Introduction to your TT

Audi connect®

Cruise Control

Navigation

Climate Control

Audi smartphone interface

Bluetooth®, Voice Recognition & MMI®
1. Engine Start/Stop
   With key fob in vehicle, pressing this button starts the engine and shuts the engine off when vehicle is in Park.

2. MMI® Controls and Touchpad
   The control knob/touchpad with integrated joystick allows you to browse menus, zoom in and out of map views and select items by pressing the knob. Control and function buttons allow you to select and personalize settings. The MMI touchpad allows you to input information by writing letters or characters.

3. Infotainment Control
   Control for infotainment system on/off and volume control. Tilting the knob to right or left will move through tracks or preset radio stations. Brief press mutes audio. Press and hold will turn system off.

4. Electromechanical Parking Brake
   Pulling up on the switch engages the parking brake. To release, depress the brake pedal and push the switch down.

5. Climate Control
   Set preferences for temperature, airflow distribution and recirculation. Use in AUTO or Manual mode.

6. Voice Recognition
   Press the TALK button on the steering wheel to activate Voice Recognition in the MMI.

7. USB Ports
   USB Ports located in the storage area, allow for connections via the MMI, Audi smartphone interface and device charging.

8. Media
   Select the MEDIA function to access available media from connected sources (e.g., Bluetooth audio, USB, and more).

9. Steering Wheel Controls
   Assist with navigating through a variety of vehicle functions. To select a menu item, press the thumbwheel.

10. Audi Virtual Cockpit (Instrument Cluster)
    Displays vehicle system and function information. Menu selections can be accessed using either the MMI control knob or the multifunction steering wheel controls.

11. Cruise Control
    The stalk allows you to set a preferred speed to be maintained above 15 mph.
Wi-Fi Configuration

Audi connect can provide you with Google Earth™, Google Voice™ Local Search, Wi-Fi Hotspot, Online Services (fuel prices, weather information, travel information, personalized feeds and more) and myAudi Destinations*.

1. Select the TEL function.
2. Select the right control button.
3. Select Wi-Fi Settings; ensure that Wi-Fi mode is on.
4. Select Network key and enter an eight character long password, or use the default password. Use the touchpad to enter characters or shift the control knob forward to open the spellers.
5. When password has been set, press any button to save password and exit the screen.

Points of Interest: Online Destination Search

You can also perform an Online Point of Interest Search using Google Voice™ Local Search.

1. Press the TALK button on the steering wheel.
2. After tone, say “Google Search” or “Online destinations” followed by a keyword such as “Coffee shop” (e.g., bookstore, museum, pizza, etc.).
3. Make your selection from the displayed list:
   ▶ By speaking the line number.
   ▶ Or saying “Next page” to view additional results.
4. After tone, say “Start route guidance” to begin navigation to your destination, or say “Call,” which will call the location.

*Always pay careful attention to the road, and do not drive while distracted. Audi connect features and technologies are optional, may require an additional subscription with separate terms and conditions, and should be used only when it is safe and appropriate. The Wi-Fi feature is intended for passenger use only. Audi connect services are only available where there is mobile network coverage. You can obtain more information from your current service provider. Vehicle must be stationary with the parking brake engaged while performing this operation. Cellular connectivity is dependent on available cellular signal. Enter destinations while vehicle is stationary and away from traffic. This feature is available on select trim lines.

Warnings: Audi connect®

- Only use the Infotainment system when traffic conditions permit and always in a way that allows you to maintain complete control over your vehicle.
- To reduce the risk of an accident, only use Audi connect services when the vehicle is stationary.
- Do not use the system while driving. 
- It is only safe to use tablets, laptops, mobile devices and other similar devices when the vehicle is stationary.
- Children could be thrown around the inside of the vehicle in a crash causing serious injuries. Store these types of devices securely while driving.
- To reduce the risk of an accident, use Audi connect services with a Wi-Fi Hotspot in the rear seat while the vehicle is in motion or only when the vehicle is stationary.
- As the driver, do not allow use of the Wi-Fi Hotspot to distract you from driving, as this could increase the risk of an accident.
- Do not use any wireless devices on the front seats within range of the airbag while driving.
Cruise Control

Activate
To activate, pull the control stalk toward you to put it in the ON position.

Set Cruising Speed
At your desired speed, press the SET button at the end of the stalk. The set speed and the illuminated CRUISE indicator light are shown in the Audi Virtual Cockpit.

Changing Speed
There are several ways to change your speed:
- Accelerate or decelerate, then press the SET button again.
- Push the stalk up or down one detent to increase/decrease speed in 1 mph increments.
- Push the stalk up or down to the second detent and release to increase/decrease speed in 5 mph increments.
- Hold the stalk up or down to increase/decrease speed; release when desired speed is reached.

Cancel/Resume
1. To cancel, press the brake pedal or push the stalk slightly away from you to the CANCEL position.
2. The CRUISE light will go off.
3. To resume, pull the stalk toward you; you will return to your set speed.

Your most recently set speed remains in memory until you turn Cruise Control or your Audi off.

Warnings: Cruise Control
- Always pay attention to the traffic around you when the Cruise Control system is in operation. You are always responsible for your speed and the distance between your vehicle and other vehicles.
- For safety reasons, Cruise Control should not be used in the city, in heavy traffic, on winding roads and when road conditions are poor (such as ice, snow, gravel, heavy rain and hydroplaning). Because this increases the risk of an accident.
- Switch the Cruise Control off temporarily when driving in heavy traffic, at night or in construction zones.
- Please note that unexpectedly “opening” your foot on the accelerator pedal prevents the Cruise Control from braking. This is because pressing the accelerator pedal overrides the Cruise Control system.
- If a brake system malfunction such as overbraking occurs when the Cruise Control system is switched on, the braking function in the system may be switched off. The rest of the Cruise Control system functions remain active as long as the CRUISE indicator light is on.
- You should only resume the stored speed if it is not too high for existing traffic conditions. Otherwise you can increase the risk of an accident.

Audi Navigation

Setting a Destination

Your MMI Navigation system has extraordinary capabilities to enhance your drive with user-definable views, routing selections and more. Get started with setting destinations and discover more as you become familiar with the interface.

1. Toggle the NAV/ MAP switch to open the Destination entry input screen.
2. Use the touchpad to write the address or Point Of Interest name.
   - Or shift the control knob forward to open the speller, and enter information by manually selecting letters and numbers. Press the BACK button to return to writing mode.
3. Available addresses will appear as information is entered, filtering to show only addresses meeting the currently entered information.
4. Select appropriate address, then select Start route guidance.
   - Additional destination features can be seen by pressing the left control button.
   - To cancel route guidance, select the right control button and select Cancel route guidance from menu.

Alternative Routes

The Navigation system can display additional, alternative routes based on speed, economy and traffic congestion. When this feature is enabled, alternative routes will always be displayed when route guidance is active.
To enable Alternative routes:
1. Select the NAV/ MAP function.
2. Press the right control button and choose Navigation settings.
3. Select Show alternative routes to place a check mark in the box to enable this feature.
To select Alternative routes while route guidance is active:
1. Press the right control button \(\Rightarrow\) choose Show alternative routes.
2. If available, up to three route suggestions will be displayed and can be selected via the control knob (Route type: fast, fast alternative, economic route).

Additional Settings

Additional settings can be configured within the Options menu using the right control button.
- Map settings include display settings to change between Standard and Google Earth view as well as 2D and 3D modes.
- Route criteria allows you to set the mode of travel to include or avoid roads such as MVD lanes, Toll roads, and more.
- Voice guidance allows you to configure responses from Complete to Shortened, along with voice guidance volume.

Climate Control

Audi smartphone interface

Bluetooth®, Voice Recognition & MMI®
Automatic Climate Control

AUTO Setting
The AUTO setting of your Climate Control system will help the cabin maintain your selected temperature by regulating the temperature, fan speed and airflow. When AUTO is selected, A/C will come on automatically to condition and dehumidify the air. Changing the air distribution or fan speed will turn off the AUTO function.

System Controls
The three combination knobs/vent control fan speed, temperature, air distribution and airflow.

1. Temperature/AUTO
   Select an appropriate temperature by turning the knob left for cold and right for warm. Press the AUTO button to activate automatic temperature control.

2. Fan and A/C
   Turn the knob to adjust fan speed. Turning fan speed all the way to the left will turn off the fan. Press the center button to turn A/C on or off.

3. Air Distribution/Recirculation
   Turn the knob for windshield, footwell or panel vent distribution. Arrows in the button display will indicate distribution of airflow. Press the button to recirculate air in the cabin and prevent outside air from entering.

4. Airflow
   Turn the outer ring of the vents to adjust direction. To adjust airflow intensity, move the lever below the vent. To shut off airflow, move the lever all the way to the left.

   *When A/C is off, the air is neither cooled nor dehumidified, and windows may fog as a result.

Defrost
5. MAX Defrost
   Clears the windshield of fog or frost as quickly as possible. Air will be directed to the windshield vents, and the temperature is regulated automatically. Once clear, select AUTO or manually adjust the settings.

6. Rear Defrost
   Activates an electric heater embedded in the glass. The heater will turn off automatically within 10-20 minutes, depending on the outside temperature.

Seat Heating
7. To warm up quickly on a cool morning, turn on your heated seats. Press the knob for high, medium or low seat heating. To adjust TT Roadster optional neck-level heating system, turn the knob to set the level from low, medium, high or to off.

Warnings: Climate Control
- Poor visibility can lead to accidents.
- For safety driving, keep all windows free of ice, snow and fog.
- Become familiar with knobs and knurls of the Climate Control system, especially with the defrosting and defogging function.
- In extreme temperatures to below freezing, only use the windshield washer system after the windshield has been warmed by the Climate Control system.
- You should not use the deicer made for an extended period since it can attack paint. With the deicer switched on, the windows can fog up, which increases the risk of an accident.
- Individuals with reduced sensitivity to pain or temperature could develop burns when using the seat heating function. To reduce the risk of injury, these individuals should not use seat heating.

Climate Control

Audi smartphone interface

Bluetooth®, Voice Recognition & MMI®
Connecting
You can connect your Apple® or Android® phone to the MMI. Certain content on your phone will be adapted to the Infotainment system display while driving and can be operated through the MMI controls*. This gives you the benefit of the familiarity with your phone’s system combined with the MMI display.
To connect:
1. The vehicle must be stationary with the ignition on.
2. Connect your smartphone with a manufacturer approved cable to either USB port. Before using Android Auto®, you must download the Android Auto app from the Google Play® Store. You must have an active Google account and internet connection.
3. You will see a connection prompt in the MMI.
4. Using the control knob, select to activate the device.
5. Respond to prompts as necessary from both the MMI, 4 as well as the smartphone.
Once connected, you have access to the apps displayed on the screen. Select the apps using the MMI control knob.
*Not all apps will work with the Audi smartphone interface, and some functions may be limited. The functions that can be used depend on the operating system version and the software of the app being used. Some MMI functions may not be available when Apple CarPlay® or Android Auto® is active. Refer to apple.com/us/ios/carplay/ or android.com/auto/ for additional information.

Apple CarPlay® Operation
- If a Bluetooth connection is active when CarPlay® is activated, it will disconnect Bluetooth and use CarPlay exclusively for telephony connectivity.
- MMI control knob:
  - Turn the knob and press to open selected apps and control functions within that app.
  - Shift the knob down or up to change levels to access apps more quickly. Shift the control knob to the right to advance to the next screen.
  - Press and hold the BACK button to return to the active app menu.

Android Auto® Operation
- If you had not previously paired your phone with Bluetooth, it will be paired automatically with your MMI system**.
- MMI control knob:
  - Shifting the knob down will change usage from within an open app to allowing you to select another app.
  - Turning the knob and pressing will open the selected app.
  - Shifting left or right within an active app will open additional features or settings. For example, shifting to the right will activate Talk to Google.

**The Android phone may prompt to acknowledge additional requests.

Access to Apple CarPlay® and Android Auto®
If you have an active Apple CarPlay® or Android Auto® session and have accessed another MMI function and wish to return:
1. Select the MENU function button.
2. Scroll using the MMI control knob to select Apple CarPlay® or Android Auto® from the Menu.

Connection Manager
If your device is presently using MMI Media as the source and you wish to activate Apple CarPlay® or Android Auto® instead:
1. Select the MENU function button.
2. Scroll using the MMI control knob to select Audi Smartphone Interface. This will open the Connection Manager.
3. To activate, scroll to Audi Smartphone and press the control knob, or a green check is placed to deactivate from the Audi smartphone interface.
   - The Connection Manager can also be accessed by selecting Menu ➞ Settings ➞ Connection Manager.

Note:
- Always pay careful attention to the road, and do not drive while distracted. Audi smartphone interface features require compatible device, operating systems, and mobile app. CarPlay® requires iPhone or an iOS® for Apple CarPlay®. Visit g.co/audicarplay on your smartphone browser to see if it is compatible. Siri must be enabled on device to activate Siri features. Standard text and data usage rates apply. See mobile app provider for terms and privacy. Android Auto® is a trademark of Google Inc, Apple CarPlay® is a trademark of Apple Inc.
- Always keep the owner’s literature handy so that you can find it easily if you have questions. Driving requires your complete attention. As the driver, you have complete responsibility for safety in traffic. Never operate mobile devices while driving, because this increases the risk of an accident.
Pairing a Compatible Device

Bluetooth pairing is a one-time procedure. Once paired, your phone will automatically connect whenever you start your vehicle.* Your contact list will automatically synchronize, allowing you to access contacts and make and receive calls through the infotainment system. For information regarding phone compatibility, visit audiota.com/bluetooth.

1. Switch ignition to Accessories mode.
2. Activate your phone’s Bluetooth and set to pairing or discovery mode.
3. In the list of available devices, select the Audi MMI listing for the vehicle.
4. When the prompt appears in the MMI, select Accept using the control knob.
5. Confirm the PINs matches and select Yes in response to two prompts.
6. Select Pair on your device.

*Some phones may require an additional response to prompts to allow full connectivity.

Two active phones can be connected simultaneously to receive calls through the MMSI, giving you primary and secondary devices. To change the order of devices:
1. Select the TEL function.
2. Press the right control button.
3. Select Switch main and Additional Phone.
4. This will also make the contact list from the new primary phone active.
   If the primary phone is in use, the secondary phone will only receive calls from the phone, not the MMSI system.

Voice Recognition

Call by Name
When using Voice Recognition, speak in a normal voice, facing forward. Keep cabin noise to a minimum.

1. Press the TALK button on the steering wheel. A beep will sound.
2. Say “Call” (name from directory) e.g. “Call John Smith”.
3. After system response, confirm request by saying, “Yes.” The number will be dialed. You may also say “Cancel,” to cancel the call.

- If multiple numbers are stored for a given contact, the system will ask which you wish to dial. To avoid this, indicate it in your initial request e.g., “Call John Smith, mobile.”

Refer to your Owner’s Manual for additional commands.

Wiring and Bluetooth Pairing

- Only use the infotainment system when traffic permits and always in a way that allows you to maintain complete control over your vehicle.
- Pedestrians warn that cell phones can interfere with the function of pedestrian. Always maintain a minimum distance of 20 centimeters between the cell phone antenna and this pedestrian.
- Do not carry the cell phone in a pocket directly over the pedestrian when the phone is switched on.
- Switch the cell phone off in traffic. If you suspect it may be interfering with the pedestrian.
- Do not use the Voice Recognition system in emergencies because your voice may change in stressful situations. It may take longer to dial the numbers or the system may not be able to dial all digits. This emergency mechanism prevents this.
- Only use the infotainment system when traffic permits and always in a way that allows you to maintain complete control over your vehicle.
- Direct your full attention to driving. As the driver, you have complete responsibility for safety in traffic. Only use the functions in such a way that you always maintain complete control over your vehicle in all traffic situations.
- Do not remove or use this equipment in traffic situations. It may take longer to dial the number or the system may not be able to dial it all. Dial the emergency number manually.

Warnings: Multi Media Interface (MMSI)

- Only use the infotainment system when traffic permits and always in a way that allows you to maintain complete control over your vehicle.
- Adjust the volume of the audio system so that signals from outside the vehicle, such as police and fire sirens, can be heard easily at all times.

Note:
Bluetooth Pairing
Apple products connected via the USB cable will disable Bluetooth audio. To reestablish Bluetooth audio, disconnect the USB cable and select Pairing on the Bluetooth device. Bluetooth pairing requires service by a dealer. See your phone’s Owner’s Manual for specific Bluetooth activation instructions. Vehicle must be stationary with the parking brake engaged while performing this operation. Power on. The Bluetooth symbol appears on the MMSI’s screen along with network strength bars, and it will be displayed whenever a paired phone is connected to the infotainment system.
## Indicator Lights

For additional information on indicator lights, refer to your vehicle's Owner's Manual.
