Climate Control

Bluetooth®
1. MMI® Controls
   MMI controls consist of a control knob and function buttons. Turn the control knob to the left or right and press it to select a menu in the MMI.

2. Navigation
   If equipped with navigation, get started with setting destinations and discover more as you become familiar with the interface.

3. Automatic Climate Control
   When AUTO is selected, the system maintains your temperature selection by regulating air temperature, fan speed and airflow.

4. Media/Audi connect® (CD/DVD/SD card)
   Press the MEDIA button to access available media from connected sources (e.g., Bluetooth audio, SD card, DVD, Jukebox and iPod connected via the Audi Music Interface).

5. MMI® Display
   The MMI screen displays MMI menus and multi-media information, including Voice Recognition commands, media selections and radio information. The MMI Display is fixed and does not close.

6. Windshield Wipers
   From the OFF position, move the stalk up one click for rain-sensing wipers, up two clicks for low-speed continuous wipe and up three clicks for high-speed continuous wipe.

7. Driver Information System (DIS)
   The DIS provides important driver information, including trip computer data, outside temperature and vehicle alerts.

8. DIS Controls
   DIS Controls, The Driver Information System is controlled with the multifunction steering wheel controls. To select a menu item, turn and press the thumbwheel.

9. Cruise Control
   To activate, pull the stalk toward you. Braking or pushing the stalk away slightly will cancel Cruise Control.

10. Voice Recognition
    Press the TALK button on the steering wheel to activate Voice Recognition in the MMI.

11. Automatic Luggage Compartment Lid
    Pull this switch to open hatch. With the ignition on, pull and hold the driver’s door hatch switch until the hatch is closed. Releasing the switch will interrupt the closure of the trunk.

12. USB Charge-Only Port (Not shown)
    The USB charge-only port is located on the center console, and can be used to charge smartphones, tablets, and other devices.

Cruise Control

Activate
To activate, pull the control stalk toward you to put it in the ON position.

Set Cruising Speed
At your desired speed, press the SET button at the end of the stalk. The set speed and the illuminated CRUISE indicator light are shown in the Driver Information Display.

Changing Speed
There are three ways to change your speed:

- Accelerate or decelerate, then press the SET button.
- To increase/decrease speed in 1 mph increments, tap the stalk up or down.
- Hold the stalk up or down to increase/decrease speed in 5 mph increments; release when desired speed is reached.

Cancel/Resume
1. To cancel, press the brake pedal or push the stalk slightly away from you to the CANCEL position.
2. The CRUISE indicator light will go off.
3. To resume, pull the stalk toward you; you will return to your set speed.

Your most recently set speed appears as a small icon in the Driver Information Display. It remains in memory until you turn Cruise Control or your Audi off.

Warnings: Cruise Control
- Always pay attention to the traffic around you when the Cruise Control system is in operation. You are always responsible for your speed and the distance between your vehicle and other vehicles.
- For safety reasons, Cruise Control should not be used in the city, in stop-and-go traffic, on winding roads and when road conditions are poor (such as icy, fog, gravel, heavy rain and hydroplaning), because this increases the risk of an accident.
- Switch the Cruise Control off temporarily when driving in turning lanes, highway exits or in construction zones.
- Please note that “resting” your foot on the accelerator pedal unintentionally can result in acceleration that overrides the Cruise Control system.
- You should only resume the stored speed if it is not too high for existing traffic conditions. Otherwise you can increase the risk of an accident.

Navigation

Setting a Destination

Your MMI Navigation system has extraordinary capabilities to enhance your drive with user-definable views, routing selections and more. Get started with setting destinations and discover more as you become familiar with the interface.

1. Press the NAV function button.
2. Select the Destination control button.
3. Select Address from the Navigation menu.
4. Select City/Zip code field and enter the information.
5. Continue by entering the Street and House number.
6. When complete, select Start route guidance.

Additional Settings

Selecting Route criteria allows you to change the way the route is calculated based on current traffic situations, such as heavy traffic, construction or road closures. To change route criteria:

1. Press NAV function button.
2. Select Settings control button.
3. Select Route criteria.
   - Auto reroute automatically adjusts your route based on SiriusXM® Traffic information.
   - Alternative routes displays multiple route options; Short, Fast or Mixed.

Note:
Always pay careful attention to the road and do not drive while distracted. Enter destinations while vehicle is stationary away from traffic. When pressing the Wax button, the last navigation announcement will be repeated.

Voice Recognition

Call by Name

1. Press the TALK button on the steering wheel. A beep will sound.
2. Say “Call” <Name from directory> (e.g., “Call John Smith”).
3. To confirm the request, say “Yes”. The number will be dialed.
4. To end a call, press the left thumbwheel on the steering wheel.
   - If multiple numbers are stored for a given contact, the system will ask which number you wish to dial. When calling by name using Voice Recognition, you must say the name as it is stored in your phone book.

Setting a Destination

1. Press the TALK button on the steering wheel.
2. Say “Enter address.” (Other commands are available on the screen. See Owner’s Manual for complete list of commands.)
3. After the beep, speak the entire address; e.g., “Two-Zero-Two-Four Main Street, Los Angeles, California”. (Speak single digits.)
4. System will respond, “The list is being loaded”. It will repeat the address and then ask if you would like to start route guidance. After the beep say “Yes” and guidance will begin.

There are three options to cancel Voice Recognition:

- Simply say “Cancel” at the voice prompt.
- Press any button on the MMI controls.
- Or, press and hold the TALK button on the steering wheel until you hear “Cancel”.

Refer to your Owner’s Manual for additional Voice Recognition commands.

Individual Speech Training

1. Press the MENU function button to open the MMI menu.
2. Select Setup MMI control button.
4. Select Individual speech training.
5. Select Start speech training.

⚠️ Warnings: Voice Recognition
- Only use the Infotainment System when traffic conditions permit and always in a way that allows you to maintain complete control over your vehicle.
- Your full attention is required. As the driver, you have complete responsibility for safety in traffic. Only use the functions in a way that you always maintain complete control over your vehicle in all traffic situations.
- Do not use the Voice Recognition system in emergencies because your voice may change in stressful situations. It may take longer to dial the number or the system may not be able to dial it at all. Dial the emergency number manually.
Audi connect can provide you with Google Earth™, Google Voice™ Local Search, Wi-Fi Hotspot, Online Services (fuel prices, weather information, travel information, personalized feeds and more) and myAudi Destinations®.

1. Ensure the SIM card (provided by dealer) is present in the SIM slot.
2. Press the TEL function button.
3. Press the Settings control button.
4. Select Wi-Fi settings.
5. Then, select Wi-Fi active and choose Visible.
6. Select Password. Then create a password that is at least eight characters long. The default password can be used. Or a new password can be entered. Most devices use encryption type WPA2 as the default.
7. Select Apply settings to save your password.
8. On your device, search for Wi-Fi networks, select SSID and enter your password to establish a connection. You may connect up to eight wireless devices at one time.

To continue with Data Configuration
9. Press the BACK button, scroll to Data connection and select.
10. Select Without request. Press the BACK button to exit.

Online Destination Search

You can also perform an Online Point of Interest search using Google Voice™ Local Search.

1. Press the TALK button on the steering wheel.
2. After the beep, say “Online destinations” or “Google Search” followed by a keyword (e.g., coffee shop, bookstore, museum, pizza, etc.).
   - The system will respond with “retrieving requested information” and display a list.
3. Make your selection from the displayed list:
   - By speaking the line number.
   - Or saying “Next page” to view additional results.
4. After the beep, say “Start route guidance” to start the navigation to your destination.

*Always pay careful attention to the road and do not drive while distracted. Audi connect features and technologies are optional, may require an additional subscription with separate terms and conditions, and should be used only when it is safe and appropriate. The Wi-Fi feature is intended for passenger use only. Audi connect services are only available where there is mobile network coverage. You can obtain more information from your current service provider. Vehicle must be stationary with the parking brake engaged while performing this operation. Cellular connectivity is dependent on available cellular signal. Enter destinations while vehicle is stationary and away from traffic. This feature is available on select trim lines.

Note: Refer to your Owner’s Manual for additional commands. Cellular connectivity is dependent on available cellular signal.

Warnings: Audi connect®
- To reduce the risk of an accident, only use Audi connect services when road and traffic conditions permit.
- Only use Audi connect services with a Wi-Fi hotspot only in the rear seat when the vehicle is in motion or only when the vehicle is stationary to reduce the risk of an accident.
- Do not use in the vehicle while driving.
- Do not use any wireless device on the front seats within range of the antennas while driving.
- As the driver, do not allow usage of the Wi-Fi hotspot to distract you from driving, as this could increase the risk of an accident.

Climate Control

Bluetooth®
1. AUTO Setting
The AUTO setting of your Climate Control System will help maintain your selected cabin temperature by regulating air temperature, fan speed and airflow. Once activated, there is no need to alter the settings. When AUTO is selected, A/C will come on automatically to condition the air.

Synchronize Zones
Press and hold the AUTO button to synchronize both sides to the same temperature, fan speed and airflow. Synchronization is deactivated once the passenger temperature is changed.

2. Set Temperature
Temperature can be operated independently for the driver and front passenger.
- To increase or decrease the temperature by one degree, turn the temperature knob either one click left or one click right.
- To increase or decrease the temperature in larger increments, press and hold the temperature knob until the desired temperature is reached.

3. Seat Heating
Pressing the button switches the seat heating on at the highest setting (Sweat3). The LEDs indicate temperature level. Press the button again to reduce the temperature. To switch the seat heating off, press the button repeatedly until the LED turns off.

4. Fan Speed
Fan speed is the same for both zones. Fan speed can be adjusted by pressing the small fan or big fan icon buttons.

5. Recirculation
The recirculation function helps prevent outside air and odors from entering the cabin. It may also be used in conjunction with A/C to cool the cabin more quickly.

To switch on air recirculation mode:
- Press the recirculation button; the bottom LED light will illuminate.
- To turn on the automatic recirculation mode, press the button again; the top LED button will illuminate.
- The air quality sensor detects outside air pollutants and switches on automatically.
- Air recirculation switches on automatically when you reverse the vehicle while the engine is cold.

6. Air Distribution and Vents
Direct airflow to defrost, panel and floor vents or a combination by selecting the appropriate airflow button(s).

---

**Warnings:**
- Reduced visibility is dangerous and can cause accidents.
- For safe driving it is very important that all windows be free of ice, snow and condensation.
- Completely familiarize yourself with the proper use and function of the heating and ventilation system and especially how to defrost and defog the windshield.
- If the windshield or rear window is covered with snow and/or ice, use the defrost function to clear the windshield. After a short period of time, you can switch to the outside air mode.
- When this feature is enabled, the windows can fog up which increases the risk of an accident.
- Individuals with reduced sensitivity to pain or temperature could develop burns when using the seat heating function. To reduce the risk of injury, these individuals should not use seat heating.
Bluetooth® Pairing

Initial Setup

Bluetooth pairing is a one-time procedure. Once paired via Bluetooth, your phone will automatically connect when you start your vehicle and your phone’s contacts automatically synchronize, allowing you to retrieve contacts and make and receive calls through the Infotainment system. For more information regarding phone compatibility visit audiuss.com/bluetooth.

1. Switch ignition to Accessory mode.
2. Enable the Bluetooth module on your phone’s settings and set to pairing or search mode.
3. Select Audi MMI when it appears on the phone’s screen.
4. Use the MM1 control knob to select Yes.
5. Confirm that the 6-digit PEN displayed matches the PIN displayed on your phone and select Yes with the control knob.
6. Select Pair on your phone to complete the pairing process.
   • Contacts synchronizing.
   • Bluetooth active and network strength bars.

*Some phones may require a response to automatically connect for future connections. Once paired, the Bluetooth symbol appears on the MMI screen along with network strength bars, and it will be displayed whenever a paired phone is connected to the infotainment system.

Wireless Audio Streaming

When your Bluetooth device is paired to your Audi vehicle, it allows you to stream music wirelessly from your device through the vehicle’s stereo system. (Refer to Bluetooth pairing instructions to pair a device. Ensure that Bluetooth audio is enabled on the MMI system**.

1. Press the TEL function button.
2. Select the Settings control button and choose Bluetooth from the menu.
3. Ensure that the Bluetooth audio player is turned on.
4. Bluetooth audio player will remain on until select off.
5. Select Bonded Bluetooth devices.
6. Choose your paired device and select it.
7. Select audio player to connect.
8. Press the MEDIA function button.
9. Select the Source control button and then select device.
   • Music tracks can be selected using the PREVIOUS and NEXT arrow buttons.
   • Pressing the volume dial will play audio.
   
   With Bluetooth audio turned on, the Bluetooth audio player will automatically connect to your device.

When an Apple device that is paired to the Bluetooth system is connected to the Audi Music Interface (AMI), a prompt appears to notify you that the Bluetooth connection has been disabled. When you select OK from the AMI, it will re-establish the Bluetooth connection.

**Wireless audio available on MMI Navigation equipped vehicles.

Note:
- Bluetooth® pairing requires compatible device. See your phone’s Owner’s Manual for specific Bluetooth activation instructions. Vehicle must be stationary with the parking brake engaged while performing this operation. Once paired, the Bluetooth symbol appears on the MMI display along with network strength bars. Bluetooth audio player will automatically reconnect to a paired phone when it is connected to the Infotainment system.
- This system is designed to play music on the vehicle’s audio system while driving.
- It is only safe to operate speakerphones and hands-free mobile devices when the vehicle is stationary. If you are using mobile devices while driving, do not use any wireless devices on the front seats while driving.
- Driving requires your complete and undivided attention. As the driver, you have complete responsibility for safety in traffic. Never operate mobile devices while driving, because this increases the risk of an accident.
- Medical experts warn that all phones can interfere with the function of pacemakers. Always maintain a minimum distance of 20 centimeters (8 inches) from the pacemaker.
- Do not carry the cell phone in a pocket directly over the pacemaker when the phone is switched on.
- Switch off the phone immediately if you suspect it may be interfering with the pacemaker.
- Do not use the Vision Recognition system in emergencies because your voice may change in stressful situations. It may take longer to dial the number in the system or you may not be able to speak clearly. Dial the emergency number manually.
- Switch off your phone in areas where there is a risk of explosion. These areas are typically marked as ‘no mobile phones’ or ‘no electronic devices’. This is likely to be any area where flammable gases or dust are present because static electricity could ignite a flame or spark, which could be dangerous. Do not use the phone near fuel pumps or fuel stations; from a fuel station or fuel tanker while being refueled; in a fuel vehicle; near explosives or in a hospital ward; or in an aircraft. If the phone is switched on in these areas, theakis could be dangerous. Do not use the phone near fuel pumps or fuel stations.
- Because your phone emits audio signals, a connection cannot be guaranteed under all circumstances. Do not rely on only your phone when it comes to essential communication (such as a medical emergency).
