all times.

Warning: Voice Recognition
- Direct your full attention to driving. As the driver, you must complete responsibility for safety in traffic. You must use the functions in such a way that you always maintain complete control over your vehicle in all traffic situations.
**Voice Recognition**

**Bluetooth Pairing**

Bluetooth pairing is a simple procedure. Once paired, your phone automatically connects whenever you plug your car's USB into your phone.

1. Open the Bluetooth app on your phone.
2. If you are not already connected, select “Add Bluetooth Device.”
3. Select the device you wish to pair with your phone.
4. Follow the prompts to complete the pairing process.

**Setting a Destination**

1. Open the Maps app on your device.
2. Tap the search bar, enter your destination address, and tap Search.
3. Tap the Directions button.
4. Follow the prompts to set your destination.

**Call by Name**

When using Voice Recognition, speak in a normal voice, less formal, and in a conversational manner.

1. Press the “Call” button, and speak clearly.
2. If your device is already connected with Bluetooth and plugged into the port, the call will automatically connect.

**External Voice Recognition**

Depending on your device, you can activate Siri, Google Now, or a similar voice assistant once paired when voice control is enabled.

1. Press the “Call” button, and speak your request.
2. Siri will listen for your voice commands.

**External Voice Recognition**

- Siri
- Google Now
- Amazon Alexa

**Audio Control**

- Siri
- Google Now
- Amazon Alexa

**Setting a Destination**

1. Open the Maps app on your device.
2. Tap the search bar, enter your destination address, and tap Search.
3. Tap the Directions button.
4. Follow the prompts to set your destination.

**Bluetooth Pairing**

Bluetooth pairing is a simple procedure. Once paired, your phone automatically connects whenever you plug your car's USB into your phone.

1. Open the Bluetooth app on your phone.
2. If you are not already connected, select “Add Bluetooth Device.”
3. Select the device you wish to pair with your phone.
4. Follow the prompts to complete the pairing process.

**Setting a Destination**

1. Open the Maps app on your device.
2. Tap the search bar, enter your destination address, and tap Search.
3. Tap the Directions button.
4. Follow the prompts to set your destination.

**Call by Name**

When using Voice Recognition, speak in a normal voice, less formal, and in a conversational manner.

1. Press the “Call” button, and speak clearly.
2. If your device is already connected with Bluetooth and plugged into the port, the call will automatically connect.

**External Voice Recognition**

Depending on your device, you can activate Siri, Google Now, or a similar voice assistant once paired when voice control is enabled.

1. Press the “Call” button, and speak your request.
2. Siri will listen for your voice commands.

**External Voice Recognition**
