Introduction to Your A8

Upper & Lower Display

Driver Assistance

Automatic Climate Control

Navigation

Bluetooth®, Voice Recognition & Media

Audi Smartphone Interface, Profile & Wi-Fi
1. Upper Display
Touchscreen allows access to multiple features and vehicle functions, including Radio, Media, Telephone, Navigation, Phone Apps*, Car, Settings and more.

2. Lower Display
Touchscreen enables control of HVAC features and seating adjustments as well as the ability to hand write navigation destinations. Dedicated buttons above and below screen activate/deactivate specific vehicle functions.

3. Audi Phone Box (see Disclaimers)
Console compartment can charge your compatible mobile device wirelessly. To use, position device with display facing up. Phone must be in direct contact with phone box surface. Calls will be made using external antenna on the vehicle. Mobile device may be connected to the Audi music interface using a USB adapter cable and can be started and operated using the MMI display. Console also contains 2 USB ports and an SD card slot. Available on models with phone holder, see Owner’s Manual for proper placement.

4. Volume Knob
Controls audio volume. Press to mute. Press and hold to turn audio off.

5. Steering Wheel Left Side Controls
- Use to select tabs in the instrument cluster.
- Use thumbwheel to scroll through menus. Press to choose a selection.
- Pressing the Back button will return you back to functions at higher levels.
- VIEW button changes virtual cockpit display.
- Press to open and close a menu.

6. Steering Wheel Right Side Controls
- Use to make or receive phone calls.
- Thumbwheel controls volume. Press to mute.
- Selects next or previous track, radio station or FF/REW.
- Allows customizable function. To change, use MMI: Vehicle ➤ Settings & Service ➤ Steering wheel button assignment.

*Always pay careful attention to the road, and do not drive while distracted. Message and data rates apply.

Upper Display

Features and Controls

1. Display Area
   Select function menus, apply settings and display content.
   When connected to Apple CarPlay® or Android Auto®, display will switch to mobile device operating system with associated functions and applications.
   To move icons, press and hold, then drag to desired location.
   To switch between menu pages, swipe left or right.
   1. To go back to the Home screen, simply press .

2. Quick Access
   Return to Home screen or quickly switch between four selected menus. Press and hold an icon in the main display area to move the icon to the quick access bar. The bottom icon will be replaced by the new icon. The Home button cannot be moved.

3. Status Display
   The symbols in the status bar show information such as mobile devices connected, data connection Bluetooth activation, etc.

4. Notification Center
   To open the Notification Center, pull the status bar downward, or press — on the status bar. Status information and notifications are displayed. The ability to manage connected devices and personal profiles, set date and time and set other content is also available. To delete notifications, press and drag to the right edge.

5. Back (not shown)
   Go back one step in the menu hierarchy.

6. Touch Response (not shown)
   Amount of haptic (touch sensitive) feedback necessary to activate icons can be adjusted in Settings ➤ Display and Brightness ➤ MMI ➤ Touchscreen feedback. Audible response can be turned on and off.

Lower Display

1. Auto Start/Stop
   Switches Start/Stop system on or off. The system checks if conditions are met before and during the “stop” phase and determines if the engine stops and how long it remains stopped.

2. Lane Departure Warning (see Disclaimers)
   Switches the lane departure warning on or off. Detects lane marker lines within the limits of the system. It will warn you with corrective steering and steering wheel vibration if approaching detected lane marker and it appears you will leave the lane.

3. Garage Door
   Garage Door opener function. Press if you are programming the garage door opener for the first time, then follow instructions in the Multi Media Interface (MMI).

4. Sunshade
   Press to adjust sunshade. Press and hold for convenience opening/closing.

5. Head-Up Display
   Press to show settings for the head-up display.

6. On/Off
   Press to switch upper display on or off. Press and holding this switch turns both MMI displays on or off.

7. Shortcuts
   Pressing the Shortcut icon opens the shortcut bar, giving access to saved items (radio stations, contacts, vehicle settings, etc.). To save an item as a shortcut, press and hold its text in upper MMI until option Save as a shortcut appears. Touch shortcut option to send the item to the shortcut bar. Press and hold shortcuts to move or delete.

⚠️ Warnings: Touch Displays
See Touch Displays in your Owner’s Manual for more detailed information and for important safety warnings.

Bluetooth®, Voice Recognition & Media

Audi Smartphone Interface, Profile & Wi-Fi
Cruise Control

Activate
To activate, pull the control stalk toward you in the ON position.

Set or Change Speed
At your desired speed, press the SET button on the end of the stalk. The set speed along with the respective indicator light is shown in the driver information system.

There are several ways to change your speed:
- Accelerate or decelerate, then press the SET button again.
- Push the stalk up or down one level to increase/decrease speed in 1 mph increments.
- Push the stalk up or down two levels to increase/decrease speed in 5 mph increments.
- Hold the stalk up or down to increase/decrease speed; release when desired speed is reached.

Cancel/Resume
To cancel and resume cruise control:
- To cancel, press the brake pedal or push the stalk briefly away from you one detent to the CANCEL position.
- The indicator light will go off in the driver information system.
- To resume, pull the stalk toward you; you will return to your set speed.

Your most recently set speed remains in memory until you turn cruise control or the ignition off.

Adaptive Cruise Assist

Applies to vehicles with adaptive cruise assist.
The adaptive cruise assist system is a combination of speed and distance regulation and helps maintain a distance from a vehicle driving ahead. Adaptive cruise assist can brake and accelerate as necessary to help maintain the selected distance.
- To activate, set, change, cancel or resume cruising speed, follow the same instructions as standard cruise control.
- The greater the speed, the greater the distance that is needed. To change the set distance:
  - Tap the indicator switch to display the current set distance.
  - To increase or decrease the distance in increments, tap the switch again toward ⬆️ or ⬇️.

Lane Guidance

Within the limits of the system, lane guidance can provide corrective steering to assist the driver with keeping the vehicle in the center of the lane. Press the button on the turn signal lever to switch lane guidance on or off. Lane guidance is off when the indicator light is white. Some conditions may deactivate lane guidance, such as no lane lines, lane too narrow or wide, etc.

Driver Assist Systems

There are three levels of driver assistance systems: Maximum, Individual and Basic. Maximum activates all available features. Individual allows you to select an individual system. Basic activates only Audi pre sense and emergency assist. To choose, press the Driver Assistance button on the center console. Or, in the upper display, select Vehicle ➔ Driver assistance. Depending on vehicle equipment, features may include:
- Night vision assist.
- Intersection assist.
- Distance warning.
- Emergency assist.
- Exit warning.
- Side assist.

Driver Assistance Features are not substitutes for attentive driving. See Owner’s Manual for further details, and important limitations.

Warnings: Driver Assistance

See Driver Assistance in your Owner’s Manual for more detailed information and for important safety warnings.

Automatic Climate Control

Navigation

Bluetooth®, Voice Recognition & Media

Audi Smartphone Interface, Profile & Wi-Fi
Automatic Climate Control

System Controls
The advanced climate control system is accessed in the lower display and offers 4-zone heating and cooling, rear-seat control of the system and a number of interior environment improvement features.

Driver and Passenger Controls

1. **AUTO**
   Maintains your selected temperature by automatically regulating the temperature, fan speed and airflow. The A/C turns on automatically to condition and dehumidify the air. Changing the air distribution or fan speed will turn off the AUTO function.

2. **Seat Heating**
   Select one of three seat heating levels by pressing repeatedly.

3. **Seat Ventilation**
   Select one of three seat ventilation levels by pressing repeatedly.

4. **A/C**
   When illuminated, A/C is on.

5. **A/C Max**
   The quickest way to cool the cabin. It automatically returns to normal operation once desired temperature is achieved.

6. **OFF**
   Deactivates the climate control system.

7. **A/C Recirculate**
   During recirculation, the air intake will close and interior air will be filtered and recirculated. In AUTO mode, recirculation will occur automatically based on air quality sensors and outside temperature.

8. **Defrost Max (not shown)**
   Automatically adjusts the settings to increase the ability to defog/defrost the windows. Temperature should be set at 72°F (22°C) or higher. With ignition off, pressing will use residual coolant heat to heat the vehicle interior. Switches off automatically after about 15 minutes.

9. **Rear Defrost (not shown)**
   Activates the electric rear window defroster, when the engine is running. Depending on outside temperature, this will switch off after 10-20 minutes.

10. **Temperature**
    Tap or slide to adjust temperature on either side.

11. **Airflow**
    Choose any combination of airflow direction.

12. **Blower**
    Select one of six fan speeds. The blower should always run to prevent the windows from fogging, and to ensure continuous exchange of air inside the vehicle.

Additional Functions
Selecting gives access to more cabin environment controls in the upper display, which features animated images of the active features. Swipe the display right or left for different views.

- **Customizable Buttons**
  The buttons on either side of the button can be changed to a different climate control function. Press and hold the symbol for the desired function on the upper display for at least three seconds. A menu appears with two sections. Pull the icon to the left to assign the function to the left-hand button and to the right for the right-hand button.

- **Available Air Quality Package**
  The air ionizer filters the interior with negatively charged molecules and atoms that can help reduce the amount of dust, allergens and other particles in the cabin.

- **Fragrance**
  Dispenses a scent in the vehicle interior. Release is time-delayed, especially at low or high temperatures.

- **Steering Wheel Heating**
  Heats the steering wheel electrically.

- **SYNC**
  Sets all areas of the cabin to the same settings. SYNC can also be activated by “pinching” two fingers together between the temperatures shown on the lower display.

- **REAR**
  Sends control of the climate control system to the rear center console remote.

⚠️ Warning: Climate Control System
See “Climate Control System” in your Owner’s Manual for more detailed information and for important safety warnings.

Automatic Climate Control

Bluetooth®, Voice Recognition & Media

Audi Smartphone Interface, Profile & Wi-Fi
Navigation

Setting a Destination
Your MMI Navigation system has extraordinary capabilities to enhance your drive with user-definable views, routing selections and more. Get started with setting destinations and discover more as you become familiar with the interface.

Intelligent Search
With intelligent search, you can enter the data for a navigation destination in any order all at once. You can search for Points of Interest, contacts, previous destinations, received destinations and routes or favorites. An Audi connect subscription is required for internet-based searches.
1. Select Navigation button in the upper display.
2. Touch the Search icon .
   - This will display shortcuts for common destinations, e.g., Parking, Restaurant, Gas station, etc.
3. Use the lower display touched to write the address or name of the location. You can also enter generic terms like “hardware store” or “bakery”. You do not have to wait for letters and numbers to be recognized before continuing.
4. Locations matching the data entered will be displayed. Choose from the available options.
5. Select Start to begin route guidance.

Finding a Destination Using a Search Engine Provider
1. Select Navigation ➔ Q ➔ G.
2. Enter one or more search terms into the input field. Suggestions to narrow the search will display. Press on suggestions until the desired destination appears.

Intelligent Search with Voice Recognition
1. Short press the Voice Recognition button on the steering wheel or on the upper display depending on the context to engage voice recognition.
2. Say the address, Point of Interest or generic type of location you wish to find.
3. Choose the destination from the displayed list.

Saving Favorites and Shortcuts
Destinations can be saved as favorites or shortcuts in order to quickly access them for future trips.
1. Press and hold displayed destination until the Option menu appears.
2. Choose Store as favorite or Save as shortcut.
3. A solid white star indicates it is stored as a favorite.

To Access a Favorite
• Select Navigation ➔ ➔ Favorites.

To Access a Shortcut
• Select located on the lower display. Saved shortcuts will be displayed. Press the respective tile.

Navigation Settings
With the upper display in map view, press ➔ to access and modify various navigation settings. Available settings include:
• Map settings.
• Voice guidance.
• Route criteria.
• Route information.
• Personal route assistance.*
• Presentation mode.

*With this feature activated, the system will record your favorite driving routes and make navigation suggestions based on your known driving habits. Personal routes and destinations can be deleted from the personal route assistance sub-menu.

Navigation plus depends on signals from the worldwide Global Positioning System network. The vehicle’s electrical system, and existing wireless and satellite technologies, must be available and operating properly for the system to function. The system is designed to provide you with suggested routes in locating addresses, destination and other points of interest. Changes to street names, construction zones, traffic flow, points of interest and other road system changes are beyond the control of Audi of America, Inc. Complete detailed mapping of lanes, speeds, streets, toll roads, highways, etc., is not possible. Therefore you may encounter discrepancies between the mapping and your actual location. Please rely on your individual judgment in determining whether or not to follow a suggested MNI navigation route plus.

Warnings: Navigation
See Navigation in your Owner’s Manual for more detailed information and for important safety warnings.

Navigation
Bluetooth®, Voice Recognition & Media
Audi Smartphone Interface, Profile & Wi-Fi
Initial Setup

1. Switch ignition on with vehicle in Park.
2. Activate the phone's Bluetooth.
3. Open the Bluetooth menu on your phone, ensure “Audi MMI XXX” (last four digits of VIN) appear as an option.
4. Select Phone on the upper display to display available Bluetooth devices.
5. Select Connect mobile device.
6. Select your device from the device list. Press the Refresh icon if the device is not displaying.
7. Confirm the PIN on your phone matches the one generated by the MMI. This confirmation step pairs your phone.
8. Open the Bluetooth sub-menu on your device and enable Show Notifications, Sync Contacts and Apple CarPlay for iOS devices. Some devices may require a selection to allow access to the address book.

Voice Recognition

- When a compatible device is connected, a long press of the Voice Recognition button will enable voice recognition with your phone’s digital assistant. Use commands such as “Call Mary Smith, mobile” or “Call last number dialed.”
- A short press of the Voice Recognition button will activate MMI voice recognition commands.
- You can also control audio, navigation and climate control functions with voice recognition commands, such as “Play FM 103.5” or “Set the temperature to 70 degrees.”

Switch Between Paired Phones

A primary and secondary phone can be paired to the vehicle. To swap the primary/secondary order, from the upper display select Phone. The secondary will now be primary and vice versa.

Media

Media and Audio

The Multi Media Interface can access multiple media sources, including compatible Bluetooth connected devices, USB-connected devices, onboard Radio/Satellite sources, online media (via Wi-Fi hotspot) and SD cards. Bluetooth streaming is not available when Apple CarPlay is active.

To access a media source:
1. Select MEDIA on the upper display.
2. Select Source and choose from the available options.
3. To connect additional mobile devices (after two phones are paired):
   1. Select MEDIA.
   2. Select Source.
   3. Select Connect external device.
   4. Activate the Bluetooth menu on the external device.
   5. Select New connection and select from available Bluetooth devices displayed. Press the Refresh icon if the device is not displaying.
6. A PIN will be generated. Confirm the PIN on your mobile device.
You can connect your compatible smartphone to the MMI. Certain content on your phone will be adapted to the Infinetainment system display and can be operated through the MMI controls. This gives you the benefit of the familiarity with your smartphone and your phone’s voice recognition system combined with the MMI display.

Apple CarPlay™

To connect:
1. Switch on the vehicle and put it in Park.
2. Ensure your iPhone® is unlocked and is running the latest version of iOS.
3. Connect your iPhone® with a manufacturer-approved cable to either USB port.*
4. Respond to prompts as necessary from both Audi MMI as well as your iPhone.

When connected:
- Long press the Voice Recognition button on the steering wheel, to activate Siri®.
- Make and receive calls.
- Send and receive text messages.
- Set reminders.
- Get turn-by-turn navigation.
- See recent places.
- Listen to music apps.

After the initial connection of an iPhone with Apple CarPlay®, the iPhone will automatically connect to Apple CarPlay® during the next ignition cycle when the iPhone is connected to USB or wirelessly.

*Always pay careful attention to the road, and do not allow while distracted. Not all features are available on all operating systems. Message and data rates may apply. Apple CarPlay® is a trademark of Apple Inc. App-activated services are provided by third parties. Audi Connect allows you to connect to your vehicle via the internet using the Audi MMI. For more information, go to audi.co.uk/helpconnect and read the FAQs. Over the air updates may enable new features and services and require internet connectivity.

Wireless Apple CarPlay™

Allows you to use Apple CarPlay wireless without a USB cable. To connect an iPhone:
1. Switch on the Bluetooth function and Wi-Fi on your iPhone and make sure you are within range of your vehicle. For the HTC® or other devices with software and software is limited by the manufacturer. Antennas must be installed at least 25 cm (10 in) from any person. You must cease operating this device immediately if the recipient of the signal has been warned in writing by the service provider. Warning: EXCESSIVE ACCIDENT INFORMATION THROUGH THE USE OF WIRELESS DEVICES MAY BE DISTRACTING FOR YOU AND OTHERS.
2. Long press the Voice Recognition button on the steering wheel or select Phone app on the upper display.
3. Select To connected devices.
4. Select New connection.
5. Select from list of devices.
6. Follow prompts in the MMI and your iPhone.

Disclaimers

Audi Phone Box

Please connect your phone. This is a consumable device. In the event of non-return, you must replace this device with a new, serviceable device. Please contact your local dealership for further information. Some providers may not be available to the USB version of RVC. If you are unsure, contact your provider. For the HTC® or other devices with software and software is limited by the manufacturer. Antennas must be installed at least 25 cm (10 in) from any person. You must cease operating this device immediately if the recipient of the signal has been warned in writing by the service provider. Warning: EXCESSIVE ACCIDENT INFORMATION THROUGH THE USE OF WIRELESS DEVICES MAY BE DISTRACTING FOR YOU AND OTHERS.

Audi Smartphone Interface, Profile & Wi-Fi

Warning: Audi Smartphone Interface

The Audi Smartphone Interface and Owner’s Manual for more detailed information and for important safety warnings.

Always pay careful attention to the road, and do not drive while distracted. Audi smartphone interface features require compatible device, device-connected applications, and Wi-Fi. Audi Connect® is available on selected models of Audi vehicles in the United States. Over-the-air updates may enable new features and require internet connectivity. Over-the-air updates require additional subscription with operating system and conditions and should be used only when it is safe and appropriate. See materials provided by vehicle manufacturer and state data security standards. Retrieval devices connect in automatically and vehicle information is archived in demand settings.

Warning: Personal Profiles

See the Vehicle Profiles (Owner’s Manual) for more detailed information and for important safety warnings.

Warning: Wi-Fi Settings

See the Settings (Owner’s Manual) for more detailed information and for important safety warnings.

Always pay careful attention to the road, and do not drive while distracted. The Wi-Fi hotspot feature is intended for passenger use only. The Wi-Fi hotspot feature is granted through Audi connect PLUS. Audi connect PLUS fees and technology fees are optional. To use the additional subscription with operating system and conditions and should be used only when it is safe and appropriate. See materials provided by vehicle manufacturer and state data security standards. Retrieval devices connect in automatically and vehicle information is archived in demand settings.
Apple CarPlay®

1. Switch on ignition or with vehicle in Park. 
2. "Welcome to Apple CarPlay on [vehicle]" is displayed. If you have created a new account on your iPhone, you are asked to log-in with your Apple ID.
3. Apple CarPlay™ is now active on your vehicle.
4. Tap on the Apple CarPlay icon ( ) on the upper right corner of the infotainment screen.
5. Set features in the upper right corner of the infotainment screen.
6. Set the car verserage to 12.

When connected:
- Long press to release feature button ( ) or to go to next page.
- Short press to release feature button ( ) or to go to previous page.
- Use volume and control.
- Select the source.

After the initial connection of iPhone with Apple CarPlay (iPhone or iPad), when the connection is lost, the iPhone must be disconnected from Apple CarPlay during the last ignition cycle when the iPhone is connected to a cellular network in order to reset Apple CarPlay and to avoid possible safety consequences and operating problems. Management of Apple CarPlay connections is not the responsibility of the vehicle manufacturer or Apple and is subject to Apple’s terms of service.

Personal Profiles

Profile name retention, AVAD, cloning, etc., in memory. This is useful if multiple people share the same vehicle and each person has their own infotainment preferences. All preferences must be saved for the profile to be active.

To save your infotainment preferences in the Apple CarPlay™ system, follow these steps:
1. Go to the Menu button ( ).
2. Select Apple CarPlay Profile ( ).
3. Click on the personalization button ( ).
4. Select your profile.
5. Your car will automatically restart with your preferences.

In summary, Apple CarPlay is a seamless integration of your iPhone into your vehicle’s infotainment system, allowing you to access your favorite apps, navigate, and make phone calls without taking your eyes off the road. To get started, simply connect your iPhone to your vehicle and enjoy the convenience of Apple CarPlay.
