Center Console
The Audi Multi Media Interface (MMI) can be controlled from the center console as well as the steering wheel controls. There are input redundancies to allow you to access MMI functions in the way that best suits you.

1. MMI Control Knob/Touchpad
   The rotary pushbutton/touchpad allows you to browse menus and zoom in and out of map views by rotating the knob, and select items by pressing the knob. Enter alphanumeric information by writing with your finger on the touchpad. The MMI will display your entry.
   - To enter a space, swipe left-to-right. To delete a character, swipe right-to-left.
   The knob can also be shifted in four directions:
   Up: Opens the spellier to enter alphanumeric information (e.g., navigation address).
   Down: Moves down through a menu.
   Left/Right: Opens Selection and options menu, same as control buttons.

2. Control Buttons
   - Left: The left control button opens the Selection menu to call up further functions for individual menu items (e.g., RADIO).
   - Right: The right control button opens the Options menu to select and confirm specific functions for individual menu items.

3. NAV/MAP TEL Function Switch
   - NAV/MAP: Toggle up repeatedly on the NAV/MAP to switch the display between Navigation input mode and Map mode.
   - TEL: Toggle down to enter the Telephone menu to access the Contact directory.

4. MENU Button
   Opens the selection menu in a given function (e.g., RADIO, TEL, NAV, etc.).

5. RADIO/MEDIA Function Switch
   - RADIO: The RADIO menu allows you to select or manage radio options, including presets and equalization. Toggle up repeatedly to move through radio bands (AM, FM, SAT).
   - MEDIA: Allows you to select auxiliary devices and manage music and video content in folders, playlists and tracks. Toggle down repeatedly to move through the available Media sources (e.g., Bluetooth, SD, DVD, etc.).

6. BACK Button
   Moves back through the menu hierarchy in reverse order of your recent selections. When entering text, pressing BACK will delete a character. Pressing and holding will remove all characters on a line.

7. Infotainment Control
   Turns the MMI Infotainment system on and off and controls volume. Tilting the knob to the right or left will move through tracks or preset radio stations. Pressing briefly mutes audio. Press and hold to turn system off.

**Warnings:**
- Only use the Infotainment system when traffic conditions permit and always in a way that allows you to maintain complete control over your vehicle.
- Always adjust the volume of the audio system so that signals from outside the vehicle, such as police and fire sirens, can be heard easily at all times.

Setting a Destination
Your MMI Navigation system has extraordinary capabilities to enhance your drive with user-definable views, routing selections and more. Get started with setting destinations and discover more as you become familiar with the interface.

1. Toggle the NAV/MAP switch to open the Destination entry input screen.
2. Use the touchpad to write the address or Point Of Interest name, or shift the control knob forward to open the speller and enter information by manually selecting letters and numbers. Press the BACK button to return to writing mode.
3. Available addresses will appear as information is entered, filtering to show only addresses meeting the currently entered information.
4. Select appropriate address, then select Start route guidance.
   - Additional destination features can be seen by pressing the left control button.
   - To cancel route guidance, select the right control button and select Cancel route guidance from menu.

Alternative Routes
The Navigation system can display additional alternative routes based on speed, economy and traffic congestion. When this feature is enabled, alternative routes will always be displayed when route guidance is active.

To enable Alternative routes:
1. Select the NAV/MAP function.
2. Press the right control button and choose Navigation settings.
3. Select Show alternative routes to place a check mark in the box to enable this feature.
To select Alternative routes while route guidance is active:
1. Press the right control button > choose Show alternative routes.
   - If available, up to three route suggestions will be displayed and can be selected via the control knob (Route type: Fast 1, fast alternative 2, economic route 3).

Additional Settings
Additional settings can be configured within the Options menu using the right control button.
- Map settings include display settings to change between Standard and Google Earth view as well as 2D and 3D modes.
- Route criteria allows you to set the mode of travel to include or avoid roads such as HOV lanes, Toll roads and more.
- Voice guidance allows you to configure responses from Complete to Shortened, along with voice guidance volume.

Note:
Always pay careful attention to the road, and do not drive while distracted. Enter destinations while vehicle is stationary away from traffic. When pressing the Info button, the last navigation announcement will be repeated.

- Warnings: Navigation
  - The demands of traffic require your full attention.
  - They all traffic laws when driving.
  - The route calculated by the Navigation system is a recommendation for reaching your destination.

e-tron® Charging & Driving Modes
3-Zone Climate Control

System Controls
Press any button or turn the temperature dial to activate the system.

1. AUTO
Your Climate Control system will help the cabin maintain your selected temperature by regulating the temperature, fan speed and airflow.
   - When AUTO is selected, A/C will come on automatically to condition and dehumidify the cabin's interior.
2. Synchronize Zones
Pressing the AUTO button for two seconds will synchronize the driver and passenger controls to the same temperature, fan speed and airflow.

3. HI/LO
When HI or LO are selected in AUTO mode as the desired temperature, the system will run continuously, heating or cooling with the fan at high speed.

4. Heated Seats
To warm up more quickly on a cool morning, turn on your heated seats.

5. Air Distribution
Direct airflow to defrost, panel and floor vents or a combination by selecting the appropriate airflow button or buttons.

6. Recirculation
The recirculation function helps prevent outside air and odors from entering the cabin. It may also be used in conjunction with A/C to cool the cabin more quickly. Do not leave the system in recirculation mode for extended driving.

7. Vent Flow
   - To adjust the airflow amount, turn the knob on the outer adjustment ring.
   - To stop the airflow, turn the adjusting knob all the way to the right.
   - To adjust the airflow direction, turn the air vent grille insert.

Cruise Control
Activate
To activate, pull the control stalk toward you to put it in the ON position.

Set Cruising Speed
At your desired speed, press the SET button at the end of the stalk. The set speed, along with CRUISE, is shown in the Audi Virtual Cockpit or instrument cluster.

Changing Speed
There are several ways to change your speed:
   - Accelerate or decelerate, then press the SET button.
   - Push the stalk up or down one detent to increase/decrease speed by 1 mph increments.
   - Push the stalk up or down to the second detent and release to increase/decrease speed in 5 mph increments.

   - Hold the stalk up or down to increase/decrease speed; release when desired speed is reached.

Cancel/Resume
1. To cancel, press the brake pedal or push the stalk slightly away from you to the CANCEL position.
2. The CRUISE light will go off.
3. To resume, pull the stalk toward you; you will return to your set speed.

Warnings: Climate Control
- Poor visibility can lead to accidents.
- For safe driving, keep all windows free of ice, snow and fog.
- Become familiar as quickly as possible with the controls and function of the Climate Control system, especially with the defrosting and defogging functions.
- When the temperature is below freezing, only the windshield washer system after the windshield has been warmed by the Climate Control system. The weather fluid could freeze on the windshield and impair visibility.
- You should not use the recirculation mode for an extended period since no fresh air is drawn in. With the air-conditioning switched off, the windows can fog up which increases the risk of an accident.
- Individuals with reduced sensitivity to pain or temperature could develop burns when using the seat heating function. To reduce the risk of injury, these individuals should not use seat heating.

Warnings: Cruise Control
- Always pay attention to the traffic around you when the Cruise Control system is in operation. You are always responsible for your speed and the distance between your vehicle and other vehicles.
- It's not safe to cruise at speeds above the posted speed limit in your area or in construction zones.
- Please note that consciously "testing" your foot on the accelerator pedal presents the Cruise Control from braking. This is because pressing the accelerator pedal overrides the Cruise Control system.
- Do not use Cruise Control when the vehicle is too slow. The vehicle speed can only be controlled above a certain speed, the lowest set speed in the system may be switched off. The rest of the Cruise Control system functions remain active as long as the CRUISE indication light is on.
- You should only resume the stored speed if it is not too high for existing traffic conditions. Otherwise you increase the risk of an accident.

Climate Control & Cruise Control

Audi smartphone interface

Bluetooth® & Voice Recognition
e-tron® Charging & Driving Modes
Connecting
You can connect your Apple® or iPhone® phone to the MMI. Certain content on your phone will be adapted to the Infotainment system display while driving and can be operated through the MMI controls*. This gives you the benefit of the familiarity with your phone’s system combined with the MMI display.

To connect:
1. The vehicle must be stationary with the ignition on.
2. Connect your smartphone with a manufacturer approved cable to either USB port. Before using "Android Auto™", you must download the Android Auto app from the Google Play® Store. You must have an active Google account and internet connection.
3. You will see a connection prompt in the MMI.
4. Using the control knob, select to activate the device.
5. Respond to prompts as necessary from both the MMI, as well as the smartphone.

Once connected, you have access to the apps displayed on the screen. Select the apps using the MMI control knob.

*Not all apps will work with the Audi smartphone interface, and some functions may be limited. The functions that can be used depend on the operating system version and the software of the app being used. Some MMI functions may not be available with "CarPlay™" or "Android Auto" as active. Refer to apple.com/us/ios/carplay or android.com/auto for additional information.

Apple CarPlay™ Operation
- If a Bluetooth connection is active when CarPlay™ is activated, it will disconnect Bluetooth and use CarPlay™ exclusively for telecommunication.
- MMI control knob function:
  - Turn the knob and press to open selected apps and control functions within that app.
  - Shift the knob down or up to change levels to access apps more quickly. Shift the control knob to the right to advance to the next screen.
  - Press and hold the BACK button to return to the active app menu.

Android Auto™ Operation
- If you had not previously paired your phone with Bluetooth, it will be paired automatically with your MMI system**.
- MMI control knob function:
  - Shifting the knob down will change usage from within an open app allowing you to select another app.
  - Turning the knob and pressing will open the selected app.
  - Shifting left or right within an active app will open additional features or settings. For example, shifting to the right will activate Talk to Google.

**The Android phone may prompt to acknowledge additional requests.

Access to Apple CarPlay™ and Android Auto™
If you have an active Apple CarPlay or Android Auto session and have accessed another MMI function and wish to return to the Apple CarPlay or Android Auto Menu.

Connection Manager
If your device is presently using MMI Media as the source and you wish to activate Apple CarPlay or Android Auto instead:
1. Select the MENU function button.
2. Scroll using the MMI control knob to select Apple CarPlay or Android Auto from the Menu.

To activate, scroll to Audi smartphone and press the control knob, and place a check in the box for your device. Remove the check to deactivate from the Audi smartphone interface.

The Connection Manager can also be accessed by selecting Menu > Settings > Connection Manager.

Note:
- Only use the Infotainment system when traffic conditions permit and always in a way that allows you to maintain complete control over your vehicle.
- Always make sure that you follow the instructions and heed the WARNING in this Manual. It is your interest and in the interest of your safety.
- Always use the Infotainment system when traffic conditions permit and always in a way that allows you to maintain complete control over your vehicle.
- Keep the Complete Owner’s/Lawyer’s in your Audi when you lend or sell your vehicle so that this important information will always be available to the new owner.
- Always keep the Owner’s/Lawyer’s in your Audi when you lend or sell your vehicle so that this important information will always be available to the new owner.
- Always keep the Complete Owner’s/Lawyer’s in your Audi when you lend or sell your vehicle so that this important information will always be available to the new owner.
- Always keep the Complete Owner’s/Lawyer’s in your Audi when you lend or sell your vehicle so that this important information will always be available to the new owner.
- Always keep the Complete Owner’s/Lawyer’s in your Audi when you lend or sell your vehicle so that this important information will always be available to the new owner.

- Always keep the Complete Owner’s/Lawyer’s in your Audi when you lend or sell your vehicle so that this important information will always be available to the new owner.

![Image of a Audi smartphone interface with Bluetooth® & Voice Recognition](image-url)

With Apple CarPlay™ and Android Auto™ you can:
- Activate Siri® Voice Control or Talk to Google with a long press of the TALK button on the steering wheel.
- Make and receive calls.
- Send and receive text messages.
- Set reminders.
- Get turn-by-turn navigation.
- See recent places.
- Listen to music.

![Image of a Audi smartphone interface with Audio](image-url)

Use your fingers to “pinch” or “spread” the view using the MMI touchpad. Press to select a location to begin route guidance.

Bluetooth® Pairing

Pairing a Compatible Device
Bluetooth pairing is a one-time procedure. Once paired, your phone will automatically connect when you start your vehicle. Your contact list will automatically synchronize, allowing you to access contacts and make and receive calls through the Infotainment system. For information regarding phone compatibility, visit audi.com/bluetooth.

1. Switch ignition to Accessories mode.
2. Activate your phone’s Bluetooth and set to pairing or discovery mode.
3. In the list of available devices, select the Audi MMI listing for the vehicle.
4. When the prompt appears in the MMI, select Accept using the control knob.
5. Confirm the PIN matches and select Yes in response to the prompt.
6. Select Pair on your device.

*Some phones may require an additional response to prompts to allow full connectivity.

Wireless Audio Streaming

Streams music wirelessly via a Bluetooth connection. To connect a device (or additional devices), follow the pairing instructions above. Once paired, Bluetooth audio playback is enabled automatically.

- Select MEDIA > press left control button > select Bluetooth as the source.
- Use the BACK button to choose within playlists, Artists, Songs, etc.

Voice Recognition

Call by Name

When using Voice Recognition, speak in a normal voice, facing forward. Keep cabin noise to a minimum.

1. Press the TALK button on the steering wheel. A beep will sound.
2. Say “Call” <Name from directory> e.g. “John Smith”.

3. After system response, confirm request by saying, “Yes.” The number will be dialed. You may also say “Cancel,” to cancel the call.

- If multiple numbers are stored for a given contact, the system will ask which you wish to dial. To avoid this, indicate in your initial request e.g., “John Smith, mobile”.

Entering a Destination in Navigation

1. Press the TALK button on the steering wheel. A beep will sound.
2. Say “Drive me to” and speak entire address; e.g., “eight five five nine Withyshie Boulevard, Los Angeles.” (Speak in single digits.)

- If your destination is in another state, say, “Change state” when prompted to enter address.

3. The system will locate the address and confirm. Say “Yes” after the command to begin navigation.
4. The system will repeat the address for confirmation and ask if you would like to start route guidance. After the tone, say “Yes” and guidance will begin.

There are three ways to cancel Voice Recognition:

- Say “Cancel” at the voice prompt.
- Press any button on the MMI controls.
- Or, press and hold the TALK button on steering wheel until you hear “Cancel.”

No navigation prompts or traffic announcements are given when a dial is running. Refer to your Owner’s Manual for additional Voice Recognition commands.

Note:
Bluetooth® Pairing

Apple products connected via the USB cable will disable Bluetooth audio. To establish Bluetooth audio, disconnect the USB cable and select the desired music source on the media device. Bluetooth® pairing requires compatible device. See your phone’s Owner’s Manual for specific Bluetooth audio instructions. Vehicle must be stationary with the parking brake engaged while performing this operation. Once paired, the Bluetooth symbol appears in the display. Bluetooth audio will not function if vehicle is moving. Audible system will announce that the device will be disconnected whenever a paired phone is connected to the Infotainment system. Other audio devices will play back as a secondary source. Bluetooth audio is limited to six devices and is hardware dependent. The iconic Bluetooth mark is owned by Bluetooth SIG, Inc. and any use of such mark by Audi AG is under license. Other brands and product names are trademarks or registered trademarks of their respective owners.

Warnings: Bluetooth® Pairing & Voice Recognition

- Do not carry the cell phone in a pocket directly over the passengers when the switch is on. Switch the cell phone off immediately if you suspect it may interfere with the pacemaker.
- Do not use the Voice Recognition system in emergencies because your voice may change in stressful situations. It may take longer to dial the number or system may not be able to dial the emergency number manually.
- Always keep your hands free to operate the vehicle. When using the Voice Recognition system, always keep your hands on the wheel and on the controls.
- Do not carry the cell phone in a pocket directly over the passengers when the switch is on. Switch the cell phone off immediately if you suspect it may interfere with the pacemaker.
- Do not use the Voice Recognition system in emergencies because your voice may change in stressful situations. It may take longer to dial the number or system may not be able to dial the emergency number manually.
- Always keep your hands free to operate the vehicle. When using the Voice Recognition system, always keep your hands on the wheel and on the controls.

- Always keep your hands free to operate the vehicle. When using the Voice Recognition system, always keep your hands on the wheel and on the controls.
Charging Your e-tron®

Charging can be accomplished using the portable charging unit included with the vehicle or a commercial charging station. Full charging times will vary depending on charging station voltage, current level of the battery, ambient temperature and other variables. You may charge the vehicle when there is a partial charge in the battery.

To plug in an e-tron:
1. The charging port is under the Audi rings on the front grille of the vehicle.
2. To open the charging port, the vehicle must be unlocked.
3. Turn the dial in the second ring to the left, and the four rings will slide open, revealing the charging port.
4. Remove the rubber cap and insert the charging plug fully into the port until the latch clicks. Make sure the electricity flows until the cable is connected and the connection is verified.
5. A power plug indicator light in the instrument cluster illuminates when the e-tron is being charged.
6. The e-tron’s gas-electric hybrid drive system will not turn on if the cable is connected to the vehicle, although you may still operate accessories.

Portable Charger

The e-tron charging is capable of using either a 120V or 240V electrical power source. To use portable charger:
1. First, plug the charger into an electrical outlet. Then plug the e-tron charging into the power outlet.
2. The power indicator will flash blue during self-test, then turn white.
3. The message “Unplugged” will appear in the display.
4. The status LED will then turn green and the message, “Plugged and Charging” will appear.
5. Power level may be set to reduce overall electrical load.
6. You may enter a PIN code to prevent unauthorized use of the charger.

To learn more about how to operate the features within your Audi
TEXT 2018A3 to 38981
To learn more about your features, call your Audi technician.

Charging Your e-tron

Charging the e-tron

1. Access the charging port under the Audi logo on the front of the e-tron.
2. Open the charging port, the vehicle must be stationary.
3. Press the switch in the direction of the arrow.
4. Remove the flap to reveal the charging connector.
5. Install the vehicle side connector to the charging plug, until you hear a click. No electrical activity until the cable is connected and the power meter shows.
6. A yellow indicator light in the instrument cluster durates until the e-tron is being charged.
7. Then the e-tron’s electric-hybrid system will operate the engine and the motor and drive the wheels of the vehicle, although you will still operate accessories.

Charging Status

There are two selectable modes charged next to the charging port.

- 1-4kW charging: slower, more economical, lower 
- 1-6kW charging: faster, more powerful, higher

To change the charge, select the charge setting and the desired charge with the rotary pushbutton.

Portable Charger

The e-tron comes with a portable charger, which is equipped with a portable charger for charging the batteries. To charge this portable charger, connect it to the 12V socket, which is located in the rear of the vehicle. The portable charger is also equipped with a USB port for charging mobile devices.

Charging Stations

The vehicle is equipped with a charging cable, which is stored in the glove box. To charge the vehicle, connect the charging cable to the 230V socket and the charging plug to the vehicle.

Preferred Charging (Scheduling)

Scheduling allows you to charge the vehicle during times when the cost of electricity is lower, and to determine when the electric-hybrid system should be used instead of the combustion engine. This can be done through the Audi Connect mobile app or via the infotainment system.

1. Start a charging session.
2. Select the charge level you want to charge at.
3. Set the start time for the charging session.

Charging your e-tron

You can also charge your e-tron using a public charging station. If you want to use a public charging station, you can connect the charging cable to the 230V socket and use the Audi Connect mobile app to schedule the charging session.

Power Usage Display

The power usage display is located in the instrument cluster in the center of the dashboard. It shows the power consumption of the vehicle at all times. By default, it displays the power consumption per kilometer and the total power consumption.

Power Meter

The power meter is also located in the instrument cluster in the center of the dashboard. It shows the power consumption of the vehicle at all times. By default, it displays the power consumption per kilometer and the total power consumption.

Hybrid/ev battery charge

The power display indicates the current state of charge of the battery. The state of charge is displayed as a percentage. When the battery is fully charged, the power display shows 100%. When the battery is fully discharged, the power display shows 0%.

Energy Flow Display

This allows you to view the power flow from the engine and battery. The power flow is displayed as a flow diagram, which shows the direction of the power flow. When the power enters the battery, the power flow is shown coming from the battery to the power meter. When the power exits the battery, the power flow is shown coming from the power meter to the power meter.

Driving Modes

The e-tron can be driven in five different driving modes: comfort, eco, sport, eco+ and manual. Each driving mode offers a unique combination of powertrain and driving characteristics.

Tip for Efficient Driving

Your driving style can have a big impact on your efficiency and the battery life of your e-tron. Here are some tips to help you drive more efficiently:

- Select Sport mode to improve your efficiency and to accelerate more quickly.
- Push the accelerator pedal slowly to reduce the number of gear changes and to maintain a constant speed.
- Push the accelerator pedal more quickly when you need to accelerate quickly.
- Use the power meter to monitor the battery level and to adjust your driving style accordingly.
- Keep your vehicle in gear as much as possible to save on battery consumption. The e-tron’s electric-hybrid system will automatically adjust the gear selection to optimize efficiency.
### Indicator Lights

For additional information on indicator lights, refer to your vehicle’s Owner’s Manual.
